Data in Many Forms . . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on CD, diskette, computer print-out, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Client Services Unit,
Prices Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 1-613-951-9606) or to the Statistics Canada reference centre in:

Halifax	(1-902-426-5331)	Regina	(1-306-780-5405)
Montréal	(1-514-283-5725)	Edmonton	(1-403-495-3027)
Ottawa	(1-613-951-8116)	Calgary	(1-403-292-6717)
Toronto	(1-416-973-6586)	Vancouver	(1-604-666-3691)
Winnipeg	(1-204-983-4020)		

Toll-free access is provided in all provinces and territories, for users who reside outside the local dialing area of any of the regional reference centres.

National Enquiries Line	1-800-263-1136
National Telecommunications Device for the Hearing Impaired	1-800-363-7629
National Toll-free Order-only Line (Canada and United States)	1-800-267-6677

How to Order Publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Marketing Division, Sales and Service, Statistics Canada, Ottawa, K1A 0T6.

(1-613-951-7277)
Facsimile Number (1-613-951-1584)
Toronto Credit Card Only (1-416-973-8018)

Standards of Service to the Public

To maintain quality service to the public, Statistics Canada follows established standards covering statistical products and services, delivery of statistical information, cost-recovered services and services to respondents. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

Des données sous plusieurs formes . . .

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolinguage et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toute demande de renseignements au sujet de cette publication ou de statistiques et services connexes doit être adressée à la:

Sous-section du service à la clientèle,
Division des prix,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 1-613-951-9606) ou au centre de consultation de Statistique Canada à:

Halifax	(1-902-426-5331)	Regina	(1-306-780-5405)
Montréal	(1-514-283-5725)	Edmonton	(1-403-495-3027)
Ottawa	(1-613-951-8116)	Calgary	(1-403-292-6717)
Toronto	(1-416-973-6586)	Vancouver	(1-604-666-3691)
Winnipeg	(1-204-983-4020)		

Un service d'appel interurbain sans frais est offert, dans toutes les provinces et dans les territoires, aux utilisateurs qui habitent à l'extérieur des zones de communication locale des centres régionaux de consultation.

Normes de service au public

Afin de maintenir la qualité du service au public, Statistique Canada observe des normes établies en matière de produits et de services statistiques, de diffusion d'information statistique, de services à recouvrement des coûts et de services aux répondants. Pour obtenir une copie de ces normes de service, veuillez communiquer avec le Centre de consultation régional de Statistique Canada le plus près de chez vous.

A NOTE TO OUR SUBSCRIBERS:

Consumer Prices and Price Indexes has changed. In a supplement to the third quarter 1994 publication, we announced the upcoming modifications to the Consumer Price Index (CPI). Beginning with the January 1995 index we:

- introduced the 1992 basket. Consumer spending patterns change over time. Approximately every four years, we update the basket of goods and services to ensure that the CPI does not give undue importance to some items and geographic areas, and too little to others;
- increased the population coverage. The national CPI now targets the total population of Canada. It used to cover the 70% of Canadians who live in cities with populations of 30,000 and over;
- changed the emphasis to provincial from city indexes. The provinces play a major role in setting and regulating prices, and influence prices through taxes, subsidies and legislation. More Canadians are able to use the provincial indexes than were able to use the city indexes. Because we recognized that this change in emphasis would inconvenience some of our users, we continue to produce some city indexes;
- introduced a new classification system that improves the relevance, balance and international comparability of the series.

Consumer Prices and Price Indexes now contains data that reflect these modifications.

We apologize for the publication delay. It took time to make the substantial changes required. We believe, however, that you will be pleased with the result.

If you have any questions or comments, please refer to the inside cover of this publication for contacts.

An important source of information about the CPI and the updating is **The Consumer Price Index Reference Paper, Update based on 1992 expenditures**, catalogue 62-553 occasional. In this paper we answer the questions asked by an audience that ranges from those interested in general information, to those who need technical or theoretical details. The paper presents and explains CPI concepts and how to interpret the index, its scope, data collection and computation procedures, and uses.

UNE NOTE POUR NOS ABONNÉ(E)S:

Prix à la consommation et indices de prix a changé. Dans un supplément inséré dans la publication du troisième trimestre de 1994, nous avons annoncé les modifications prévues à l'indice des prix à la consommation (IPC). Avec l'indice de janvier 1995, nous avons:

- mis de l'avant le panier de 1992. Les habitudes de dépenses des consommateurs évoluent. Approximativement à tous les quatre ans, nous mettons à jour le panier de biens et services afin de s'assurer que l'on n'accorde pas trop d'importance à certains articles et régions géographiques comparativement à d'autres;
- étendu le champ d'observation de la population. L'IPC national cible maintenant la population totale du Canada. Il couvrait auparavant les 70% des Canadiens qui vivent dans les villes ayant une population de 30 000 habitants et plus;
- modifié l'importance mise auparavant sur les indices des villes vers les indices provinciaux. Les provinces jouent un rôle important dans l'établissement et la réglementation des prix et influencent les prix par l'entremise des lois, taxes et subventions. Plus de Canadiens sont en mesure d'utiliser les indices provinciaux que les indices des villes. Puisque nous reconnaissons que ce changement pourrait incommoder certains de nos clients, nous continuons à produire certains indices de villes;
- présenté un nouveau système de classification qui améliore la pertinence, l'équilibre et la comparabilité internationale des séries.

Prix à la consommation et indices de prix contient maintenant des séries qui reflètent ces modifications.

Nous nous excusons pour les délais quant à la disponibilité de cette publication. Les changements substantiels requis ont exigé un certain temps. Nous croyons, cependant, que vous serez satisfait(e) du résultat.

Si vous avez des questions ou des commentaires, veuillez vous référer à l'intérieur de la page couverture pour les contacts.

Une source importante d'information sur l'IPC et sa mise à jour est le **Document de référence de l'indice des prix à la consommation, mise à jour fondé sur les dépenses de 1992**, catalogue 62-553 hors série. Dans ce document, nous répondons aux questions posées par un public incluant aussi bien les utilisateurs qui veulent obtenir de l'information générale que ceux qui s'intéressent davantage aux aspects techniques ou théoriques. Le document présente et explique les concepts de l'IPC ainsi que l'interprétation de l'indice, son champ d'observation, les méthodes de collecte et de traitement des données, ainsi que leur utilisation.

Note of Appreciation

Canada owes the success of its statistical system to a long-standing cooperation involving Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- .. figures not available
- ... figures not appropriate or not applicable
- nil or zero
- amount too small to be expressed
- p preliminary figures
- r revised figures
- x confidential to meet secrecy requirements of the Statistics Act

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres non disponibles
- ... n'ayant pas lieu de figurer
- néant ou zéro
- nombres infimes
- p nombres provisoires
- r nombres rectifiés
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret

NOTE ON CANSIM

Most of the data published in *The Consumer Price Index* (Catalogue 62-001) and *Consumer Prices and Price Indexes* (Catalogue 62-010) is also available in machine readable form through CANSIM (Canadian Socio-Economic Information Management System). In general, CANSIM provides a longer historical series. For further information on CANSIM call (613) 951-8200 or write to Electronic Data Marketing Division, Statistics Canada, R.H. Coats Building, Ottawa, K1A 0T6.

NOTE CONCERNANT CANSIM

La plupart des données publiées dans *L'indice des prix à la consommation* (n° 62-001 au catalogue) et *Prix à la consommation et indices des prix* (n° 62-010 au catalogue) peuvent être obtenues, sous forme lisible par machine, de CANSIM (Système canadien d'information socio-économique). Les séries historiques sont généralement plus longues dans CANSIM. Pour plus d'information sur CANSIM, signaler (613) 951-8200 ou écrire à Division du marketing, Statistique Canada, Immeuble R.H. Coats, Ottawa, K1A 0T6.

Additional Information and Related Publications

Detailed information on the methodology and concepts of the CPI is contained in *The Consumer Price Index Reference Paper, Updating Based on 1992 Expenditures*, (Occasional), Catalogue 62-553. Information regarding the Family Expenditure Surveys is contained in two volumes: *Family Food Expenditure in Canada, 1992*, Catalogue 62-554, and *Family Expenditure in Canada, 1992*, Catalogue 62-555.

Consumer Price Index series for Canada, the provinces, Whitehorse, Yellowknife and sixteen cities, in addition to other related price information are also available in *The Consumer Prices Indexes*, (Monthly), Catalogue 62-001. In addition, selected educational and promotional material is available. For these and further information, contact the Consumer Prices Section, Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6 (613-951-9606).

Renseignements supplémentaires et publications connexes

Les méthodes et les concepts de l'IPC sont décrits en détail dans le *Document de référence de l'indice des prix à la consommation, Mise à jour fondée sur les dépenses de 1992*, (hors série), n° 62-553 au catalogue. Des renseignements au sujet des enquêtes sur les dépenses des familles se retrouvent dans deux volumes distincts: *Dépenses alimentaires des familles au Canada, 1992*, n° 62-554 au catalogue; et *Dépenses des familles au Canada, 1992*, n° 62-555 au catalogue.

Des séries d'indices des prix à la consommation pour le Canada, les provinces, Whitehorse, Yellowknife et seize villes, ainsi que d'autres renseignements sur les prix sont publiés dans *L'indice des prix à la consommation*, (mensuel), n° 62-001 au catalogue. De plus, certains documents éducatifs et publicitaires sont disponibles. Pour plus de renseignements, communiquer avec la Section des prix à la consommation, Division des prix, Statistique Canada, Ottawa (Ontario) K1A 0T6 (613-951-9606).

Highlights

Consumer Price Behavior

First Quarter 1995

Trends in Consumer Prices

According to the Consumer Price Index (CPI), consumers faced a 1.1% rise in prices in the first quarter of 1995 (i.e., between December 1994 and March 1995). This was more than double the 0.5% increases consumers experienced in the third and fourth quarters of 1994. These increases were noticeably larger than those observed in the first half of 1994. Prices fell 0.9% and rose 0.1% in the first and second quarters respectively, largely the result of major reductions in tobacco taxes introduced by the federal government and some of the provinces.

During the first quarter of 1995, the year-over-year changes in the CPI became progressively larger, rising by 0.6% in January, 1.8% in February and 2.2% in March. The sharp rise between January and February was largely associated with the reduction in cigarette taxes in February 1994 which caused the CPI to fall by 0.8% from the previous month. If tobacco products were left out of the CPI basket, consumer prices would have increased by 2.0% in January and February and by 2.3% in March compared to the same month of the previous year.

The seasonally adjusted CPI rose by 0.7% in the first quarter 1995, having advanced by 0.2% in January and in February and 0.3% in March. The latest quarterly rise was slightly higher than the seasonally adjusted increases of 0.5% noted in the third and fourth quarters of 1994.

Major components (not seasonally adjusted)

All of the eight major component indexes of the CPI increased in the first quarter of 1995. The advances varied from a low of 0.1% in the health and personal care index to a high of 2.0% in the food index.

Approximately one-third of the CPI increase in the first quarter 1995 resulted from the 2.0% rise in food prices. A further one-fifth of the explanation came from an increase of 1.2% in transportation charges. Advances in prices associated with recreational activities, education and reading (1.1%), in expenses relating to household operations and furnishings (1.2%), and in shelter charges (0.4%) each contributed, on average, a further ten percent of the overall increase. The remaining indexes added relatively little to the latest rise in the All-items index.

The price of the consumer food basket rose by 2.0% in the first quarter following an increase of 0.7% in the previous quarter. In the latest period, prices of food purchased from grocery stores advanced 2.6% while prices of restaurant meals rose by a more moderate 0.5%. Most of the increase showed up in January when prices of fresh vegetables jumped as a result of reduced seasonal availability, a fall in the Canadian dollar, and unfavourable weather conditions in the southern United States and Mexico. Higher average prices for fresh vegetables, most meat products, soft drinks, bakery items and cereal products were the main contributors to the rise in grocery food prices in the latest quarter.

Faits saillants

Comportement des prix à la consommation

Premier trimestre de 1995

Tendances des prix à la consommation

Selon l'indice des prix à la consommation (IPC), les consommateurs ont fait face à un accroissement des prix de 1,1% au premier trimestre de 1995 (c.-à-d. entre décembre 1994 et mars 1995). C'est plus du double des augmentations de 0,5% qu'ils ont connues aux troisième et quatrième trimestres de 1994. Ces hausses ont été nettement plus fortes que celles observées dans la première moitié de 1994. Les prix ont chuté de 0,9% au premier trimestre et remonté de 0,1% au deuxième. C'est la conséquence surtout des grandes réductions des taxes sur le tabac décrétées par le gouvernement fédéral et certaines provinces.

Au premier trimestre de 1995, les variations d'une année à l'autre de l'IPC se sont progressivement accentuées, avec des hausses de 0,6% en janvier, de 1,8% en février et de 2,2% en mars. L'écart marqué entre janvier et février s'explique dans une large mesure par la réduction des taxes sur les cigarettes en février 1994, qui avait provoqué un repli de 0,8% de l'IPC par rapport au mois précédent. Si les produits du tabac étaient exclus du panier de l'IPC, les prix à la consommation auraient avancé de 2,0% en janvier et en février et de 2,3% en mars comparativement aux mêmes mois de l'année précédente.

L'IPC désaisonnalisé a progressé de 0,7% au premier trimestre de 1995, après des avances de 0,2% en janvier et en février et de 0,3% en mars. Le dernier gain trimestriel a dépassé légèrement les accroissements désaisonnalisés de 0,5% observés aux troisième et quatrième trimestres de 1994.

Principales composantes (avant désaisonnalisation)

Chacun des huit principaux indices de l'IPC a progressé au premier trimestre de 1995. Les avances se sont situées dans une fourchette de 0,1% pour l'indice de la santé et des soins personnels à 2,0% pour l'indice des aliments.

Environ un tiers de la progression de l'IPC au premier trimestre de 1995 est le fait de l'augmentation de 2,0% du prix des aliments. Un cinquième vient d'un accroissement de 1,2% des frais de transport. Les hausses de prix associées aux loisirs, à la formation et à la lecture (1,1%), aux dépenses et à l'équipement de ménage (1,2%) et au logement (0,4%) ont chacune contribué, en moyenne, pour encore un dixième de l'augmentation d'ensemble. Les autres indices ont eu un effet relativement négligeable dans la dernière avance de l'indice d'ensemble.

Le prix du panier des aliments s'est élevé de 2,0% au premier trimestre, après un gain de 0,7% au trimestre précédent. Dans la période la plus récente, le prix des aliments achetés à l'épicerie a subi une hausse de 2,6%, alors que celui des repas pris au restaurant a subi une augmentation plus modeste de 0,5%. Le gros de l'augmentation est apparu en janvier, avec un bond du prix des légumes frais, conséquence d'une baisse de disponibilité saisonnière, de la chute du dollar canadien, et du mauvais temps qui a sévi dans le Sud des États-Unis et au Mexique. Les hausses du prix moyen des légumes frais, de la plupart des viandes, des boissons gazeuses, des articles de boulangerie et des produits céréaliers ont été les principaux facteurs de la montée du prix des aliments achetés à l'épicerie au dernier trimestre.

The 1.2% rise in transportation charges also made a major contribution to the overall rise in the CPI. Higher prices for new model automotive vehicles accompanied by higher prices for gasoline (partly a result of a federal excise tax increase) and advances in auto insurance premiums were the main contributors. At the same time, air fares fell by 7.4% in the quarter with most of this occurring in January.

Charges relating to recreation, education and reading climbed by 1.1% with most of the increase traceable to higher quotations on package-holiday tours, increased hotel/motel rates and higher fees for cablevision services. Newspaper prices also rose in this period.

Within Household Operations and Furnishings, a number of advances were noted, for items like paper products, horticultural products and household textiles.

Shelter costs moved up 0.4% as owned and rented accommodation charges rose by 0.7% and 0.3% respectively. A large part of the increase experienced by homeowners came from advances in mortgage interest costs. Water rates also rose in this period. At the same time, householders benefited from a drop in piped gas rates and fuel oil prices.

Clothing and footwear prices rose an average by 1.2% while those for alcoholic beverages and tobacco increased by 1.1%. In the case of the former, most of the price increases were found in women's coats and jackets and men's suits and shirts. In the latter index, the increase was due mainly to a 2.5% rise in cigarette prices which reflected tax increases affecting Ontario and Quebec.

Goods and services

Prices of goods advanced by 1.4% in the first quarter, making this the highest quarterly rate in over two years. Prices of durables, semi-durables, non-durables rose by 0.8%, 1.5% and 1.7% respectively. The price of services increased by a more moderate 0.6% following advances of 1.0% and 0.5% in the third and fourth quarters of 1994.

Price movements across provinces

In the first quarter 1995, increases in provincial CPI's ranged from 0.5% in Alberta and Saskatchewan to 1.3% in Ontario. Consumers in Whitehorse experienced a 0.5% decline in their overall costs as food, electricity, clothing, footwear, inter-city travel and personal care all fell in price.

International comparisons

In each of the last three years, CPI increases in Canada were considerably lower than those of the United States. In 1994, the difference was quite large with the annual average CPI for Canada edging up by 0.2% while that of the United States increased by 2.6%. The small increase in Canada in 1994 also ranked as the lowest rate of inflation observed among the G-7, the most industrialized countries of the world.

Between March 1994 and March 1995, the CPI increase in Canada (2.2%) was still lower than the 2.5% rise noted in the United States. Among the G-7 countries, Canada's inflation performance fell to third place behind those of Japan (-0.4%) and France (1.8%).

La progression de 1,2% des frais de transport a aussi été un important facteur de l'avance globale de l'IPC. Elle vient surtout de l'augmentation du prix des véhicules automobiles neufs et du prix de l'essence (en partie à cause d'une majoration de la taxe d'accise fédérale) ainsi que des primes d'assurance automobile. En même temps, les tarifs aériens ont reculé de 7,4% pendant le trimestre, surtout en janvier.

Les frais liés aux loisirs, à la formation et à la lecture ont monté de 1,1%, la majeure partie de l'augmentation étant imputable à l'augmentation des prix cités pour les forfaits vacances, à la hausse des tarifs d'hébergement à l'hôtel ou au motel et à l'accroissement des frais pour les services de câblodistribution. Le prix des journaux a aussi fait un gain pendant cette période.

Dans les dépenses et l'équipement de ménage, plusieurs avances ont été observées, pour des articles comme les articles en papier, les produits horticoles, et les articles ménagers en matière textile.

Les coûts du logement ont monté de 0,4%, les frais du logement en location et en propriété ayant avancé de 0,7% et 0,3% respectivement. Une bonne part de l'augmentation qu'ont absorbée les propriétaires est venue d'avances des coûts d'intérêt hypothécaire. Les frais d'utilisation de l'eau ont aussi augmenté dans cette période. En même temps, les ménages ont profité d'un repli des tarifs de gaz et du prix du mazout.

Le prix des vêtements et des chaussures a progressé de 1,2% en moyenne, pendant que celui des boissons alcoolisées et du tabac avançait de 1,1%. Dans le premier cas, le gros des augmentations de prix a touché les manteaux et vestes pour femmes et les complets et les chemises pour hommes. Dans le deuxième cas, la hausse est venue surtout d'une avance de 2,5% du prix des cigarettes, conséquence des hausses de taxes en Ontario et au Québec.

Biens et services

Au premier trimestre, le prix des biens a avancé de 1,4%, soit le plus haut taux trimestriel en plus de deux ans. Le prix des biens durables, des biens semi-durables, et des biens non-durables a monté de 0,8%, 1,5% et 1,7% respectivement. Le prix des services a connu une progression plus modérée de 0,6% après des avances de 1,0% et 0,5% aux troisième et quatrième trimestres de 1994.

Mouvements de prix dans les provinces

Au premier trimestre de 1995, les augmentations des IPC provinciaux se sont trouvées dans une fourchette de 0,5% pour l'Alberta et la Saskatchewan à 1,3% pour l'Ontario. Les consommateurs de Whitehorse ont profité d'un repli de 0,5% de leurs coûts d'ensemble, à la faveur d'une chute du prix des aliments, de l'électricité, des vêtements, des voyages interurbains et des soins personnels.

Comparaisons internationales

Dans chacune des trois dernières années, les augmentations de l'IPC ont été beaucoup plus faibles au Canada qu'aux États-Unis. En 1994, la différence a été très marquée, la moyenne annuelle de l'IPC ayant avancé de 0,2% au Canada contre 2,6% aux États-Unis. La faible hausse au Canada en 1994 a aussi été le plus faible taux d'inflation observé dans le G-7, qui est formé des pays les plus industrialisés du monde.

Entre mars 1994 et mars 1995, l'augmentation de l'IPC au Canada (2,2%) restait plus faible que celle de 2,5% observée aux États-Unis. Parmi les pays du G-7, le Canada s'est classé troisième pour son taux d'inflation, venant après le Japon (-0,4%) et la France (1,8%).

6	Ground beef, regular – Boeuf haché, régulier	1 kg	3.73	3.80	3.76
7	Pork chops – Côtelettes de porc	1 kg	8.36	8.56	8.53
8	Butt roast – Rôti de soc	1 kg	4.90	5.01	4.84
9	Chicken – Poulet	1 kg	3.72	3.66	3.62
10	Bacon	500 g	3.00	2.91	2.78
11	Wieners – Saucisses fumées	450 g	2.62	2.50	2.52
12	Canned sockeye salmon – Saumon sockeye, en conserve	213 g	3.64	3.69	3.66
13	Homogenized milk – Lait homogénéisé	1 l	1.34	1.33	1.33
14	Partly skimmed milk – Lait partiellement écrémé	1 l	1.30	1.29	1.28
15	Butter – Beurre	454 g	2.83	2.82	2.83
16	Processed cheese food slices – Préparation de fromage fondu, en tranches	250 g	2.49	2.51	2.54
17	Evaporated milk – Lait évaporé	385 ml	0.99	1.01	1.02
18	Eggs – Oeufs	1 dz	1.56	1.55	1.57
19	Bread – Pain	675 g	1.27	1.27	1.24
20	Soda crackers – Biscuits soda	450 g	1.87	1.97	1.93
21	Macaroni	500 g	0.96	0.97	1.00
22	Flour – Farine	2.5 kg	3.27	3.24	3.26
23	Corn flakes – Flocons de maïs	675 g	3.03	3.09	3.01
24	Apples – Pommes	1 kg	2.08	2.11	2.21
25	Bananas – Bananes	1 kg	1.37	1.27	1.38
26	Grapefruits – Pamplemousses	1 kg	1.31	1.31	1.38
27	Oranges	1 kg	1.55	1.52	1.44
28	Apple juice, canned – Jus de pommes, en conserve	1.36 l	1.41	1.43	1.41
29	Orange juice, tetra-brick – Jus d'orange, tetra-brick	1 l	1.63	1.66	1.65
30	Cabbage – Choux	1 kg	0.84	0.91	0.97
31	Carrots – Carottes	1 kg	1.18	1.38	1.45
32	Celery – Céleri	1 kg	2.63	2.05	2.42
33	Mushrooms – Champignons	1 kg	5.62	5.84	5.91
34	Onions – Oignons	1 kg	1.04	1.13	1.22
35	Potatoes – Pommes de terre	4.54 kg	2.70	2.84	2.85
36	French fried potatoes, frozen – Pommes de terre frites, congelées	1 kg	1.71	1.66	1.67
37	Baked beans, canned – Fèves au lard en conserve	398 ml	0.80	0.82	0.81
38	Tomatoes, canned – Tomates, en conserve	796 ml	1.26	1.26	1.26
39	Tomato juice, canned – Jus de tomate en conserve	1.36 l	1.45	1.43	1.41
40	Ketchup	1 l	2.41	2.30	2.31
41	Sugar, white – Sucre blanc	2 kg	1.95	1.95	1.93
42	Coffee, roasted – Café torréfié	300 g	4.22	4.15	4.04
43	Coffee, instant – Café instantané	200 g	7.02	7.01	6.91
44	Tea (bags) – Thé (sachets)	72	2.64	2.66	2.63
45	Cooking or salad oil – Huile à frire ou à salade	1 l	2.97	2.97	2.92
46	Soup, canned – Soupe, en conserve	284 ml	0.72	0.72	0.72
47	Baby food – Nourriture pour bébés	128 ml	0.53	0.53	0.53
48	Peanut butter – Beurre d'arachide	500 g	2.65	2.65	2.63
49	Fruit flavoured crystals – Cristaux à saveur de fruit	2.25 l	1.29	1.30	1.25
50	Soft drinks, cola type – Boissons gazeuses, cola	2 l	1.39	1.41	1.32
51	Soft drinks, lemon type – Boissons gazeuses, citron-lime	2 l	1.50	1.50	1.49
52	Laundry detergent – Détergent synthétique, en poudre	4 l	6.11	6.09	6.09
53	Paper towels (rolls) – Essuie-tout en papier (rouleaux)	2	1.23	1.23	1.22
54	Facial tissue – Papier-mouchoirs	200	1.21	1.20	1.22
55	Bathroom tissue (rolls) – Papier hygiénique (rouleaux)	4	1.77	1.69	1.69
56	Shampoo – Shampooing	300 ml	3.05	3.07	3.00
57	Deodorant – Désodorisant	60 g	2.93	2.89	2.86
58	Tooth paste – Pâte dentrice	100 ml	1.34	1.34	1.34
59	Cigarettes	200	30.22	30.17	30.81

Appendix 1

THE CONSUMER PRICE INDEX TECHNICAL NOTES

Definition

The Consumer Price Index (CPI) is an indicator of the changes in consumer prices experienced by the target population. The CPI measures price change by comparing, through time, the cost of a fixed basket of commodities. This basket is based on the expenditures of the target population in a certain reference period, currently 1992. Since the basket contains commodities of unchanging or equivalent quantity and quality, the index reflects only pure price movements.

Separate CPI's are published for Canada, the ten provinces, Whitehorse and Yellowknife. Some CPI information is also available for an additional sixteen cities. Since the CPI is a measure of price change from one time period to another, it cannot be used to indicate differences in price levels between provinces or cities.

Population Coverage

The population targeted by the Consumer Price Index consists of families and individuals living in urban and rural private households. For practical reasons, residents of the Territories outside Whitehorse and Yellowknife are not represented by the index. Previous to January 1995, the target population consisted of private households in Canadian urban centres with a population of 30,000 or more.

Time Reference

The CPI compares, in percentage terms, prices in any given time period to prices in the official base period which, at present, is 1986=100. The official time base was changed from 1981=100 to 1986=100 starting with the CPI for June 1990. The change is strictly an arithmetic conversion which alters the index levels but leaves the percentage changes between any two periods intact, except for differences in rounding.

Percent Versus Index Point Changes

The movements of the indexes from one month to another are expressed as percent changes rather than changes in index points. Index point changes are affected by the level of the index which, in turn, depends on the time base of the particular index. The percentage change between any two time periods can be readily calculated by dividing the index point difference between the two time periods by the index for the earlier period and multiplying the result by one hundred.

Price Coverage

The prices used in the CPI calculation are final prices, inclusive of excise and other indirect taxes paid by consumers. In particular, they include the Goods and Services Tax as well as provincial retail sales taxes wherever applicable. It follows that the CPI can change as a result of modifications to any of these taxes.

The selection of commodities and the outlets from which prices are collected is judgmental, other than for rents. The number of prices required for a given commodity depends on the importance and the nature of the commodity. The samples are

Appendice 1

L'INDICE DES PRIX À LA CONSOMMATION NOTES TECHNIQUES

Définition

L'indice des prix à la consommation (IPC) est un indicateur des variations des prix à la consommation payés par la population cible. L'IPC mesure la variation des prix en comparant, dans le temps, le coût d'un panier fixe de biens et de services. Ce panier est basé sur les dépenses de la population cible au cours d'une période de référence qui est actuellement 1992. Comme ce panier comprend des biens et des services dont la quantité et la qualité ne changent pas ou sont équivalentes, l'indice ne retrace que les mouvements de prix purs.

On publie des IPC distincts pour le Canada, les provinces, Whitehorse et Yellowknife. Certains renseignements sont aussi publiés pour seize autres villes. Comme l'IPC est une mesure de la variation de prix entre deux périodes, il ne peut servir à relever les différences de niveau des prix entre les provinces ou les villes.

Champ d'observation de la population

La population couverte par l'indice des prix à la consommation comprend les familles et les personnes vivant dans des ménages privés urbains et ruraux. Pour des raisons pratiques, les résidents des Territoires à l'extérieur de Whitehorse et de Yellowknife ne sont pas représentés. Avant janvier 1995, la population cible comprenait les ménages privés vivant dans les centres urbains du Canada dont la population était de 30 000 habitants ou plus.

Période de base

L'IPC compare, en pourcentage, les prix au cours d'une période donnée à ceux de la période de base officielle, qui est actuellement 1986 = 100. On a changé la période de base de 1981 = 100 à 1986 = 100 à compter de l'IPC du mois de juin 1990. Ce changement est uniquement une conversion arithmétique qui modifie le niveau des indices, mais laisse les variations en pourcentage entre deux périodes intactes, à l'exception des différences dues à l'arrondissement.

Changements en pourcentage versus changements en points d'indice

Les fluctuations des indices d'un mois à l'autre sont exprimées en pourcentage, plutôt qu'en point d'indice. Les variations en point d'indice sont en fonction du niveau de l'indice qui, à son tour, dépend de la période de base de l'indice en question. Par contre, il est facile de calculer la variation en pourcentage entre deux périodes en divisant la différence en point d'indice entre ces deux périodes par l'indice de la période antérieure, et en multipliant ensuite ce résultat par cent.

Champ d'observation des prix

Les prix qui entrent dans le calcul de l'IPC sont les prix finals, ce qui comprend les taxes d'accise et les autres impôts indirects que les consommateurs paient. En particulier, les prix comprennent la taxe sur les produits et les services, ainsi que les taxes de vente au détail provinciales, au besoin. L'IPC peut donc varier à cause des modifications apportées à ces taxes.

La sélection des biens et des services, ainsi que des points de vente où l'on recueille les prix, se fait au jugé, à l'exception des loyers. Le nombre de prix nécessaires pour un bien ou service donné dépend de l'importance et de la nature de celui-ci. L'échantillon est conçu de façon

designed to represent volume selling commodities and outlets. The principal objective of the sample design is to ensure an informative, reliable and impartial picture of consumer inflation at the national and provincial levels.

Price collection for a given month's index is carried out during the first three weeks of the month. Although prices for most CPI commodities are collected monthly, prices for commodities having less frequent price changes (e.g. property taxes and electricity rates) are collected at intervals longer than one month. Special pricings are carried out where there is evidence that significant price changes have occurred between scheduled pricing periods.

Weights and Linking

The CPI maintains fixed quantitative proportions (weights) between commodities during the life of a given basket. The baskets are updated periodically to take into account changes in consumer expenditure patterns. In January 1995, the basket reflecting the 1992 expenditure patterns replaced the 1986 basket. The continuity of the CPI series is maintained by "linking" the corresponding indexes obtained from consecutive baskets.

The CPI is calculated as a weighted average of specified commodity price indexes. The weights are derived from Family Expenditure Survey data. Text Table 1 compares the expenditure shares of the two most recent CPI baskets, i.e. those of 1992 and 1986. Because both sets of weights are expressed in December 1994 or "link month" prices, the differences reflect the shifts in the relative quantities purchased between the two baskets. The differences are a result of changes in consumer expenditure patterns over time and of the expansion of the population coverage.

When reconstructing or re-aggregating published CPI series, the changes in weights and the linking procedures must be taken into account. For a description of the methodology required to reconstruct or re-aggregate CPI series, see the Consumer Price Index Reference Paper cat. 62-553 Occasional or contact Prices Division.

à représenter les produits et services ainsi que les établissements à fort volume de ventes. Le principal objectif du plan de sondage est d'obtenir une image précise, fiable et impartiale de l'inflation représentée par les prix à la consommation au niveau national et provincial.

La collecte des prix pour l'indice d'un mois donné se fait pendant les trois premières semaines du mois. Bien que les prix de la plupart des biens et services entrant dans l'IPC soient recueillis chaque mois, les prix des biens ou des services ayant des variations de prix moins fréquentes (impôts fonciers, tarifs de l'électricité, par exemple) sont recueillis à des intervalles dépassant un mois. Des relevés spéciaux de prix sont faits lorsqu'il est évident que des variations de prix appréciables se sont produites entre les périodes de relevé de prix régulières.

Pondération et enchaînement

L'IPC maintient des proportions quantitatives fixes (pondérations) entre les biens et les services pendant la durée de vie d'un panier. Le panier est habituellement mis à jour régulièrement afin de prendre en compte les changements dans la composition des dépenses des consommateurs. En janvier 1995, le panier qui retrace la composition des dépenses de 1992 a remplacé le panier de 1986. La continuité des séries de l'IPC est assurée par un « enchaînement » des indices correspondants provenant de paniers consécutifs.

On calcule l'IPC comme une moyenne pondérée d'indices de prix de biens ou de services précis. Les pondérations sont tirées des données de l'Enquête sur les dépenses des familles. Le tableau explicatif 1 compare les parts des dépenses des deux paniers les plus récents, ceux de 1992 et de 1986. Comme les deux ensembles de pondérations sont exprimés en prix de décembre 1994, qui est le « mois d'enchaînement », les différences reflètent les mouvements des quantités relatives achetées entre les deux paniers. Les différences s'expliquent par les variations de la composition des dépenses des consommateurs dans le temps et par l'extension du champ d'observation de la population.

Quand on reconstruit ou ré-agrège les séries publiées de l'IPC, il faut prendre en compte les changements de pondérations et les procédures d'enchaînement. Pour une description de la méthodologie à utiliser dans la reconstruction des séries de l'IPC ré-agrégées, consulter le document de référence sur l'indice des prix à la consommation portant le numéro de catalogue 62-553 (Hors série), ou s'adresser à la Division des prix.

¹ The 1986 data were adjusted to be comparable with the classification system used for the 1992 basket.

¹ Les données de 1986 ont été modifiées de façon à correspondre au système de classification utilisé pour le panier de 1992

Whitehorse and Yellowknife Indexes

The relatively small size of the housing market in these two cities makes it difficult to construct reliable price indexes for new houses. To compensate, the price movements of rental accommodation are used to approximate the price movements of new houses. The rent information itself is collected using different pricing frequencies and collection methods than in the rest of the country. Because of these problems, the indexes for Rented Accommodation, Owned Accommodation and Shelter are not published for these two cities. Further, the All-items indexes published for these two cities are not strictly comparable with the same indexes for the provinces or the other sixteen urban centres.

Calculation of City Indexes

With the introduction of the 1992 basket, emphasis was shifted from city data to provincial data. City All-items series were continued since many users had come to rely on this service, but the method of calculation was changed. Shelter indexes are calculated for each city. This recognizes the importance of Shelter in the basket, the significant and persistent differences in price movements between cities, and the availability of local data. For the other seven major components, the movement of the provincial counterpart (or, in the cases of Montréal, Toronto, and Vancouver, a sub-provincial counterpart) is used. The major components are aggregated using the city's expenditure pattern to arrive at each city's All-items index.

Seasonal Adjustment

Seasonal adjustment is performed within each basket at the level of the eight major components. The seasonally adjusted All-items series is a weighted average of the eight seasonally adjusted major components. It was linked in December 1994 with the seasonally adjusted series calculated before then to form a continuous series starting in September 1978. Each month's data is fixed until the end of the year when the series is revised. Because the revision can lead to changes in both the levels and movements of the indexes, users employing the CPI for indexation purposes are advised to use the unadjusted indexes.

The Purchasing Power of the Consumer Dollar

As prices rise, a dollar will buy fewer goods and services. Because the CPI measures changes in the general price level, it is often used to estimate changes in the purchasing power of the Canadian dollar. For example, between 1986 and 1994, the All-items Canada CPI rose from 100.0 to 130.7, indicating that consumers had to pay 30.7% more to buy the same quantity of goods and services. Looked at in terms of purchasing power, a dollar in 1994 would purchase the same amount as $76.5¢ \{ (100.0 / 130.7) * 100 \}$ did in 1986. This process may be interpreted as the deflation of money or the adjustment of money values to eliminate price effects.

Indices de Whitehorse et de Yellowknife

La taille relativement faible du marché de l'habitation de ces deux villes rend difficile la construction d'indices de prix fiables pour les maisons neuves. Pour corriger cette situation, on se sert du mouvement des prix du logement en location pour obtenir une approximation de celui des maisons neuves. Les renseignements sur les loyers proprement dits sont obtenus à des fréquences de relevé des prix et selon des méthodes de collecte qui diffèrent de celles utilisées ailleurs dans le pays. En raison de ces problèmes, les indices du logement en location, du logement en propriété et du logement ne sont pas publiés pour ces deux villes. Enfin, les indices d'ensemble publiés pour ces deux villes ne sont pas strictement comparables aux mêmes indices pour les provinces ou les seize autres centres urbains.

Calcul des indices des villes

Avec la venue du panier de 1992, l'accent est passé des données des villes aux données des provinces. Les séries des indices d'ensemble pour les villes ont été conservées parce que de nombreux utilisateurs se sont habitués à ce service, mais la méthode de calcul a changé. Les indices du logement sont calculés pour chaque ville. Ainsi, on prend en compte l'importance du logement dans le panier, les différences appréciables et persistantes dans les mouvements des prix entre villes et la disponibilité de données locales. Pour les sept autres composantes principales, on utilise le mouvement de l'indice provincial (pour Montréal, Toronto et Vancouver, un indice infra-provincial). Les composantes principales sont agrégées à partir de la composition des dépenses de la ville pour donner, en fin de compte, l'indice d'ensemble de cette dernière.

Désaisonnalisation

On effectue la désaisonnalisation pour chaque panier au niveau des huit composantes principales. La série désaisonnalisée de l'indice d'ensemble est une moyenne pondérée des huit composantes principales désaisonnalisées. Elle a été enchaînée en décembre 1994 à la série désaisonnalisée calculée auparavant pour donner une série continue qui commence en septembre 1978. Les données de chaque mois sont inchangées jusqu'à la fin de l'année, lorsque la série fait l'objet d'une révision. Comme cette dernière peut entraîner des changements dans les niveaux et dans les mouvements des indices, il est recommandé aux utilisateurs qui se servent de l'IPC à des fins d'indexation de prendre les indices bruts.

Le pouvoir d'achat du dollar à la consommation

Lorsque les prix montent, le dollar achète moins de biens et de services. Parce qu'il mesure les variations du niveau général des prix, l'IPC sert souvent à estimer les variations du pouvoir d'achat du dollar canadien. Ainsi, entre 1986 et 1994, l'IPC d'ensemble pour le Canada est passé de 100,0 à 130,7 : les consommateurs ont donc dû déboursier 30,7% de plus pour acheter la même quantité de biens et de services. Pour ce qui est du pouvoir d'achat, le dollar de 1994 achèterait le même quantité de biens et de services que $76,5 \text{ cents} \{ (100,0 / 130,7) * 100 \text{ cents} \}$ en 1986. Ce processus peut s'interpréter comme la déflation de l'argent ou l'ajustement des valeurs monétaires, pour la correction des effets de prix.

Appendix 2

Average retail prices

Average retail prices for food, household supplies, personal care items and cigarettes

Table 5 shows, for each month of the quarter, average prices for selected food, household supply and personal care items and for cigarettes.

Prices for these items are collected as part of the regular monthly CPI survey. Prices for the selected food, household supply and personal care items are observed in food supermarkets, while prices for cigarettes are collected in supermarkets, department stores, drug stores and tobacco shops. Average prices for each commodity are calculated as a weighted average of the average prices in the observed cities using the population of these cities as weights.

The commodities which are priced can vary in quality between outlets or between cities. This is the reason why average prices are not published for each of those cities. Brands and outlets can also vary from month to month. Therefore, average prices may not necessarily be fully comparable from one month to another and should not be used as an appropriate measure of pure price change through time. A matched commodity and outlet sample is used for the CPI to determine the pure price movement of commodities through time.

Appendice 2

Prix de détail moyens

Prix de détail moyens pour les aliments, les produits d'entretien ménager, les produits de soins personnels et les cigarettes

Le tableau 5 présente, pour chaque mois du trimestre, des prix moyens pour certains produits alimentaires, ménagers et de soins personnels ainsi que pour les cigarettes.

Les données sur les prix utilisées dans le calcul sont celles qui ont été recueillies dans le cadre de l'enquête mensuelle régulière de l'IPC. Les prix des aliments et des produits d'entretien ménager et de soins personnels ont été relevés dans des supermarchés alimentaires, alors que les prix des cigarettes ont été observés dans des supermarchés, dans des magasins à rayons, dans des pharmacies et dans des débits de tabac. Les prix moyens pour chaque produit sont obtenus en effectuant une moyenne pondérée des prix moyens de chaque ville observée en utilisant la population de ces villes comme pondération.

Les produits dont on relève les prix peuvent varier en qualité d'un point et de vente ou d'une ville à l'autre. C'est la raison pour laquelle les prix moyens ne sont pas publiés pour chacune des villes. Les marques sélectionnées ainsi que les points de vente peuvent aussi varier d'un mois à l'autre. Les prix moyens ne sont donc pas nécessairement entièrement comparables d'un mois à l'autre et ne devraient pas être considérés comme une mesure appropriée des mouvements de prix purs à travers le temps. L'IPC utilise un échantillon apparié de produits et de points de vente pour calculer le mouvement de prix pur des produits dans le temps.

Appendix 3

INTERNATIONAL RETAIL PRICE COMPARISONS

Those concerned with a need for some comparative measure of the retail prices that a Canadian-based employee may encounter while serving outside Canada, will be interested to know that the Government Allowance Indexes Section, Statistics Canada, produces indexes relating retail prices in foreign countries to those prevailing in Ottawa. The "post indexes" as they are called have been developed primarily to regulate the allowance levels of expatriate Canadian Government civilian and military personnel and because of this, they are very specialized in purpose, and specific to the use for which they were designed. Nonetheless, organizations faced with compensating employees for foreign retail price conditions might well find them to be a useful building-block on which to develop and administer a viable foreign service allowance system.

A post index is, at any given point in time, the expression of the current spatial (or place-to-place) retail price relationship of a range of goods and services at a foreign location, with those prices prevailing in Ottawa, rounded to the nearest five points. Ottawa price levels are always expressed as 100. Thus, a post index of 110 for example, means that prices at the foreign location are estimated to be 10% above those in Ottawa, and specifically, that they have been calculated to fall within the index range 107.5 to 112.4, i.e., 7.5% to 12.4% above Ottawa. For reasons discussed later, the highest degree of accuracy claimed for post indexes, is inherent in their being rounded as described.

The post index encompasses price comparisons for such family expenditure categories as food consumed in the home, meals taken in restaurants, household maintenance, household supplies, communications, domestic help, clothing, transportation, health and personal care, reading and recreation, the prices of some 230 items being considered, as indicated in the table hereunder. Several important elements of expenditure are excluded. Since Canadian public servants pay Canadian income taxes regardless of their place of duty, income tax differentials are not considered. Shelter and fuel and utilities expenditures are excluded from the comparison because the federal government compensates for excess costs of these items by means of benefits separate from those regulated by statistical means. Finally, government employees serving abroad may be entitled to purchase liquor, cigarettes, gasoline, etc., at tax-free prices or they may have access to special purchasing facilities not available to the public at large. To the extent that these conditions prevail, they are reflected in post index calculations.

Accordingly, post indexes should not be automatically applied to general uses without regard to their possible limitations. Potential users of these indexes are advised to discuss the specifics of their needs with the Government Allowance Indexes Section, and they may also wish to familiarize themselves with the total foreign service benefit package provided by the Federal Government, details of which may be obtained from the Personnel Policy Branch, Treasury Board, Government of Canada.

Appendice 3

COMPARAISONS INTERNATIONALES DES PRIX DE DÉTAIL

Les personnes qui sont conscientes du besoin d'une mesure comparative des prix de détail auxquels peut faire face un employé canadien en poste à l'étranger seront intéressées d'apprendre que la Section des indices des indemnités de l'état de Statistique Canada produit des indices qui établissent le rapport entre les prix de détail dans les pays étrangers et ceux d'Ottawa. Les "indices de poste" ont été créés à l'origine afin de fixer le niveau des indemnités aux fonctionnaires et aux militaires canadiens postés à l'étranger; en conséquence, ils ont un but très spécialisé et ne s'appliquent qu'à l'utilisation pour laquelle ils ont été créés. Toutefois, les organismes qui doivent verser des indemnités à des employés en vertu des prix de détail à l'étranger pourraient trouver les indices comme une base utile pour élaborer et administrer un système viable d'indemnités pour service à l'étranger.

Un indice de poste est, à une période donnée, l'expression de la relation spatiale actuelle (ou d'un endroit à un autre) entre le prix de détail d'une variété de biens et services à un endroit à l'étranger et les prix à Ottawa, arrondis au plus proche multiple de cinq. Le niveau des prix à Ottawa est toujours 100. Ainsi, un indice de poste de 110 signifie que l'on évalue les prix à un endroit situé à l'étranger à 10% au-dessus de ceux d'Ottawa et plus précisément que l'on a calculé qu'ils tombaient dans la classe d'indice 107.5 à 112.4; c'est donc dire qu'ils sont de 7.5% à 12.4% supérieurs à ceux d'Ottawa. Pour les raisons ci-après, le plus haut degré de précision dont on puisse se prévaloir pour les indices de poste est fonction de ce qu'ils ont été arrondis comme il est dit ci-dessus.

L'indice de poste renferme des comparaisons de prix pour les catégories de dépenses des familles comme les aliments consommés à la maison, les repas pris au restaurant, l'entretien du ménage, les fournitures ménagères, les communications, le personnel domestique, les vêtements, le transport, les soins personnels et de santé, la lecture et les loisirs; on compare les prix de 230 articles environ, tels que présentés ci-dessous. Plusieurs éléments importants de dépenses sont exclus. Les fonctionnaires canadiens paient leur impôt sur le revenu au Canada, quel que soit le lieu de leur travail; les différences concernant l'impôt sur le revenu ne sont donc pas prises en considération. Les dépenses de logement, de chauffage et de services ne font pas partie de la comparaison parce que l'administration publique fédérale compense les dépenses excessives à cet égard à l'aide de prestations déterminées par des moyens autres que statistiques. Enfin, les fonctionnaires en poste à l'étranger ont parfois le droit d'acheter en franchise des boissons alcooliques, des cigarettes, de l'essence, etc., ou ils ont accès à des magasins spéciaux fermés au grand public. Ces conditions réapparaissent plus ou moins fortement lors du calcul des indices de poste.

Les indices de poste ne doivent donc pas être généralisés automatiquement sans tenir compte de leurs limites éventuelles. Nous conseillons à tous ceux qui utiliseraient cet indice de discuter leurs besoins spécifiques avec la section des indices des indemnités de l'état; ceux-ci peuvent également désirer se familiariser avec l'ensemble complet des bénéfices accordés par le gouvernement fédéral pour le service à l'étranger; ils pourront obtenir cette information en s'adressant à la Direction de la politique du personnel, Conseil du Trésor, gouvernement du Canada.

The primary sources of data used in post index construction are periodic retail price and living cost surveys conducted at foreign locations by the foreign service personnel stationed there. The survey data is analyzed by Statistics Canada. In addition to a variety of price information gathered from retail outlets patronized by Canadian personnel at the post, data are also obtained regarding their spending patterns, along with information on the availability of any special local purchasing facilities, and the extent to which staffs make direct importation of consumer goods from other countries.

The general aim is for full-scale surveys to be carried out at about three-year intervals. However, specific studies may be undertaken more or less frequently than this, depending on the volatility of retail price conditions in each particular country, the instability of exchange rates and the extent to which close monitoring of changes in the local retail price situation being faced by Canadian personnel can be achieved through reference to other statistical indicators.

Once established, every post index is subjected to a monthly review, the object being to assess its continuing validity in the light of exchange rate movements, as well as on the basis of price and other economic intelligence obtained from various sources. Statistics Canada is in monthly receipt of an extensive range of price data from foreign governments, international agencies, and world-wide commercial enterprises. The purpose of the data collection is to assess and apply the most accurate possible measurement of price movements at each foreign post since the time of the last survey. In parallel, Ottawa price movements for the same period are also taken into account. Furthermore, since post indexes relate to personnel whose emoluments are expressed in Canadian dollars, shifts in the Canada foreign country currency exchange rate are an integral part, and in some cases the major element, in the review. If the comparative retail price relationship expressed by an existing post index should appear to have changed by five index points, a new post index level may be brought into effect without necessarily undertaking another complete survey.

In developing any place-to-place statistics of retail price differentials, very difficult problems arise from geographic variations in consumers' buying habits and differences in the quality and availability of goods and services. These problems are magnified in international comparisons. By and large, however, conventions and techniques have been developed which attempt to overcome these problems in the context of the specific uses that these indexes are meant to serve. As measures designed to meet a particular administrative need, post indexes achieve their goal if they fairly reflect, in a general way, the price differentials between locations being encountered by those to whom they are applicable.

Table 14 shows a selection of the approximately 250 post indexes currently being maintained, the effective date of their validity for government allowance purposes, and the exchange rates upon which they are predicated.

Readers should bear in mind that these indexes are shown as examples only, and that any one of them may have changed by the time it could be published.

Les principales sources de données qui servent à la création de l'indice de poste sont des enquêtes périodiques sur les prix de détail et le coût de la vie menées dans les divers postes par le personnel du service extérieur. Les résultats de ces enquêtes sont analysés et compilés par Statistics Canada. Non seulement on recueille divers renseignements sur les prix auprès des points de vente au détail où le personnel canadien en poste à l'étranger s'approvisionne, mais encore on se procure des données sur les habitudes de dépenses, des renseignements relatifs à l'existence de points d'achat spéciaux sur place et au volume des importations directes de biens à la consommation effectuées par le personnel dans d'autres pays.

On se propose généralement de mener une enquête exhaustive une fois tous les trois ans environ. Toutefois des études spécifiques peuvent être menées à intervalles plus ou moins rapprochés en fonction, du degré d'instabilité des conditions des prix de détail dans chaque pays et des taux de change compte tenu de ce qu'une surveillance étroite des changements de la situation locale des prix de détail peut être exercée au moyen d'autres indicateurs statistiques.

Une fois établi, chaque indice de poste est révisé tous les mois afin de s'assurer qu'il est encore valable compte tenu des variations des cours de change, des prix et d'autres renseignements d'ordre économique obtenus de diverses sources. Statistique Canada reçoit chaque mois une grande variété de données sur les prix provenant des gouvernements étrangers, des organismes internationaux et des entreprises commerciales du monde entier. La collecte de ces données doit permettre de calculer avec le plus de précision possible l'évolution des prix à chaque poste étranger depuis la dernière enquête. Parallèlement, on tient compte de l'évolution des prix à Ottawa pour la même période. De plus, comme les indices de poste concernent un personnel dont le traitement est exprimé en dollars canadiens, les variations du cours du change canadien dans le pays étranger en question font partie intégrante de la révision et en sont, dans certains cas, l'élément le plus important. Lorsqu'il apparaît que la relation comparative des prix de détail, exprimée par l'indice actuel du poste a changé de cinq points d'indice, un nouvel indice de poste peut être adopté sans que l'on décide nécessairement de mener une nouvelle enquête complète.

Lors de l'élaboration de statistiques comparatives des prix de détail en divers endroits, des problèmes très difficiles surgissent en raison des variations géographiques dans les habitudes d'achat à la consommation et dans les différences de qualité et de disponibilité des biens et services. Les problèmes se compliquent encore lorsqu'il s'agit de comparaisons internationales. Dans une très large mesure cependant, des conventions et des techniques ont été mises au point en vue de résoudre ces problèmes dans le contexte même de l'usage spécifique auquel ces indices sont destinés. En tant que mesures destinées à satisfaire un besoin administratif particulier, les indices de poste joueront leur rôle s'ils rendent généralement bien compte des différences de prix entre différents endroits auxquelles font face des personnes à qui ces indices s'appliquent.

Le tableau 14 présente une sélection des quelques 250 indices de poste, leur date d'entrée en vigueur dans le cadre du programme des indemnités de l'état, et les taux de change sur lesquels ils ont été établis.

Le lecteur devra noter que ces indices ne sont fournis qu'à titre d'exemple seulement, et que chacun d'entre eux a pu changer au temps où on a pu le publier.

Further information regarding post indexes is available on request from the Government Allowance Indexes Section, Prices Division, Statistics Canada, telephone: (613) 951-9598.

On peut obtenir d'autres renseignements au sujet des indices de poste en s'adressant à la section des indices des indemnités de l'état, division des prix, Statistique Canada, téléphone: (613) 951-9598.

Principal commodity group	Number of items priced (if available)

Hire our team of researchers for \$56 a year

Notre équipe de chercheurs est à votre service pour 56 \$ par année

Subscribing to *Perspectives on Labour and Income* is like having a complete research department at your disposal. Solid facts. Unbiased analysis. Reliable statistics.

But *Perspectives* is more than just facts and figures. It offers authoritative insights into complex labour and income issues, analyzing the statistics to bring you simple, clear summaries of labour market and income trends.

Our team of experts brings you the latest labour and income data. Each quarterly issue provides:

- topical articles on current labour and income trends
- more than 50 key labour and income indicators
- a review of ongoing research
- information on new surveys

As a special bonus, twice a year you will also receive *The Labour Market Review*, giving you timely analysis on labour market performance over the previous six months or year.

And all for only \$56!

Thousands of Canadian professionals turn to *Perspectives* to discover emerging trends in labour and income and to stay up to date on the latest research findings. As a subscriber, you will get the inside story.

We know you'll find *Perspectives* indispensable. GUARANTEED. If you aren't convinced after reading the first issue, we'll give you a FULL REFUND on all outstanding issues. Order your subscription to *Perspectives* today (Cat. No. 75-0010XPE).

ORDER NOW!

For only \$56 (plus \$3.92 GST) you will receive the latest labour and income research (4 issues per year). Subscription rates are US\$68 for U.S. customers and US\$80 for customers in other countries. Fax your VISA or MasterCard order to: (613) 951-1584. Call toll free: 1-800-267-6677. Or mail to: Statistics Canada, Marketing Division, Sales and Service, 120 Parkdale Ave., Ottawa, Ontario K1A 0T6. Or contact your nearest Statistics Canada Reference Centre listed in this publication.

S'abonner à *L'emploi et le revenu en perspective*, c'est disposer d'une division entière de chercheurs à votre service. Des faits solides. Des analyses objectives. Des statistiques fiables.

La publication n'a pas que des faits et des chiffres. Elle offre également des analyses de fond sur des questions complexes touchant l'emploi et le revenu, de façon à fournir des indications claires et précises sur les

tendances actuelles du marché du travail et des revenus.

Notre équipe de spécialistes met à votre disposition des données récentes sur l'emploi et le revenu. Dans chacun des numéros trimestriels, vous trouverez :

- des articles de fond sur l'emploi et le revenu
- plus de 50 indicateurs clés de l'emploi et du revenu
- un aperçu de la recherche en cours
- de l'information sur les nouvelles enquêtes

En prime, vous recevrez le *Bilan du marché du travail* deux fois l'an. Vous disposerez ainsi d'une analyse à jour de la situation du marché du travail pour les six derniers mois ou la dernière année.

Tout cela pour 56 \$ seulement!

Des milliers de professionnels au Canada consultent *Perspective* pour connaître les tendances de l'emploi et du revenu, ainsi que les plus récents résultats de recherche. Votre abonnement vous permettra de connaître tous les faits.

Nous savons que *L'emploi et le revenu en perspective* deviendra pour vous un outil indispensable. C'EST GARANTI. Si vous n'êtes pas satisfait après avoir lu le premier numéro, nous vous REMBOURSERONS le montant payé pour les numéros à venir. Abonnez-vous à *Perspective* (n° 75-0010XPF au cat.) dès aujourd'hui.

ABONNEZ-VOUS DÈS MAINTENANT!

Pour 56 \$ seulement (TPS de 3,92 \$ en sus), vous recevrez les plus récentes recherches sur l'emploi et le revenu (quatre numéros par année). L'abonnement est de 68 \$ US aux États-Unis et de 80 \$ US dans les autres pays. Faites parvenir votre commande par télécopieur (VISA ou MasterCard) au (613) 951-1584, par téléphone (sans frais) au 1-800-267-6677, par courrier à Statistique Canada, Division du marketing, Vente et service, 120, avenue Parkdale, Ottawa (Ontario) K1A 0T6. Ou communiquez avec le Centre de consultation de Statistique Canada le plus près. (Voir la liste dans la présente publication).

✓ Identify Emerging Trends

✓ Define New Markets

✓ Pinpoint Profit Opportunities

✓ Dégagez les nouvelles tendances

✓ Définissez les nouveaux marchés

✓ Déterminez les possibilités de profit

To safeguard your place in tomorrow's marketplace, you have to be able to anticipate trends today. To do that, you're going to need some insight into the purchasing trends in the Canadian marketplace.

With a complete profile of Canadian consumers, plus an indepth analysis of Canadian industries, the *Market Research Handbook* gives you the most thorough coverage of purchasing trends. This valued bestseller can lead you to new markets by giving you details on:

- ▶ how much money Canadians are earning and what they're spending on cars, rent, home entertainment and household appliances;
 - ▶ the level of sales in retail chain and department stores;
 - ▶ what goods are being traded between Canada, U.S., and other countries;
 - ▶ census data such as: age/sex, schooling, households, unemployment, interprovincial and international migration
- ...and much, much more!

With over 600 pages, the *Handbook* includes more than 200 statistical tables that give you instant access to provincial and national market data. Featured are important economic indicators such as the **Gross Domestic Product**, **Labour Force Productivity**, **Private and Public Investment** and the **Consumer Price Index**.

Order your copy of the *Market Research Handbook* (Catalogue #63-2240XPB) today for only \$110 in Canada plus \$7.70 GST, US\$132 in the United States, and US\$154 in other countries.

CALL TOLL-FREE 1-800-267-6677 OR FAX (613)951-1584 and use your VISA or MasterCard. **OR MAIL** your order to: Statistics Canada, Marketing Division, Sales and Service, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Regional Office listed in this publication.

Pour maintenir votre place sur le marché de demain, vous devez être en mesure de prévoir les tendances aujourd'hui. Pour ce faire, vous devrez comprendre les habitudes d'achat sur le marché canadien.

Renfermant un profil complet des consommateurs canadiens ainsi qu'une analyse approfondie des industries canadiennes, le *Recueil statistique des études de marché* brosse un tableau exhaustif des habitudes d'achat. Ce précieux best-seller peut vous faire découvrir de nouveaux marchés en vous fournissant les détails suivants :

- ▶ les revenus des Canadiens et leurs dépenses pour la voiture, le loyer, les appareils de divertissement et les appareils ménagers;
 - ▶ le niveau des ventes dans les magasins de détail à succursales et les grands magasins;
 - ▶ les biens échangés entre le Canada, les É.-U. et d'autres pays;
 - ▶ les données du recensement telles que l'âge, le sexe, le niveau de scolarité, les ménages, le chômage, la migration interprovinciale et internationale
- ...et bien plus encore!

Le *Recueil*, contenant plus de 600 pages et au delà de 200 tableaux statistiques, vous permettra d'accéder instantanément aux données provinciales et nationales sur le marché. Il traite d'indicateurs économiques importants tels que le **produit intérieur brut**, la **productivité de la population active**, les **investissements privés et publics** et l'**Indice des prix à la consommation**.

Procurez-vous votre exemplaire du *Recueil statistique des études de marché* (n° 63-2240XPB au catalogue) dès aujourd'hui pour seulement 110 \$ au Canada plus 7,70 \$ de TPS, 132 \$ US aux États-Unis et 154 \$ US dans les autres pays. Commandez votre exemplaire **PAR TÉLÉPHONE EN COMPOSANT SANS FRAIS le 1-800-267-6677 OU PAR TÉLÉCOPIEUR** au (613) 951-1584 et utilisez votre carte VISA ou MasterCard, **OU PAR LA POSTE** à l'adresse suivante : Statistique Canada, Division du marketing, Vente et service, 120, av. Parkdale, Ottawa (Ontario) K1A 0T6, ou communiquez avec le bureau régional de Statistique Canada le plus près dont la liste figure dans la présente publication.

Pick a topic... any topic

The **1994 Statistics Canada Catalogue** is your guide to the most complete collection of facts and figures on Canada's changing business, social and economic environment. No matter what you need to know, the **Catalogue** will point you in the right direction.

From the most popular topics of the day – like employment, income, trade, and education – to specific research studies – like mineral products shipped from Canadian ports and criminal victimization in urban areas – you'll find it all here.

... the 1994 Statistics Canada Catalogue will help you get your bearings...

The **Catalogue** puts all this information at your fingertips. With the expanded index, you can search by subject, author or title – even periodical articles are indexed. There's also a separate index for all our electronic products.

The **Catalogue** has everything you need to access all Statistics Canada's products:

- descriptions of over 25 new titles, plus succinct abstracts of the over 650 titles and 7 map series already produced;
- a complete guide to finding and using statistics;
- electronic products in a variety of media, and

advice on getting expert assistance on electronic products and on-line searches;

- tabs to each section – so you can immediately flip to the information you need.

... time and time again

To make sure that the **Catalogue** stands up to frequent use, we used a specially coated cover to prevent broken spines, tattered edges and dog-eared corners.

Order today – you'll be lost without it.

Choisissez un sujet... n'importe lequel

Le **Catalogue de Statistique Canada 1994** est votre guide pour la collection la plus complète de faits et de chiffres dans les domaines, en constante évolution, du commerce, de la société et de l'économie du Canada. Peu importe ce que vous voulez savoir, le **Catalogue** vous mettra sur la bonne piste.

Des sujets actuels les plus populaires – comme l'emploi, le revenu, le commerce et l'éducation – à des études de recherche spécialisées – comme les produits minéraux expédiés des ports canadiens et la victimisation dans les régions urbaines – vous trouverez tout dans ce document.

Le Catalogue de Statistique Canada 1994 vous aidera à vous orienter...

Le **Catalogue** vous met tous ces renseignements sous la main. L'index augmenté vous permet de chercher par sujet, auteur ou titre – les articles de périodiques sont même indexés. On a aussi ajouté un index séparé pour tous nos produits électroniques.

Le **Catalogue** a tout ce qu'il vous faut pour vous procurer les produits de Statistique Canada :

- descriptions de plus de 25 nouveaux titres et courts résumés des 650 titres et plus et des 7 séries de cartes déjà disponibles;
- guide complet pour obtenir et utiliser les données statistiques;
- produits électroniques sur supports divers et

conseils sur l'obtention d'aide d'experts pour les produits électroniques et les recherches en direct;

- système d'onglets pour chaque section – pour que vous puissiez immédiatement repérer les renseignements qui vous intéressent.

... maintes et maintes fois

Pour garantir que le **Catalogue** puisse résister à une utilisation fréquente, nous avons utilisé une couverture avec un revêtement spécial conçue pour éviter les dos cassés, les bords abîmés et les coins de page pliés.

Commandez aujourd'hui – vous ne pourrez plus vous en passer.

Standards of Service to the Public

To maintain quality service to the public, Statistics Canada follows established standards covering statistical products and services, delivery of statistical information, cost-recovered services and services to respondents. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

Des données sous plusieurs formes . . .

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

Note of Appreciation

Canada owes the success of its statistical system to a long-standing cooperation involving Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- .. figures not available
- ... figures not appropriate or not applicable
- nil or zero
- amount too small to be expressed
- p preliminary figures
- r revised figures
- x confidential to meet secrecy requirements of the Statistics Act

NOTE ON CANSIM

Most of the data published in *The Consumer Price Index* (Catalogue 62-001) and *Consumer Prices and Price Indexes* (Catalogue 62-010) is also available in machine readable form through CANSIM (Canadian Socio-Economic Information Management System). In general, CANSIM provides a longer historical series. For further information on CANSIM call (613) 951-8200 or write to Electronic Data Marketing Division, Statistics Canada, R.H. Coats Building, Ottawa, K1A 0T6.

Additional Information and Related Publications

Detailed information on the methodology and concepts of the CPI is contained in *The Consumer Price Index Reference Paper, Updating Based on 1992 Expenditures*, (Occasional), Catalogue 62-553. Information regarding the Family Expenditure Surveys is contained in two volumes: *Family Food Expenditure in Canada, 1992*, Catalogue 62-554, and *Family Expenditure in Canada, 1992*, Catalogue 62-555.

Consumer Price Index series for Canada, the provinces, Whitehorse, Yellowknife and sixteen cities, in addition to other related price information are also available in *The Consumer Prices Indexes*, (Monthly), Catalogue 62-001. In addition, selected educational and promotional material is available. For these and further information, contact the Consumer Prices Section, Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6 (613-951-9606).

This publication was prepared under the direction of:

Louis Marc Ducharme, Director, Prices Division

Margaret Parlor, Chief, Consumer Prices Section

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

**SIGNES CONVENTIONNELS**

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres non disponibles
- ... n'ayant pas lieu de figurer
- néant ou zéro

- p nombres provisoires
- r nombres rectifiés
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret

NOTE CONCERNANT CANSIM

La plupart des données publiées dans *L'indice des prix à la consommation* (n° 62-001 au catalogue) et *Prix à la consommation et indices des prix* (n° 62-010 au catalogue) peuvent être obtenues, sous forme lisible par machine, de CANSIM (Système canadien d'information socio-économique). Les séries historiques sont généralement plus longues dans CANSIM. Pour plus d'information sur CANSIM, signaler (613) 951-8200 ou écrire à Division du marketing, Statistique Canada, Immeuble R.H. Coats, Ottawa, K1A 0T6.

Renseignements supplémentaires et publications connexes

Les méthodes et les concepts de l'IPC sont décrits en détail dans le *Document de référence de l'indice des prix à la consommation, Mise à jour fondée sur les dépenses de 1992*, (hors série), n° 62-553 au catalogue. Des renseignements au sujet des enquêtes sur les dépenses des familles se retrouvent dans deux volumes distincts: *Dépenses alimentaires des familles au Canada, 1992*, n° 62-554 au catalogue; et *Dépenses des familles au Canada, 1992*, n° 62-555 au catalogue.

Des séries d'indices des prix à la consommation pour le Canada, les provinces, Whitehorse, Yellowknife et seize villes, ainsi que d'autres renseignements sur les prix sont publiés dans *L'indice des prix à la consommation*, (mensuel), n° 62-001 au catalogue. De plus, certains documents éducatifs et publicitaires sont disponibles. Pour plus de renseignements, communiquer avec la Section des prix à la consommation, Division des prix, Statistique Canada, Ottawa (Ontario) K1A 0T6 (613-951-9606).

Cette publication a été rédigée sous la direction de:

Louis Marc Ducharme, Directeur, Division des prix

Margaret Parlor, Chef, Section des prix à la consommation

Le papier utilisé dans la présente publication répond aux exigences minimales de l'American National Standard for Information Sciences – "Permanence of Paper for Printed Library Materials", ANSI Z39.48 – 1984.

Highlights

Consumer Price Behavior

Second Quarter 1995

Trends in Consumer Prices

Consumer prices across Canada went up by an average 0.5% between March and June 1995 (second quarter). This rise was moderate compared to the increase of 1.1% observed in the first quarter of this year, but was identical to those seen in the third and fourth quarters of 1994.

The 12-month changes for April, May and June were 2.5%, 2.9% and 2.7%. These were greater than the annual changes of 0.6%, 1.8% and 2.2% for the three months comprising the first quarter. The reductions in tobacco taxes in early 1994 influenced the first quarter annual changes. If tobacco products were not included in the basket, the second quarter would still have shown larger annual movements than the first.

In seasonally adjusted terms, the All-items Consumer Price Index increased by 0.5% in the second quarter, down slightly from the 0.7% rise observed in the first quarter. The increase in the second quarter was identical to those found in the third and fourth quarters of 1994.

Major contributors to the overall change in the second quarter

Most of the 0.5% increase in the All-items CPI in the second quarter resulted from higher charges for gasoline, food, recreation and reading. Less upward pressure came from higher prices for cigarettes, alcoholic beverages, owned and rented accommodation, other transportation charges, and selected items associated with household operations. Some offset came from falling prices for clothing and footwear and for selected household furnishings.

Gasoline prices increased sharply during the second quarter. Among the reasons for the 7.6% advance were seasonal changes in the gasoline market, unexpected increases in demand, sharp increases in the international price of crude oil and the delayed impact of the increase in the Federal excise tax in February.

Other transportation expenses rose slightly overall. Consumers who rented vehicles faced the sharpest advance in summer rates in five years. Rail passengers were offered special rates in April and May following a rail strike, but this promotion ended in June with the introduction of summer rates. Purchasers of new vehicles got a little relief as prices fell slightly, partly in response to slumping sales.

Food prices rose an average of 0.7% in the second quarter, down noticeably from the increase of 2.0% in the first quarter. Prices of both food purchased from grocery stores and food purchased from restaurants rose by 0.7% in the latest quarter. Most of the upward pressure resulted from higher prices for chicken, breakfast cereal, oranges, potatoes and lettuce. Grocery store shoppers gained some relief from lower prices for bakery products, bananas and soft drinks.

Recreational charges increased 1.0% in the second quarter reflecting higher prices for hotel/motel accommodation, the use of recreational facilities and the purchase of recreational vehicles. Sharply higher prices for newspapers and books pushed up the Reading index by 4.2%, the largest increase

Faits saillants

Comportement des prix à la consommation

Deuxième trimestre de 1995

Tendances des prix à la consommation

Les prix à la consommation ont subi une hausse moyenne de 0,5% entre mars et juin 1995 (deuxième trimestre). C'est une progression modérée par rapport à celle de 1,1% observée au premier trimestre de l'année, mais identique à celles du troisième et du quatrième trimestre de 1994.

Les variations sur 12 mois pour avril, mai et juin ont été de 2,5%, 2,9% et 2,7%, soit plus que les variations annuelles de 0,6%, 1,8% et 2,2% des trois mois du premier trimestre. Les réductions des taxes sur le tabac au début de 1994 ont eu une influence sur les variations annuelles au premier trimestre. Si les produits du tabac n'étaient pas inclus dans le panier, les mouvements annuels auraient quand même été plus marqués au deuxième trimestre qu'au premier.

En chiffres désaisonnalisés, l'indice d'ensemble des prix à la consommation a progressé de 0,5% au deuxième trimestre, ce qui est un peu moins que l'avance de 0,7% observée au premier trimestre. L'augmentation du deuxième trimestre était identique à celles observées au troisième et au quatrième trimestres de 1994.

Principaux facteurs de la variation d'ensemble au deuxième trimestre

Le gros de la progression de 0,5% de l'IPC d'ensemble au deuxième trimestre est le fait de l'augmentation du prix de l'essence, des aliments, des loisirs et de la lecture. La hausse du prix des cigarettes, des boissons alcoolisées et du logement en propriété et en location, des autres frais de transport et de certains éléments liés aux dépenses du ménage a eu un effet d'entraînement moindre. La baisse du prix de l'habillement et des chaussures et de certains articles d'équipement du ménage a ralenti la progression.

Le prix de l'essence a subi une hausse marquée au deuxième trimestre. Au nombre des raisons qui expliquent l'avance de 7,6%, il faut compter les variations saisonnières du marché de l'essence, les augmentations inattendues de la demande, de vives augmentations du prix international du pétrole brut, et le retard de l'incidence de l'augmentation de la taxe d'accise fédérale en février.

L'ensemble des dépenses de transport ont légèrement augmenté. Les consommateurs qui louent des véhicules ont dû essuyer la hausse la plus prononcée des tarifs d'été en cinq ans. Les chemins de fer ont offert aux voyageurs des tarifs spéciaux en avril et en mai après une grève du rail, mais cette promotion a pris fin en juin avec l'entrée en vigueur des tarifs d'été. Les acheteurs de véhicules neufs ont eu droit à un peu de soulagement grâce à un léger repli des prix, en partie sous l'effet d'une léthargie des ventes.

Le prix des aliments a connu une progression moyenne de 0,7% au deuxième trimestre, ce qui est nettement inférieur à l'augmentation de 2,0% du premier trimestre. Le prix des aliments achetés à l'épicerie et des aliments achetés au restaurant a monté de 0,7% au dernier trimestre. Le gros de l'effet d'entraînement est venu de l'accroissement du prix du poulet, des céréales de table, des oranges, des pommes de terre et de la laitue. Les consommateurs ont eu droit à un certain allègement de leur facture d'épicerie grâce à un recul du prix des produits de boulangerie, des bananes et des boissons gazeuses.

Les loisirs ont coûté 1,0% de plus au deuxième trimestre, reflet de l'avance des prix pour les chambres d'hôtel et de motel, l'utilisation des installations de loisirs et l'achat de véhicules de loisirs. Une nette progression du prix des journaux et des livres a propulsé de 4,2% l'indice de la lecture, ce qui constitue l'augmentation la plus forte depuis

since the early eighties. A rapid increase in the price of paper has been cited as a reason for the recent advance.

Shelter charges rose slightly (0.1%) as a result of some opposing price changes. Both tenants and homeowners experienced higher charges, the latter from rising mortgage interest costs and increased maintenance and repair charges. Some relief came about with a drop in new house prices and sharp drop in piped gas rates.

On average, the price of alcoholic beverages rose 0.6% with most of the increase associated with the prices of wine sold in stores. Cigarette prices have risen steadily since February of this year.

A marginal price increase (0.1%) was also posted for consumer expenditures associated with operating and furnishing a household. The price of paper supplies increased by 5.9%, reflecting tight conditions in the international market for paper as a raw material. Small increases were also observed for child care and telephone services. Those who purchased furniture, household textiles and home appliances in the second quarter scored small gains from the declines in prices of such articles.

Clothing and footwear prices have been weak and faltering for most of the last three years. In 1995, the index fell in 3 of the 6 months making up the first and second quarters. Large declines were registered in May and June causing the index to fall by 1.4% in the second quarter. Prices of men's and women's clothing fell on average by 1.0% and 2.9% respectively in the latest period. Prices of footwear and of clothing accessories also fell 0.7% and 2.2% respectively. In contrast, prices on children's clothing rose by 1.7%.

Special aggregates

The Goods index moved up by 0.5% compared to the slightly higher 0.6% increase posted by the Services index. Mostly as a result of the fall in clothing and footwear prices, the Semi-durables index declined by 0.5%. The Durables index fell 0.6% as prices of household furniture, appliances and motor vehicles declined. In contrast, the Non-durables index rose by 1.3% reflecting mainly the higher prices of gasoline and food purchased from stores.

The index for All-items excluding Food and Energy moved up by 0.3% compared to increases of 0.9% in the first quarter and 0.7% in each of the third and fourth quarters of 1994. Energy prices rose by a sharp 2.6% in the second quarter, mostly in response to the large (7.6%) advance in gasoline prices.

International comparisons

Of the G-7 countries, three showed a higher rate of price increases between June 1994 and June 1995, while three showed a lower rate. Over this period, the CPI for Canada rose by 2.7%. This increase was less than those found in the CPI's for the United States (3.0%), Britain (3.5%) and Italy (5.8%). Lower rates of consumer price change were found in Japan (0.3%), France (1.6%) and Germany (2.4%).

le début des années 80. On explique l'avance récente par une progression rapide du prix du papier.

Les frais de logement ont avancé légèrement (0,1%) par suite de certains mouvements contraires des prix. Les locataires comme les propriétaires ont vu leurs frais augmenter, ces derniers à cause de la montée des coûts d'intérêt hypothécaire et de l'augmentation des frais d'entretien et de réparations. La chute du prix des maisons neuves et le recul marqué des tarifs du gaz ont représenté un certain allègement.

En moyenne, le prix des boissons alcoolisées a augmenté de 0,6%, le gros de l'augmentation étant lié au prix du vin vendu en magasin. Le prix des cigarettes n'a pas cessé d'augmenter depuis février de cette année.

Il y a aussi eu une augmentation marginale de prix (0,1%) pour les dépenses de consommation liées aux dépenses de ménage et à l'équipement de ménage. Le prix des articles en papier a monté de 5,9%, conséquence du resserrement du marché international du papier comme matière brute. On a aussi observé de légères augmentations pour les services de soins pour enfants et les services téléphoniques. Ceux qui ont acheté des meubles, des articles ménagers en matière textile et des appareils ménagers au deuxième trimestre ont été légèrement avantagés par le recul du prix de ces articles.

Le prix de l'habillement et des chaussures a été faible et a vacillé pendant le plus clair des trois dernières années. En 1995, l'indice a reculé dans trois des six mois du premier et du deuxième trimestre. Il y a eu des reculs importants en mai et en juin, qui ont fait chuter l'indice de 1,4% au deuxième trimestre. Le prix des vêtements pour hommes et pour femmes a baissé, en moyenne, de 1,0% et 2,9% respectivement dans la période la plus récente. Le prix des chaussures et des accessoires vestimentaires a aussi tombé de 0,7% et 2,2% respectivement. Par contraste, le prix des vêtements pour enfants a monté de 1,7%.

Agrégats spéciaux

L'indice des biens a avancé de 0,5% par rapport à l'augmentation légèrement supérieure de 0,6% affichée par l'indice des services. Conséquence surtout de la chute du prix des vêtements et des chaussures, l'indice des biens semi-durables a fléchi de 0,5%. L'indice des biens durables a reculé de 0,6%, à la faveur d'un repli des prix des meubles, des appareils et des véhicules automobiles. Par contraste, l'indice des biens non durables a monté de 1,3%, reflète surtout de la progression des prix de l'essence et des aliments achetés au magasin.

L'indice d'ensemble sans les aliments et l'énergie a progressé de 0,3% à comparer à des augmentations de 0,9% au premier trimestre et de 0,7% dans chacun des troisième et quatrième trimestres de 1994. Le prix de l'énergie a subi une hausse marquée de 2,6% au deuxième trimestre, sous l'effet surtout de la forte avance (7,6%) du prix de l'essence.

Comparaisons internationales

Le taux d'augmentation des prix entre juin 1994 et juin 1995 a été supérieur dans trois pays du G-7 et inférieur dans trois autres. Sur cette période, l'IPC pour le Canada a monté de 2,7%. Cette augmentation est plus faible que celles observées aux États-Unis (3,0%), en Grande-Bretagne (3,5%) et en Italie (5,8%). Les taux de variation des prix à la consommation ont été moindres au Japon (0,3%), en France (1,6%) et en Allemagne (2,4%).

THE CONSUMER PRICE INDEX TECHNICAL NOTES

Definition

The Consumer Price Index (CPI) is an indicator of the changes in consumer prices experienced by the target population. The CPI measures price change by comparing, through time, the cost of a fixed basket of commodities. This basket is based on the expenditures of the target population in a certain reference period, currently 1992. Since the basket contains commodities of unchanging or equivalent quantity and quality, the index reflects only pure price movements.

Separate CPI's are published for Canada, the ten provinces, Whitehorse and Yellowknife. Some CPI information is also available for an additional sixteen cities. Since the CPI is a measure of price change from one time period to another, it cannot be used to indicate differences in price levels between provinces or cities.

Population Coverage

The population targeted by the Consumer Price Index consists of families and individuals living in urban and rural private households. For practical reasons, residents of the Territories outside Whitehorse and Yellowknife are not represented by the index. Previous to January 1995, the target population consisted of private households in Canadian urban centres with a population of 30,000 or more.

Time Reference

The CPI compares, in percentage terms, prices in any given time period to prices in the official base period which, at present, is 1986=100. The official time base was changed from 1981=100 to 1986=100 starting with the CPI for June 1990. The change is strictly an arithmetic conversion which alters the index levels but leaves the percentage changes between any two periods intact, except for differences in rounding.

Percent Versus Index Point Changes

The movements of the indexes from one month to another are expressed as percent changes rather than changes in index points. Index point changes are affected by the level of the index which, in turn, depends on the time base of the particular index. The percentage change between any two time periods can be readily calculated by dividing the index point difference between the two time periods by the index for the earlier period and multiplying the result by one hundred.

Price Coverage

The prices used in the CPI calculation are final prices, inclusive of excise and other indirect taxes paid by consumers. In particular, they include the Goods and Services Tax as well as provincial retail sales taxes wherever applicable. It follows that the CPI can change as a result of modifications to any of these taxes.

The selection of commodities and the outlets from which prices are collected is judgmental, other than for rents. The number of prices required for a given commodity depends on the importance and the nature of the commodity. The samples are

Appendice 1

L'INDICE DES PRIX À LA CONSOMMATION NOTES TECHNIQUES

Définition

L'indice des prix à la consommation (IPC) est un indicateur des variations des prix à la consommation payés par la population cible. L'IPC mesure la variation des prix en comparant, dans le temps, le coût d'un panier fixe de biens et de services. Ce panier est basé sur les dépenses de la population cible au cours d'une période de référence qui est actuellement 1992. Comme ce panier comprend des biens et des services dont la quantité et la qualité ne changent pas ou sont équivalentes, l'indice ne retrace que les mouvements de prix purs.

On publie des IPC distincts pour le Canada, les provinces, Whitehorse et Yellowknife. Certains renseignements sont aussi publiés pour seize autres villes. Comme l'IPC est une mesure de la variation de prix entre deux périodes, il ne peut servir à relever les différences de niveau des prix entre les provinces ou les villes.

Champ d'observation de la population

La population couverte par l'indice des prix à la consommation comprend les familles et les personnes vivant dans des ménages privés urbains et ruraux. Pour des raisons pratiques, les résidents des Territoires à l'extérieur de Whitehorse et de Yellowknife ne sont pas représentés. Avant janvier 1995, la population cible comprenait les ménages privés vivant dans les centres urbains du Canada dont la population était de 30 000 habitants ou plus.

Période de base

L'IPC compare, en pourcentage, les prix au cours d'une période donnée à ceux de la période de base officielle, qui est actuellement 1986 = 100. On a changé la période de base de 1981 = 100 à 1986 = 100 à compter de l'IPC du mois de juin 1990. Ce changement est uniquement une conversion arithmétique qui modifie le niveau des indices, mais laisse les variations en pourcentage entre deux périodes intactes, à l'exception des différences dues à l'arrondissement.

Changements en pourcentage versus changements en points d'indice

Les fluctuations des indices d'un mois à l'autre sont exprimées en pourcentage, plutôt qu'en point d'indice. Les variations en point d'indice sont en fonction du niveau de l'indice qui, à son tour, dépend de la période de base de l'indice en question. Par contre, il est facile de calculer la variation en pourcentage entre deux périodes en divisant la différence en point d'indice entre ces deux périodes par l'indice de la période antérieure, et en multipliant ensuite ce résultat par cent.

Champ d'observation des prix

Les prix qui entrent dans le calcul de l'IPC sont les prix finals, ce qui comprend les taxes d'accise et les autres impôts indirects que les consommateurs paient. En particulier, les prix comprennent la taxe sur les produits et les services, ainsi que les taxes de vente au détail provinciales, au besoin. L'IPC peut donc varier à cause des modifications apportées à ces taxes.

La sélection des biens et des services, ainsi que des points de vente où l'on recueille les prix, se fait au jugé, à l'exception des loyers. Le nombre de prix nécessaires pour un bien ou service donné dépend de l'importance et de la nature de celui-ci. L'échantillon est conçu de façon

designed to represent volume selling commodities and outlets. The principal objective of the sample design is to ensure an informative, reliable and impartial picture of consumer inflation at the national and provincial levels.

Price collection for a given month's index is carried out during the first three weeks of the month. Although prices for most CPI commodities are collected monthly, prices for commodities having less frequent price changes (e.g. property taxes and electricity rates) are collected at intervals longer than one month. Special pricings are carried out where there is evidence that significant price changes have occurred between scheduled pricing periods.

Weights and Linking

The CPI maintains fixed quantitative proportions (weights) between commodities during the life of a given basket. The baskets are updated periodically to take into account changes in consumer expenditure patterns. In January 1995, the basket reflecting the 1992 expenditure patterns replaced the 1986 basket. The continuity of the CPI series is maintained by "linking" the corresponding indexes obtained from consecutive baskets.

The CPI is calculated as a weighted average of specified commodity price indexes. The weights are derived from Family Expenditure Survey data. Text Table 1 compares the expenditure shares of the two most recent CPI baskets, i.e. those of 1992 and 1986. Because both sets of weights are expressed in December 1994 or "link month" prices, the differences reflect the shifts in the relative quantities purchased between the two baskets. The differences are a result of changes in consumer expenditure patterns over time and of the expansion of the population coverage.

When reconstructing or re-aggregating published CPI series, the changes in weights and the linking procedures must be taken into account. For a description of the methodology required to reconstruct or re-aggregate CPI series, see the Consumer Price Index Reference Paper cat. 62-553 Occasional or contact Prices Division.

à représenter les produits et services ainsi que les établissements à fort volume de ventes. Le principal objectif du plan de sondage est d'obtenir une image précise, fiable et impartiale de l'inflation représentée par les prix à la consommation au niveau national et provincial.

La collecte des prix pour l'indice d'un mois donné se fait pendant les trois premières semaines du mois. Bien que les prix de la plupart des biens et services entrant dans l'IPC soient recueillis chaque mois, les prix des biens ou des services ayant des variations de prix moins fréquentes (impôts fonciers, tarifs de l'électricité, par exemple) sont recueillis à des intervalles dépassant un mois. Des relevés spéciaux de prix sont faits lorsqu'il est évident que des variations de prix appréciables se sont produites entre les périodes de relevé de prix régulières.

Pondération et enchaînement

L'IPC maintient des proportions quantitatives fixes (pondérations) entre les biens et les services pendant la durée de vie d'un panier. Le panier est habituellement mis à jour régulièrement afin de prendre en compte les changements dans la composition des dépenses des consommateurs. En janvier 1995, le panier qui retrace la composition des dépenses de 1992 a remplacé le panier de 1986. La continuité des séries de l'IPC est assurée par un « enchaînement » des indices correspondants provenant de paniers consécutifs.

On calcule l'IPC comme une moyenne pondérée d'indices de prix de biens ou de services précis. Les pondérations sont tirées des données de l'Enquête sur les dépenses des familles. Le tableau explicatif 1 compare les parts des dépenses des deux paniers les plus récents, ceux de 1992 et de 1986. Comme les deux ensembles de pondérations sont exprimés en prix de décembre 1994, qui est le « mois d'enchaînement », les différences reflètent les mouvements des quantités relatives achetées entre les deux paniers. Les différences s'expliquent par les variations de la composition des dépenses des consommateurs dans le temps et par l'extension du champ d'observation de la population.

Quand on reconstruit ou ré-agrège les séries publiées de l'IPC, il faut prendre en compte les changements de pondérations et les procédures d'enchaînement. Pour une description de la méthodologie à utiliser dans la reconstruction des séries de l'IPC ré-agrégées, consulter le document de référence sur l'indice des prix à la consommation portant le numéro de catalogue 62-553 (Hors série), ou s'adresser à la Division des prix.

TEXT TABLE 1
Comparison of the 1992 and 1986
Distribution of Expenditures used in the
Consumer Price Index, by Major
Component, for Canada

Major Components	1992 Expenditures		1986 Expenditures ¹		Composantes principales
	Dépenses de 1992		Dépenses de 1986 ¹		
	Expressed in 1992 prices	Expressed in Dec. 1994 prices	Expressed in Dec. 1994 prices		
	Exprimées en prix de 1992	Exprimées en prix de Déc. 1994	Exprimées en prix de Déc. 1994		
All-items	100.0	100.0	100.0	Ensemble	
Food	18.0	18.0	17.0	Aliments	
Shelter	27.6	27.9	25.3	Logement	
Household operations and furnishings	10.4	10.0	9.7	Dépenses et équipement du ménage	
Clothing and footwear	6.8	6.6	8.6	Habillement et chaussures	
Transportation	17.2	18.3	18.8	Transports	
Health and personal care	4.3	4.3	4.3	Santé et soins personnels	
Recreation, education and reading	10.2	10.4	10.3	Loisirs, formation et lecture	
Alcoholic beverages and tobacco products	5.5	4.5	6.0	Boissons alcoolisées et produits du tabac	

¹ The 1986 data were adjusted to be comparable with the classification system used for the 1992 basket.

¹ Les données de 1986 ont été modifiées de façon à correspondre au système de classification utilisé pour le panier de 1992.

Whitehorse and Yellowknife Indexes

The relatively small size of the housing market in these two cities makes it difficult to construct reliable price indexes for new houses. To compensate, the price movements of rental accommodation are used to approximate the price movements of new houses. The rent information itself is collected using different pricing frequencies and collection methods than in the rest of the country. Because of these problems, the indexes for Rented Accommodation, Owned Accommodation and Shelter are not published for these two cities. Further, the All-items indexes published for these two cities are not strictly comparable with the same indexes for the provinces or the other sixteen urban centres.

Calculation of City Indexes

With the introduction of the 1992 basket, emphasis was shifted from city data to provincial data. City All-items series were continued since many users had come to rely on this service, but the method of calculation was changed. Shelter indexes are calculated for each city. This recognizes the importance of Shelter in the basket, the significant and persistent differences in price movements between cities, and the availability of local data. For the other seven major components, the movement of the provincial counterpart (or, in the cases of Montréal, Toronto, and Vancouver, a sub-provincial counterpart) is used. The major components are aggregated using the city's expenditure pattern to arrive at each city's All-items index.

Seasonal Adjustment

Seasonal adjustment is performed within each basket at the level of the eight major components. The seasonally adjusted All-items series is a weighted average of the eight seasonally adjusted major components. It was linked in December 1994 with the seasonally adjusted series calculated before then to form a continuous series starting in September 1978. Each month's data is fixed until the end of the year when the series is revised. Because the revision can lead to changes in both the levels and movements of the indexes, users employing the CPI for indexation purposes are advised to use the unadjusted indexes.

The Purchasing Power of the Consumer Dollar

As prices rise, a dollar will buy fewer goods and services. Because the CPI measures changes in the general price level, it is often used to estimate changes in the purchasing power of the Canadian dollar. For example, between 1986 and 1994, the All-items Canada CPI rose from 100.0 to 130.7, indicating that consumers had to pay 30.7% more to buy the same quantity of goods and services. Looked at in terms of purchasing power, a dollar in 1994 would purchase the same amount as 76.5¢ $\{(100.0 / 130.7) * 100\}$ did in 1986. This process may be interpreted as the deflation of money or the adjustment of money values to eliminate price effects.

Indices de Whitehorse et de Yellowknife

La taille relativement faible du marché de l'habitation de ces deux villes rend difficile la construction d'indices de prix fiables pour les maisons neuves. Pour corriger cette situation, on se sert du mouvement des prix du logement en location pour obtenir une approximation de celui des maisons neuves. Les renseignements sur les loyers proprement dits sont obtenus à des fréquences de relevé des prix et selon des méthodes de collecte qui diffèrent de celles utilisées ailleurs dans le pays. En raison de ces problèmes, les indices du logement en location, du logement en propriété et du logement ne sont pas publiés pour ces deux villes. Enfin, les indices d'ensemble publiés pour ces deux villes ne sont pas strictement comparables aux mêmes indices pour les provinces ou les seize autres centres urbains.

Calcul des indices des villes

Avec la venue du panier de 1992, l'accent est passé des données des villes aux données des provinces. Les séries des indices d'ensemble pour les villes ont été conservées parce que de nombreux utilisateurs se sont habitués à ce service, mais la méthode de calcul a changé. Les indices du logement sont calculés pour chaque ville. Ainsi, on prend en compte l'importance du logement dans le panier, les différences appréciables et persistantes dans les mouvements des prix entre villes et la disponibilité de données locales. Pour les sept autres composantes principales, on utilise le mouvement de l'indice provincial (pour Montréal, Toronto et Vancouver, un indice infra-provincial). Les composantes principales sont agrégées à partir de la composition des dépenses de la ville pour donner, en fin de compte, l'indice d'ensemble de cette dernière.

Désaisonnalisation

On effectue la désaisonnalisation pour chaque panier au niveau des huit composantes principales. La série désaisonnalisée de l'indice d'ensemble est une moyenne pondérée des huit composantes principales désaisonnalisées. Elle a été enchaînée en décembre 1994 à la série désaisonnalisée calculée auparavant pour donner une série continue qui commence en septembre 1978. Les données de chaque mois sont inchangées jusqu'à la fin de l'année, lorsque la série fait l'objet d'une révision. Comme cette dernière peut entraîner des changements dans les niveaux et dans les mouvements des indices, il est recommandé aux utilisateurs qui se servent de l'IPC à des fins d'indexation de prendre les indices bruts.

Le pouvoir d'achat du dollar à la consommation

Lorsque les prix montent, le dollar achète moins de biens et de services. Parce qu'il mesure les variations du niveau général des prix, l'IPC sert souvent à estimer les variations du pouvoir d'achat du dollar canadien. Ainsi, entre 1986 et 1994, l'IPC d'ensemble pour le Canada est passé de 100,0 à 130,7 : les consommateurs ont donc dû déboursier 30,7% de plus pour acheter la même quantité de biens et de services. Pour ce qui est du pouvoir d'achat, le dollar de 1994 achèterait la même quantité de biens et de services que 76,5 cents $\{(100,0 / 130,7) * 100 \text{ cents}\}$ en 1986. Ce processus peut s'interpréter comme la déflation de l'argent ou l'ajustement des valeurs monétaires, pour la correction des effets de prix.

Appendix 2

Average retail prices

Average retail prices for food, household supplies, personal care items and cigarettes

Table 5 shows, for each month of the quarter, average prices for selected food, household supply and personal care items and for cigarettes.

Prices for these items are collected as part of the regular monthly CPI survey. Prices for the selected food, household supply and personal care items are observed in food supermarkets, while prices for cigarettes are collected in supermarkets, department stores, drug stores and tobacco shops. Average prices for each commodity are calculated as a weighted average of the average prices in the observed cities using the population of these cities as weights.

The commodities which are priced can vary in quality between outlets or between cities. This is the reason why average prices are not published for each of those cities. Brands and outlets can also vary from month to month. Therefore, average prices may not necessarily be fully comparable from one month to another and should not be used as an appropriate measure of pure price change through time. A matched commodity and outlet sample is used for the CPI to determine the pure price movement of commodities through time.

Appendice 2

Prix de détail moyens

Prix de détail moyens pour les aliments, les produits d'entretien ménager, les produits de soins personnels et les cigarettes

Le tableau 5 présente, pour chaque mois du trimestre, des prix moyens pour certains produits alimentaires, ménagers et de soins personnels ainsi que pour les cigarettes.

Les données sur les prix utilisées dans le calcul sont celles qui ont été recueillies dans le cadre de l'enquête mensuelle régulière de l'IPC. Les prix des aliments et des produits d'entretien ménager et de soins personnels ont été relevés dans des supermarchés alimentaires, alors que les prix des cigarettes ont été observés dans des supermarchés, dans des magasins à rayons, dans des pharmacies et dans des débits de tabac. Les prix moyens pour chaque produit sont obtenus en effectuant une moyenne pondérée des prix moyens de chaque ville observée en utilisant la population de ces villes comme pondération.

Les produits dont on relève les prix peuvent varier en qualité d'un point et de vente ou d'une ville à l'autre. C'est la raison pour laquelle les prix moyens ne sont pas publiés pour chacune des villes. Les marques sélectionnées ainsi que les points de vente peuvent aussi varier d'un mois à l'autre. Les prix moyens ne sont donc pas nécessairement entièrement comparables d'un mois à l'autre et ne devraient pas être considérés comme une mesure appropriée des mouvements de prix purs à travers le temps. L'IPC utilise un échantillon apparié de produits et de points de vente pour calculer le mouvement de prix pur des produits dans le temps.

Appendix 3

INTERNATIONAL RETAIL PRICE COMPARISONS

Those concerned with a need for some comparative measure of the retail prices that a Canadian-based employee may encounter while serving outside Canada, will be interested to know that the Government Allowance Indexes Section, Statistics Canada, produces indexes relating retail prices in foreign countries to those prevailing in Ottawa. The "post indexes" as they are called have been developed primarily to regulate the allowance levels of expatriate Canadian Government civilian and military personnel and because of this, they are very specialized in purpose, and specific to the use for which they were designed. Nonetheless, organizations faced with compensating employees for foreign retail price conditions might well find them to be a useful building-block on which to develop and administer a viable foreign service allowance system.

A post index is, at any given point in time, the expression of the current spatial (or place-to-place) retail price relationship of a range of goods and services at a foreign location, with those prices prevailing in Ottawa, rounded to the nearest five points. Ottawa price levels are always expressed as 100. Thus, a post index of 110 for example, means that prices at the foreign location are estimated to be 10% above those in Ottawa, and specifically, that they have been calculated to fall within the index range 107.5 to 112.4, i.e., 7.5% to 12.4% above Ottawa. For reasons discussed later, the highest degree of accuracy claimed for post indexes, is inherent in their being rounded as described.

The post index encompasses price comparisons for such family expenditure categories as food consumed in the home, meals taken in restaurants, household maintenance, household supplies, communications, domestic help, clothing, transportation, health and personal care, reading and recreation, the prices of some 230 items being considered, as indicated in the table hereunder. Several important elements of expenditure are excluded. Since Canadian public servants pay Canadian income taxes regardless of their place of duty, income tax differentials are not considered. Shelter and fuel and utilities expenditures are excluded from the comparison because the federal government compensates for excess costs of these items by means of benefits separate from those regulated by statistical means. Finally, government employees serving abroad may be entitled to purchase liquor, cigarettes, gasoline, etc., at tax-free prices or they may have access to special purchasing facilities not available to the public at large. To the extent that these conditions prevail, they are reflected in post index calculations.

Accordingly, post indexes should not be automatically applied to general uses without regard to their possible limitations. Potential users of these indexes are advised to discuss the specifics of their needs with the Government Allowance Indexes Section, and they may also wish to familiarize themselves with the total foreign service benefit package provided by the Federal Government, details of which may be obtained from the Personnel Policy Branch, Treasury Board, Government of Canada.

Appendice 3

COMPARAISONS INTERNATIONALES DES PRIX DE DÉTAIL

Les personnes qui sont conscientes du besoin d'une mesure comparative des prix de détail auxquels peut faire face un employé canadien en poste à l'étranger seront intéressées d'apprendre que la Section des indices des indemnités de l'état de Statistique Canada produit des indices qui établissent le rapport entre les prix de détail dans les pays étrangers et ceux d'Ottawa. Les "indices de poste" ont été créés à l'origine afin de fixer le niveau des indemnités aux fonctionnaires et aux militaires canadiens postés à l'étranger; en conséquence, ils ont un but très spécialisé et ne s'appliquent qu'à l'utilisation pour laquelle ils ont été créés. Toutefois, les organismes qui doivent verser des indemnités à des employés en vertu des prix de détail à l'étranger pourraient trouver les indices comme une base utile pour élaborer et administrer un système viable d'indemnités pour service à l'étranger.

Un indice de poste est, à une période donnée, l'expression de la relation spatiale actuelle (ou d'un endroit à un autre) entre le prix de détail d'une variété de biens et services à un endroit à l'étranger et les prix à Ottawa, arrondis au plus proche multiple de cinq. Le niveau des prix à Ottawa est toujours 100. Ainsi, un indice de poste de 110 signifie que l'on évalue les prix à un endroit situé à l'étranger à 10% au-dessus de ceux d'Ottawa et plus précisément que l'on a calculé qu'ils tombaient dans la classe d'indice 107.5 à 112.4; c'est donc dire qu'ils sont de 7.5% à 12.4% supérieurs à ceux d'Ottawa. Pour les raisons ci-après, le plus haut degré de précision dont on puisse se prévaloir pour les indices de poste est fonction de ce qu'ils ont été arrondis comme il est dit ci-dessus.

L'indice de poste renferme des comparaisons de prix pour les catégories de dépenses des familles comme les aliments consommés à la maison, les repas pris au restaurant, l'entretien du ménage, les fournitures ménagères, les communications, le personnel domestique, les vêtements, le transport, les soins personnels et de santé, la lecture et les loisirs; on compare les prix de 230 articles environ, tels que présentés ci-dessous. Plusieurs éléments importants de dépenses sont exclus. Les fonctionnaires canadiens paient leur impôt sur le revenu au Canada, quel que soit le lieu de leur travail; les différences concernant l'impôt sur le revenu ne sont donc pas prises en considération. Les dépenses de logement, de chauffage et de services ne font pas partie de la comparaison parce que l'administration publique fédérale compense les dépenses excessives à cet égard à l'aide de prestations déterminées par des moyens autres que statistiques. Enfin, les fonctionnaires en poste à l'étranger ont parfois le droit d'acheter en franchise des boissons alcooliques, des cigarettes, de l'essence, etc., ou ils ont accès à des magasins spéciaux fermés au grand public. Ces conditions réapparaissent plus ou moins fortement lors du calcul des indices de poste.

Les indices de poste ne doivent donc pas être généralisés automatiquement sans tenir compte de leurs limites éventuelles. Nous conseillons à tous ceux qui utiliseraient cet indice de discuter leurs besoins spécifiques avec la section des indices des indemnités de l'état; ceux-ci peuvent également désirer se familiariser avec l'ensemble complet des bénéfices accordés par le gouvernement fédéral pour le service à l'étranger; ils pourront obtenir cette information en s'adressant à la Direction de la politique du personnel, Conseil du Trésor, gouvernement du Canada.

The primary sources of data used in post index construction are periodic retail price and living cost surveys conducted at foreign locations by the foreign service personnel stationed there. The survey data is analyzed by Statistics Canada. In addition to a variety of price information gathered from retail outlets patronized by Canadian personnel at the post, data are also obtained regarding their spending patterns, along with information on the availability of any special local purchasing facilities, and the extent to which staffs make direct importation of consumer goods from other countries.

The general aim is for full-scale surveys to be carried out at about three-year intervals. However, specific studies may be undertaken more or less frequently than this, depending on the volatility of retail price conditions in each particular country, the instability of exchange rates and the extent to which close monitoring of changes in the local retail price situation being faced by Canadian personnel can be achieved through reference to other statistical indicators.

Once established, every post index is subjected to a monthly review, the object being to assess its continuing validity in the light of exchange rate movements, as well as on the basis of price and other economic intelligence obtained from various sources. Statistics Canada is in monthly receipt of an extensive range of price data from foreign governments, international agencies, and world-wide commercial enterprises. The purpose of the data collection is to assess and apply the most accurate possible measurement of price movements at each foreign post since the time of the last survey. In parallel, Ottawa price movements for the same period are also taken into account. Furthermore, since post indexes relate to personnel whose emoluments are expressed in Canadian dollars, shifts in the Canada foreign country currency exchange rate are an integral part, and in some cases the major element, in the review. If the comparative retail price relationship expressed by an existing post index should appear to have changed by five index points, a new post index level may be brought into effect without necessarily undertaking another complete survey.

In developing any place-to-place statistics of retail price differentials, very difficult problems arise from geographic variations in consumers' buying habits and differences in the quality and availability of goods and services. These problems are magnified in international comparisons. By and large, however, conventions and techniques have been developed which attempt to overcome these problems in the context of the specific uses that these indexes are meant to serve. As measures designed to meet a particular administrative need, post indexes achieve their goal if they fairly reflect, in a general way, the price differentials between locations being encountered by those to whom they are applicable.

Table 14 shows a selection of the approximately 250 post indexes currently being maintained, the effective date of their validity for government allowance purposes, and the exchange rates upon which they are predicated.

Readers should bear in mind that these indexes are shown as examples only, and that any one of them may have changed by the time it could be published.

Les principales sources de données qui servent à la création de l'indice de poste sont des enquêtes périodiques sur les prix de détail et le coût de la vie menées dans les divers postes par le personnel du service extérieur. Les résultats de ces enquêtes sont analysés et compilés par Statistics Canada. Non seulement on recueille divers renseignements sur les prix auprès des points de vente au détail où le personnel canadien en poste à l'étranger s'approvisionne, mais encore on se procure des données sur les habitudes de dépenses, des renseignements relatifs à l'existence de points d'achat spéciaux sur place et au volume des importations directes de biens à la consommation effectuées par le personnel dans d'autres pays.

On se propose généralement de mener une enquête exhaustive une fois tous les trois ans environ. Toutefois des études spécifiques peuvent être menées à intervalles plus ou moins rapprochés en fonction, du degré d'instabilité des conditions des prix de détail dans chaque pays et des taux de change compte tenu de ce qu'une surveillance étroite des changements de la situation locale des prix de détail peut être exercée au moyen d'autres indicateurs statistiques.

Une fois établi, chaque indice de poste est révisé tous les mois afin de s'assurer qu'il est encore valable compte tenu des variations des cours de change, des prix et d'autres renseignements d'ordre économique obtenus de diverses sources. Statistique Canada reçoit chaque mois une grande variété de données sur les prix provenant des gouvernements étrangers, des organismes internationaux et des entreprises commerciales du monde entier. La collecte de ces données doit permettre de calculer avec le plus de précision possible l'évolution des prix à chaque poste étranger depuis la dernière enquête. Parallèlement, on tient compte de l'évolution des prix à Ottawa pour la même période. De plus, comme les indices de poste concernent un personnel dont le traitement est exprimé en dollars canadiens, les variations du cours du change canadien dans le pays étranger en question font partie intégrante de la révision et en sont, dans certains cas, l'élément le plus important. Lorsqu'il apparaît que la relation comparative des prix de détail, exprimée par l'indice actuel du poste a changé de cinq points d'indice, un nouvel indice de poste peut être adopté sans que l'on décide nécessairement de mener une nouvelle enquête complète.

Lors de l'élaboration de statistiques comparatives des prix de détail en divers endroits, des problèmes très difficiles surgissent en raison des variations géographiques dans les habitudes d'achat à la consommation et dans les différences de qualité et de disponibilité des biens et services. Les problèmes se compliquent encore lorsqu'il s'agit de comparaisons internationales. Dans une très large mesure cependant, des conventions et des techniques ont été mises au point en vue de résoudre ces problèmes dans le contexte même de l'usage spécifique auquel ces indices sont destinés. En tant que mesures destinées à satisfaire un besoin administratif particulier, les indices de poste joueront leur rôle s'ils rendent généralement bien compte des différences de prix entre différents endroits auxquelles font face des personnes à qui ces indices s'appliquent.

Le tableau 14 présente une sélection des quelques 250 indices de poste, leur date d'entrée en vigueur dans le cadre du programme des indemnités de l'état, et les taux de change sur lesquels ils ont été établis.

Le lecteur devra noter que ces indices ne sont fournis qu'à titre d'exemple seulement, et que chacun d'entre eux a pu changer au temps où on a pu le publier.

Further information regarding post indexes is available on request from the Government Allowance Indexes Section, Prices Division, Statistics Canada, telephone: (613) 951-9598.

On peut obtenir d'autres renseignements au sujet des indices de poste en s'adressant à la section des indices des indemnités de l'état, division des prix, Statistique Canada, téléphone: (613) 951-9598.

Principal commodity group	Number of items priced (if available)
Food at home	119
Meals away from home	12

Tabacs et boissons alcoolisées	12

*Don't let the changing world
take you by surprise!*

*Ne soyez pas dépassé
par les événements!*

An aging population. Lone-parent families. A diverse labour force. Do you know how today's social changes will affect your future ... your organization ... and your family?

Keep pace with the dramatic shifts in Canada's evolving social fabric with Statistic Canada's best-selling quarterly, *Canadian Social Trends*. With vast and varied reports on major changes in key social issues and trends, this periodical incorporates findings from over 50 national surveys.

Written by some of Canada's leading-edge social analysts, *Canadian Social Trends* combines painstaking research with dynamic prose on topics like ethnic diversity, low-income families, time-crunch stress, violent crime and much more — all in a colourful, easy-to-read, magazine format.

A lasting record of changing times!

Join the thousands of business and policy analysts, social-science professionals, and academics who trust *Canadian Social Trends* to demystify the causes and consequences of change in Canadian society. Don't miss a single issue — subscribe today.

***Canadian Social Trends* (catalogue number 11-0080XPE) is \$34 annually in Canada, US\$41 in the United States and US\$48 in other countries.**

Le vieillissement de la population.

Les familles monoparentales. La diversification de la population active. Savez-vous comment les changements sociaux d'aujourd'hui vont se répercuter sur votre avenir, votre organisation, votre famille?

Suivez l'évolution spectaculaire de la société canadienne grâce à *Tendances sociales canadiennes*, une publication trimestrielle de Statistique Canada. Avec des articles vastes et variés sur les principaux changements caractérisant les questions et les tendances sociales principales, cette publication intègre les résultats de plus de 50 enquêtes nationales.

Certains des analystes sociaux les plus reconnus du Canada rédigent des articles dans *Tendances sociales canadiennes*. Ils présentent les résultats de recherches minutieuses dans un style attrayant pour des sujets tels que la diversité ethnique, les familles à faible revenu, le stress dû au manque de temps, le crime et bien d'autres encore dans une revue haute en couleur et de lecture aisée.

Un dossier permanent d'une époque en évolution!

Des milliers d'analystes des entreprises et des politiques, de professionnels des sciences sociales et d'universitaires lisent *Tendances sociales canadiennes* pour identifier les causes et les conséquences de l'évolution de la société canadienne. Ne manquez pas un numéro, abonnez-vous dès aujourd'hui.

L'abonnement annuel à *Tendances sociales canadiennes* (n° 11-0080XPF au catalogue) coûte 34 \$ au Canada, 41 \$ US aux États-Unis et 48 \$ US dans les autres pays.

To order, write to Statistics Canada, Marketing Division, Sales and Service, 120 Parkdale Ave., Ottawa, Ontario, K1A 0T6 or contact the nearest Statistics Canada Reference Centre listed in this publication.

If more convenient, fax your order to 1-613-951-1584 or call toll-free 1-800-267-6677 and use your VISA or MasterCard.

Pour passer votre commande, écrivez à Statistique Canada, Division du marketing, Vente et service, 120, av. Parkdale, Ottawa (Ontario) K1A 0T6, ou adressez-vous au centre de services-conseils de Statistique Canada le plus proche de chez vous et dont la liste figure dans cette publication.

Vous pouvez aussi envoyer votre commande par télécopieur, au 1-613-951-1584, ou téléphoner sans frais au 1-800-267-6677 et donner votre numéro de carte VISA ou MasterCard.

Are you getting your information on the Canadian economy "first-hand"?

Chances are, you spend hours reading several newspapers and a handful of magazines trying to get the whole economic picture -- only to spend even more time weeding out fiction from fact! Wouldn't it be a great deal more convenient (and much more effective) to go straight to the source?

Join the thousands of successful Canadian decision-makers who turn to Statistic Canada's *Canadian Economic Observer* for their monthly briefing. **Loaded with first-hand information, collectively published nowhere else**, CEO is a quick, concise and panoramic overview of the Canadian economy. Its reliability and completeness are without equal.

A single source

Consultations with our many readers -- financial analysts, planners, economists and business leaders -- have contributed to CEO's present, widely-acclaimed, two-part format. The **Analysis Section** includes thought-provoking commentary on current economic conditions, issues, trends and developments. The **Statistical Summary** contains the complete range of hard numbers on critical economic indicators: markets, prices, trade, demographics, unemployment and more.

More practical, straightforward and user-friendly than ever before, the *Canadian Economic Observer* gives you more than 150 pages of in-depth information in one indispensable source.

Why purchase CEO?

As a subscriber, you'll be **directly connected** to Statistics Canada's economic analysts -- names and phone numbers are listed with articles and features. You'll also receive a copy of CEO's annual **Historical Statistical Supplement** -- at **no additional cost**.

So why wait for others to publish Statistics Canada's data second-hand when you can have it straight from the source? Order your subscription to the *Canadian Economic Observer* today.

The *Canadian Economic Observer* (catalogue no. 10-2300XPB) is \$220 annually in Canada, US\$260 in the United States and US\$310 in other countries. Highlights of the *Canadian Composite Leading Indicator* (catalogue no. 11F0008XFE) are available by fax -- the same day of release -- for \$70 annually in Canada and US\$70 in the United States.

To order, write to: Statistics Canada, Marketing Division, Sales and Service, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6 or contact the nearest Statistics Canada Reference Centre listed in this publication. If more convenient, fax your order to 1-613-951-1584 or call toll-free 1-800-267-6677 and use your VISA or MasterCard.

Recevez-vous directement vos informations sur l'économie canadienne?

Il est probable que vous passez des heures à lire plusieurs journaux et un paquet de revues pour essayer d'avoir une vue complète de la situation économique, et ensuite passer encore plus de temps à séparer le réel de ce qui ne l'est pas. Ne serait-il pas plus pratique (et beaucoup plus efficace) de remonter directement à la source?

Joignez-vous aux milliers de décideurs canadiens gagnants qui lisent *L'Observateur économique canadien* pour leur séance de rapport mensuelle. **Rempli de renseignements disponibles nulle part ailleurs**, L'OEC permet d'avoir une vue générale rapide et concise de l'économie canadienne. Il est inégal par sa fiabilité et son exhaustivité.

Une seule source

Les consultations que nous avons eues avec nos nombreux lecteurs, des analystes financiers, des planificateurs, des économistes et des chefs d'entreprise, nous ont permis de présenter L'OEC dans son format actuel en deux parties, qui a été bien accueilli. La **section de l'analyse** contient des commentaires qui donnent à réfléchir sur la conjoncture économique, ses problèmes, ses tendances et ses développements. L'**aperçu statistique** contient l'ensemble complet des chiffres réels pour les indicateurs économiques essentiels : les marchés, les prix, le commerce, la démographie, le chômage, et bien d'autres encore.

Plus pratique, plus simple, plus facile à utiliser qu'auparavant, *L'Observateur économique canadien* vous offre plus de 150 pages de renseignements poussés sous une seule couverture.

Pourquoi acheter L'OEC?

En tant qu'abonné à L'OEC, vous êtes **directement relié** aux analystes économiques de Statistique Canada : des noms et des numéros de téléphone sont cités dans les articles et les rubriques. Vous recevrez également un exemplaire du **Supplément statistique historique annuel à titre gracieux**.

Pourquoi devez-vous donc attendre que d'autres publient les données de Statistique Canada qu'ils ont reprises alors que vous pouvez les obtenir directement à la source? Abonnez-vous à *L'Observateur économique canadien* dès aujourd'hui.

Le prix de l'abonnement annuel à *L'Observateur économique canadien* (n° 10-2300XPB au catalogue) est de 220 \$ au Canada, de 260 \$ US aux États-Unis et de 310 \$ US dans les autres pays. Les faits saillants de l'*Indicateur composite avancé* (n° 11F0008XFE au catalogue) sont offerts par télécopieur -- le jour même de leur parution -- pour 70 \$ par année au Canada et 70 \$ US aux États-Unis.

Pour commander, écrivez à : Statistique Canada, Division du marketing, Vente et service, 120, av. Parkdale, Ottawa (Ontario) K1A 0T6, ou adressez-vous au Centre de consultation de Statistique Canada le plus proche de chez vous et dont la liste figure dans cette publication. Si vous le préférez, vous pouvez envoyer votre commande par télécopieur au 1-613-951-1584, ou téléphoner sans frais au 1-800-267-6677 et utiliser votre carte VISA ou MasterCard.

Data in Many Forms . . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on CD, diskette, computer print-out, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Client Services Unit,
Prices Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 1-613-951-9606) or to the Statistics Canada Reference Centre in:

Halifax	(1-902-426-5331)	Regina	(1-306-780-5405)
Montréal	(1-514-283-5725)	Edmonton	(1-403-495-3027)
Ottawa	(1-613-951-8116)	Calgary	(1-403-292-6717)
Toronto	(1-416-973-6586)	Vancouver	(1-604-666-3691)
Winnipeg	(1-204-983-4020)		

Toll-free access is provided **for all users who reside outside the local dialing area** of any of the Regional Reference Centres.

Standards of Service to the Public

To maintain quality service to the public, Statistics Canada follows established standards covering statistical products and services, delivery of statistical information, cost-recovered services and services to respondents. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

Des données sous plusieurs formes . . .

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Note of Appreciation

Canada owes the success of its statistical system to a long-standing cooperation involving Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- .. figures not available
- ... figures not appropriate or not applicable
- nil or zero
- amount too small to be expressed
- p preliminary figures
- r revised figures
- x confidential to meet secrecy requirements of the Statistics Act

NOTE ON CANSIM

Most of the data published in *The Consumer Price Index* (Catalogue 62-001) and *Consumer Prices and Price Indexes* (Catalogue 62-010) is also available in machine readable form through CANSIM (Canadian Socio-Economic Information Management System). In general, CANSIM provides a longer historical series. For further information on CANSIM call (613) 951-8200 or write to Electronic Data Marketing Division, Statistics Canada, R.H. Coats Building, Ottawa, K1A 0T6.

Additional Information and Related Publications

Detailed information on the methodology and concepts of the CPI is contained in *The Consumer Price Index Reference Paper, Updating Based on 1992 Expenditures*, (Occasional), Catalogue 62-553. Information regarding the Family Expenditure Surveys is contained in two volumes: *Family Food Expenditure in Canada, 1992*, Catalogue 62-554, and *Family Expenditure in Canada, 1992*, Catalogue 62-555.

Consumer Price Index series for Canada, the provinces, Whitehorse, Yellowknife and sixteen cities, in addition to other related price information are also available in *The Consumer Prices Indexes*, (Monthly), Catalogue 62-001. In addition, selected educational and promotional material is available. For these and further information, contact the Consumer Prices Section, Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6 (613-951-9606).

This publication was prepared under the direction of:

Louis Marc Ducharme, Director, Prices Division

Margaret Parlor, Chief, Consumer Prices Section

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

**SIGNES CONVENTIONNELS**

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres non disponibles
- ... n'ayant pas lieu de figurer
- néant ou zéro
- nombres infimes
- p nombres provisoires
- r nombres rectifiés
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret

NOTE CONCERNANT CANSIM

La plupart des données publiées dans *L'indice des prix à la consommation* (n° 62-001 au catalogue) et *Prix à la consommation et indices des prix* (n° 62-010 au catalogue) peuvent être obtenues, sous forme lisible par machine, de CANSIM (Système canadien d'information socio-économique). Les séries historiques sont généralement plus longues dans CANSIM. Pour plus d'information sur CANSIM, signaler (613) 951-8200 ou écrire à Division du marketing, Statistique Canada, Immeuble R.H. Coats, Ottawa, K1A 0T6.

Renseignements supplémentaires et publications connexes

Les méthodes et les concepts de l'IPC sont décrits en détail dans le *Document de référence de l'indice des prix à la consommation, Mise à jour fondée sur les dépenses de 1992*, (hors série), n° 62-553 au catalogue. Des renseignements au sujet des enquêtes sur les dépenses des familles se retrouvent dans deux volumes distincts: *Dépenses alimentaires des familles au Canada, 1992*, n° 62-554 au catalogue; et *Dépenses des familles au Canada, 1992*, n° 62-555 au catalogue.

Des séries d'indices des prix à la consommation pour le Canada, les provinces, Whitehorse, Yellowknife et seize villes, ainsi que d'autres renseignements sur les prix sont publiés dans *L'indice des prix à la consommation*, (mensuel), n° 62-001 au catalogue. De plus, certains documents éducatifs et publicitaires sont disponibles. Pour plus de renseignements, communiquer avec la Section des prix à la consommation, Division des prix, Statistique Canada, Ottawa (Ontario) K1A 0T6 (613-951-9606).

Cette publication a été rédigée sous la direction de:

Louis Marc Ducharme, Directeur, Division des prix

Margaret Parlor, Chef, Section des prix à la consommation

Le papier utilisé dans la présente publication répond aux exigences minimales de l'American National Standard for Information Sciences – "Permanence of Paper for Printed Library Materials", ANSI Z39.48 – 1984.

Highlights

Consumer Price Behavior

Third Quarter 1995

Trends in Consumer Prices

According to the Consumer Price Index (CPI), inflation continued to slow in the third quarter of 1995. Consumers paid 0.1% more for goods and services in September as compared to June. Prices rose 0.5% in the second quarter and 1.1% in the first quarter.

Movements of the seasonally adjusted CPI confirm a slower rate of price increase in the third quarter. The increase between June and September was 0.3%, lower than the rates of 0.5% in the second quarter and 0.7% in the first quarter.

While quarterly movements peaked in the first quarter, year-over-year movements peaked in the second quarter. The average of the annual increases for the months making up the third quarter was 2.4%, down from 2.7% in the second quarter. The smaller rise in the third quarter was associated with a slowing of price increases for food and transportation services.

Major Components (not seasonally adjusted)

Much of the upward pressure on the All-items index in the third quarter came from an increase in recreation, education and reading charges. Further pressures came from advances in clothing prices and in household operations and furnishings charges. A large part of this overall increase was offset by a decline in food prices. The heaviest weighted index, Shelter, remained unchanged.

The conspicuous 2.5% advance in the Recreation, Education and Reading index resulted chiefly from relatively large increases in charges for traveller accommodation (17.9%) and post-secondary tuition fees (7.3%).

Traveller accommodation rates rose sharply during the second and third quarters, the tourist season, as foreigners visited Canada in record numbers. The weakening of the Canadian dollar over the course of the year likely contributed to the increase in the number of non-resident visitors.

Tuition fees have become a growing source of university financing. According to Statistics Canada's University Finances Surveys, tuition fees have risen from 14.5% of operating funds in 1983 to 22.7% in 1994. While fee increases averaged 7.3% this year, fees remained unchanged at Québec universities but rose by 10.0% and 11.0% at institutions in Ontario and Alberta.

The Clothing and Footwear index increased by 1.5% in the third quarter. Much of this comparatively strong performance came in late summer as prices fell in May, June and July. Prices of women's and men's clothing rose by 1.6% and 2.5% respectively. These price increases were partly attributable to rising prices of raw materials, especially cotton and wool. Further price increases were recorded for footwear (2.1%) and jewellery (3.3%). A small proportion of the overall effect was dampened by a drop of 4.3% in the prices of children's clothing.

An addition to the upward thrust came from an increase of 0.7% in charges related to household operations and furnishings. The main contributors were rising prices for paper supplies, furniture, certain household textiles and pet food. Prices of household paper supplies have risen in every month of 1995 with their levels in September standing 16.1% above those a year ago.

The Food index fell by 1.3% as prices of food from grocery stores declined by 2.0% and those for food from restaurants

Faits saillants

Comportement des prix à la consommation

Troisième trimestre de 1995

Tendances des prix à la consommation

Selon l'indice des prix à la consommation (IPC), l'inflation a continué de ralentir au troisième trimestre de 1995. Les consommateurs ont payé leurs biens et services 0,1% plus cher en septembre qu'en juin. Les prix ont progressé de 0,5% au deuxième trimestre et de 1,1% au premier.

Les mouvements de l'IPC désaisonnalisé confirment un ralentissement du taux de progression des prix au troisième trimestre. L'augmentation de juin à septembre a été de 0,3%, contre 0,5% au deuxième trimestre et 0,7% au premier.

Les mouvements trimestriels ont atteint leur sommet au premier trimestre alors que les mouvements d'une année à l'autre ont culminé au second trimestre. La moyenne des augmentations annuelles a été de 2,4% pour les mois du troisième trimestre, en baisse par rapport au 2,7% pour ceux du deuxième. Si la progression a été plus faible au troisième trimestre, c'est la conséquence d'un ralentissement de la progression de prix des aliments et des services de transport.

Composantes principales (indices non désaisonnalisés)

Une bonne part de l'effet d'entraînement qui s'est exercé sur l'indice d'ensemble au troisième trimestre est venue de l'augmentation qui a touché les loisirs, la formation et la lecture. D'autres pressions ont résulté de la majoration du prix de l'habillement et des frais consacrés aux dépenses et à l'équipement du ménage. Une bonne part de cette augmentation d'ensemble a été épongée par une diminution du prix des aliments. L'indice à la pondération la plus forte, soit celui du logement, est demeuré inchangé.

La hausse remarquable de 2,5% de l'indice des loisirs, de la formation et de la lecture est surtout la conséquence d'augmentations relativement considérables des frais pour l'hébergement des voyageurs (17,9%) et des frais de scolarité postsecondaire (7,3%).

Les tarifs d'hébergement des voyageurs ont subi une hausse marquée au deuxième et au troisième trimestre, avec la présence au Canada du nombre record de visiteurs étrangers. L'affaiblissement du dollar canadien au cours de l'année a vraisemblablement contribué à l'augmentation du nombre de visiteurs non résidents.

Les frais de scolarité sont une source croissante de financement des universités. Selon les enquêtes de Statistique Canada sur les finances des universités, les frais de scolarité formaient 22,7% des fonds de fonctionnement en 1994, contre 14,5% en 1983. Malgré une moyenne d'augmentations de 7,3% cette année, les frais sont demeurés inchangés dans les universités du Québec, mais ont augmenté de 10,0% et de 11,0% dans les établissements de l'Ontario et de l'Alberta.

L'indice de l'habillement et des chaussures s'accroît de 1,5% au troisième trimestre. Une bonne part de cette performance comparativement vigoureuse est survenue à la fin de l'été, car les prix ont chuté en mai, en juin et en juillet. Le prix des vêtements pour femmes et pour hommes a augmenté de 1,6% et 2,5% respectivement. Ces hausses sont en partie imputables aux augmentations du prix des matières brutes, et en particulier du coton et de la laine. Il y a eu d'autres augmentations de prix pour les chaussures (2,1%) et les bijoux (3,3%). L'effet d'ensemble a été tempéré dans une faible proportion par un repli de 4,3% du prix des vêtements pour enfants.

Un autre facteur qui a contribué à la poussée des prix a été l'augmentation de 0,7% qui a touché les dépenses et l'équipement du ménage. Les principaux facteurs ont été la hausse du prix des articles en papier, des meubles, de certains articles ménagers en matière textile et de la nourriture pour animaux domestiques. Le prix des articles ménagers en papier a monté chaque mois en 1995, et se situait en septembre à 16,1% de plus qu'il y a un an.

L'indice des aliments a baissé de 1,3%, à la faveur d'un repli de 2,0% du prix des aliments achetés à l'épicerie et d'une hausse de 0,6% de ceux

rose by 0.6%. Much of this decline in grocery store prices came from a substantial 33.5% drop in fresh vegetable prices. An above average supply of fresh vegetables from domestic sources contributed to this price decline. Higher prices for pork, chicken, processed meat and bakery products prevented a further decline in the prices of food purchased from grocery stores.

The Transportation index fell by 0.1% as the impact of a drop in gasoline prices (-4.0%) was effectively eroded by increases in auto insurance premiums, in fares relating to public modes of transportation and in the rental of auto vehicles. Gasoline prices fell steadily in the summer months (June, July and August) but rose slightly in September. Most of the decline was reflected in the frequent occurrences of price wars breaking out across the country. The domestic market was adjusting to a surplus of crude oil in the international market as indicated by a decline in crude oil prices since May of this year.

Auto insurance premiums rose by 1.6% in the third quarter. Automobile owners have seen unusually large increases in this category of spending over the past three years. Between September 1994 and September 1995, premiums have risen by 7.8%, more than three times the increase in the All-items CPI over the same period.

The consumer also paid more to travel by public modes of transportation. Local bus fares rose in some cities in Ontario as operating agencies anticipated a drop in provincial subsidies. Air fares rose also by a comparatively small 2.0% in the third quarter with most of this taking place in July when rates traditionally rise. Auto vehicle rental rates also registered a largely seasonal increase in September.

The Shelter index remained unchanged in the third quarter. Higher charges for rental accommodation and water were offset by a drop in owned accommodation charges mostly for mortgage interest, maintenance and repairs and new houses.

A fairly pronounced price increase was reported for wine purchased from stores. Prices dropped for personal care supplies.

Goods and Services

The Goods index fell by 0.5% in the third quarter following increases of 1.4% and 0.5% in the first and second quarters respectively. The decline in the latest quarter was largely due to a drop of 1.3% in the prices of non-durables traceable mostly to lower prices of fresh vegetables, gasoline and personal care supplies. At the same time, the index for Semi-durables and Durables rose by 1.1% and 0.2% respectively. The Services index, on the other hand, moved up by 0.9% following increases of 0.6% reported for both the first and second quarter.

Price Movements across Provinces

In the third quarter, the CPI fell in four provinces ranging from -0.3% to -0.1% and rose in the remaining six with increases ranging from 0.2% to 0.8%. The biggest declines (-0.3%) were registered in Newfoundland and New Brunswick. The largest increase was posted in Prince Edward Island. At the same time, increases in Whitehorse and Yellowknife were 0.9% and 1.1% respectively.

International Comparisons

Among the seven most industrialised countries of the world (G7 countries), Canada's overall price performance (2.3%) between September 1994 and September 1995 ranked in the middle. Japan (0.2%), Germany (1.6%) and France (2.0%) posted lower rates. Over the second and third quarter, Canada's inflation was marginally lower than that of the United States. Canada has registered lower annual rates of inflation compared to the United States since the start of 1992 (see Table 12 of this publication).

des aliments achetés au restaurant. Une bonne part de ce recul du prix dans les épiceries vient d'une baisse considérable de 33,5% du prix des légumes frais. Des approvisionnements intérieurs supérieurs à la moyenne ont contribué à cette baisse de prix. La hausse du prix du porc, du poulet, de la viande traitée et des produits de boulangerie a empêché un recul encore plus prononcé du prix des aliments achetés à l'épicerie.

L'indice des transports s'est replié de 0,1%, l'incidence d'une baisse du prix de l'essence (-4,0%) ayant été effectivement érodée par l'augmentation des primes d'assurance automobile, des tarifs liés aux modes publics de transport et des frais de location des véhicules automobiles. Le prix de l'essence n'a pas cessé de diminuer tout au long de l'été (juin, juillet et août), mais il a augmenté légèrement en septembre. La plus grande partie du recul s'est reflétée dans de fréquentes guerres de prix qui ont éclaté dans tout le pays. Le marché intérieur s'ajustait à un surplus de pétrole brut sur le marché international, comme en témoigne la baisse du prix du pétrole brut depuis mai de cette année.

Les primes d'assurance automobile ont progressé de 1,6% au troisième trimestre. Les propriétaires d'automobile ont subi des augmentations inhabituellement fortes dans cette catégorie de dépenses au cours des trois dernières années. Entre septembre 1994 et septembre 1995, les primes ont monté de 7,8%, ce qui est plus du triple de la progression de l'IPC d'ensemble sur la même période.

Le consommateur a également dû déboursier davantage pour le transport public. Les tarifs d'autobus locaux ont augmenté dans certaines villes de l'Ontario, où les sociétés d'exploitation s'attendaient à une baisse des subventions provinciales. Les tarifs aériens ont aussi augmenté d'un pourcentage comparativement faible de 2,0% au troisième trimestre, le gros de l'augmentation ayant eu lieu en juillet, mois traditionnel pour les hausses de tarifs. Les taux de location de véhicules automobiles ont aussi accusé une augmentation essentiellement saisonnière en septembre.

L'indice du logement est demeuré inchangé au troisième trimestre. La hausse des frais du logement en location et des tarifs d'eau a été effacée par une chute des frais du logement en propriété, surtout pour ce qui est des intérêts hypothécaires, de l'entretien et des réparations, et des maisons neuves.

On a signalé une augmentation de prix assez prononcée pour le vin acheté au magasin. Le prix des articles de soins personnels a baissé.

Biens et services

L'indice des biens a reculé de 0,5% au troisième trimestre, après des augmentations de 1,4% et de 0,5% au premier et au deuxième trimestre respectivement. Le recul du dernier trimestre est essentiellement le fait d'une baisse de 1,3% du prix des biens non durables, qui est essentiellement imputable à la diminution du prix des légumes frais, de l'essence et des articles de soins personnels. En même temps, l'indice des biens semi-durables et des biens durables a progressé respectivement de 1,1% et de 0,2%. L'indice des services, par contre, a augmenté de 0,9% après les gains de 0,6% signalés pour le premier et le deuxième trimestre.

Mouvements de prix d'une province à l'autre

Au troisième trimestre, l'IPC a reculé dans quatre provinces, dans une fourchette de -0,3% à -0,1%, et augmenté dans les six autres, dans une fourchette de 0,2% à 0,8%. Les reculs les plus marqués (-0,3%) ont été observés à Terre-Neuve et au Nouveau-Brunswick. L'augmentation la plus forte a eu lieu à l'Île-du-Prince-Édouard. En même temps, les augmentations à Whitehorse et à Yellowknife ont été de 0,9% et de 1,1% respectivement.

Comparaisons internationales

Le Canada s'est classé au milieu des sept pays les plus industrialisés du monde (les pays du G-7) pour la performance de ses prix (2,3%) entre septembre 1994 et septembre 1995. Le Japon (0,2%), l'Allemagne (1,6%) et la France (2,0%) ont affiché des taux plus faibles. Au premier et au troisième trimestre, l'inflation a été légèrement plus faible au Canada qu'aux États-Unis. Le Canada a enregistré de plus faibles taux annuels d'inflation que les États-Unis depuis le début de 1992 (voir le tableau 12 de la présente publication).

6	Ground beef, regular – Boeuf haché, régulier	1 kg	3.72	3.70	3.74
7	Pork chops – Côtelettes de porc	1 kg	8.66	9.11	8.90
8	Butt roast – Rôti de soc	1 kg	5.07	5.24	5.06
9	Chicken – Poulet	1 kg	3.70	3.70	3.77
10	Bacon	500 g	2.76	2.78	2.95
11	Wieners – Saucisses fumées	450 g	2.29	2.29	2.43
12	Canned sockeye salmon – Saumon sockeye, en conserve	213 g	3.65	3.68	3.69
13	Homogenized milk – Lait homogénéisé	1 l	1.32	1.32	1.32
14	Partly skimmed milk – Lait partiellement écrémé	1 l	1.29	1.29	1.29
15	Butter – Beurre	454 g	2.84	2.84	2.86
16	Processed cheese food slices – Préparation de fromage fondu, en tranches	250 g	2.54	2.52	2.52
17	Evaporated milk – Lait évaporé	385 ml	1.04	1.03	1.04
18	Eggs – Oeufs	1 dz	1.60	1.62	1.62
19	Bread – Pain	675 g	1.24	1.25	1.29
20	Soda crackers – Biscuits soda	450 g	1.93	1.94	1.94
21	Macaroni	500 g	0.99	0.99	0.99
22	Flour – Farine	2.5 kg	3.33	3.40	3.38
23	Corn flakes – Flocons de maïs	675 g	2.99	2.95	2.96
24	Apples – Pommes	1 kg	2.37	2.44	2.40
25	Bananas – Bananes	1 kg	1.43	1.44	1.22
26	Grapefruits – Pamplemousses	1 kg	1.86	1.92	2.02
27	Oranges	1 kg	1.92	2.06	2.14
28	Apple juice, canned – Jus de pommes, en conserve	1.36 l	1.45	1.46	1.50
29	Orange juice, tetra-brick – Jus d'orange, tetra-brick	1 l	1.67	1.67	1.68
30	Cabbage – Choux	1 kg	0.92	0.73	0.67
31	Carrots – Carottes	1 kg	1.68	1.14	0.94
32	Celery – Céleri	1 kg	1.57	1.17	1.13
33	Mushrooms – Champignons	1 kg	5.75	5.79	5.77
34	Onions – Oignons	1 kg	1.54	1.44	1.00
35	Potatoes – Pommes de terre	4.54 kg	4.37	3.44	2.46
36	French fried potatoes, frozen – Pommes de terre frites, congelées	1 kg	1.67	1.71	1.65
37	Baked beans, canned – Fèves au lard en conserve	398 ml	0.79	0.79	0.79
38	Tomatoes, canned – Tomates, en conserve	796 ml	1.26	1.24	1.24
39	Tomato juice, canned – Jus de tomate en conserve	1.36 l	1.45	1.44	1.46
40	Ketchup	1 l	2.23	2.24	2.31
41	Sugar, white – Sucre blanc	2 kg	1.95	1.96	1.97
42	Coffee, roasted – Café torréfié	300 g	3.97	3.94	3.91
43	Coffee, instant – Café instantané	200 g	6.84	6.78	6.72
44	Tea (bags) – Thé (sachets)	72	2.66	2.67	2.67
45	Cooking or salad oil – Huile à frire ou à salade	1 l	3.02	3.04	3.06
46	Soup, canned – Soupe, en conserve	284 ml	0.73	0.74	0.72
47	Baby food – Nourriture pour bébés	128 ml	0.53	0.53	0.52
48	Peanut butter – Beurre d'arachide	500 g	2.57	2.59	2.59
49	Fruit flavoured crystals – Cristaux à saveur de fruit	2.25 l	1.29	1.28	1.29
50	Soft drinks, cola type – Boissons gazeuses, cola	2 l	1.29	1.31	1.31
51	Soft drinks, lemon type – Boissons gazeuses, citron-lime	2 l	1.40	1.43	1.42
52	Laundry detergent – Détergent synthétique, en poudre	4 l	6.09	6.01	6.02
53	Paper towels (rolls) – Essuie-tout en papier (rouleaux)	2	1.42	1.51	1.52
54	Facial tissue – Papier-mouchoirs	200	1.39	1.42	1.46
55	Bathroom tissue (rolls) – Papier hygiénique (rouleaux)	4	1.83	1.90	1.90
56	Shampoo – Shampoing	300 ml	3.01	2.92	2.89
57	Deodorant – Désodorisant	60 g	2.76	2.78	2.78
58	Tooth paste – Pâte dentifrice	100 ml	1.35	1.35	1.31
59	Cigarettes	200	31.20	31.10	31.22

Appendix 1

THE CONSUMER PRICE INDEX TECHNICAL NOTES

Definition

The Consumer Price Index (CPI) is an indicator of the changes in consumer prices experienced by the target population. The CPI measures price change by comparing, through time, the cost of a fixed basket of commodities. This basket is based on the expenditures of the target population in a certain reference period, currently 1992. Since the basket contains commodities of unchanging or equivalent quantity and quality, the index reflects only pure price movements.

Separate CPI's are published for Canada, the ten provinces, Whitehorse and Yellowknife. Some CPI information is also available for an additional sixteen cities. Since the CPI is a measure of price change from one time period to another, it cannot be used to indicate differences in price levels between provinces or cities.

Population Coverage

The population targeted by the Consumer Price Index consists of families and individuals living in urban and rural private households. For practical reasons, residents of the Territories outside Whitehorse and Yellowknife are not represented by the index. Previous to January 1995, the target population consisted of private households in Canadian urban centres with a population of 30,000 or more.

Time Reference

The CPI compares, in percentage terms, prices in any given time period to prices in the official base period which, at present, is 1986=100. The official time base was changed from 1981=100 to 1986=100 starting with the CPI for June 1990. The change is strictly an arithmetic conversion which alters the index levels but leaves the percentage changes between any two periods intact, except for differences in rounding.

Percent Versus Index Point Changes

The movements of the indexes from one month to another are expressed as percent changes rather than changes in index points. Index point changes are affected by the level of the index which, in turn, depends on the time base of the particular index. The percentage change between any two time periods can be readily calculated by dividing the index point difference between the two time periods by the index for the earlier period and multiplying the result by one hundred.

Price Coverage

The prices used in the CPI calculation are final prices, inclusive of excise and other indirect taxes paid by consumers. In particular, they include the Goods and Services Tax as well as provincial retail sales taxes wherever applicable. It follows that the CPI can change as a result of modifications to any of these taxes.

The selection of commodities and the outlets from which prices are collected is judgmental, other than for rents. The number of prices required for a given commodity depends on the importance and the nature of the commodity. The samples are

Appendice 1

L'INDICE DES PRIX À LA CONSOMMATION NOTES TECHNIQUES

Définition

L'indice des prix à la consommation (IPC) est un indicateur des variations des prix à la consommation payés par la population cible. L'IPC mesure la variation des prix en comparant, dans le temps, le coût d'un panier fixe de biens et de services. Ce panier est basé sur les dépenses de la population cible au cours d'une période de référence qui est actuellement 1992. Comme ce panier comprend des biens et des services dont la quantité et la qualité ne changent pas ou sont équivalentes, l'indice ne retrace que les mouvements de prix purs.

On publie des IPC distincts pour le Canada, les provinces, Whitehorse et Yellowknife. Certains renseignements sont aussi publiés pour seize autres villes. Comme l'IPC est une mesure de la variation de prix entre deux périodes, il ne peut servir à relever les différences de niveau des prix entre les provinces ou les villes.

Champ d'observation de la population

La population couverte par l'indice des prix à la consommation comprend les familles et les personnes vivant dans des ménages privés urbains et ruraux. Pour des raisons pratiques, les résidents des Territoires à l'extérieur de Whitehorse et de Yellowknife ne sont pas représentés. Avant janvier 1995, la population cible comprenait les ménages privés vivant dans les centres urbains du Canada dont la population était de 30 000 habitants ou plus.

Période de base

L'IPC compare, en pourcentage, les prix au cours d'une période donnée à ceux de la période de base officielle, qui est actuellement 1986 = 100. On a changé la période de base de 1981 = 100 à 1986 = 100 à compter de l'IPC du mois de juin 1990. Ce changement est uniquement une conversion arithmétique qui modifie le niveau des indices, mais laisse les variations en pourcentage entre deux périodes intactes, à l'exception des différences dues à l'arrondissement.

Changements en pourcentage versus changements en points d'indice

Les fluctuations des indices d'un mois à l'autre sont exprimées en pourcentage, plutôt qu'en point d'indice. Les variations en point d'indice sont en fonction du niveau de l'indice qui, à son tour, dépend de la période de base de l'indice en question. Par contre, il est facile de calculer la variation en pourcentage entre deux périodes en divisant la différence en point d'indice entre ces deux périodes par l'indice de la période antérieure, et en multipliant ensuite ce résultat par cent.

Champ d'observation des prix

Les prix qui entrent dans le calcul de l'IPC sont les prix finals, ce qui comprend les taxes d'accise et les autres impôts indirects que les consommateurs paient. En particulier, les prix comprennent la taxe sur les produits et les services, ainsi que les taxes de vente au détail provinciales, au besoin. L'IPC peut donc varier à cause des modifications apportées à ces taxes.

La sélection des biens et des services, ainsi que des points de vente où l'on recueille les prix, se fait au jugé, à l'exception des loyers. Le nombre de prix nécessaires pour un bien ou service donné dépend de l'importance et de la nature de celui-ci. L'échantillon est conçu de façon

designed to represent volume selling commodities and outlets. The principal objective of the sample design is to ensure an informative, reliable and impartial picture of consumer inflation at the national and provincial levels.

Price collection for a given month's index is carried out during the first three weeks of the month. Although prices for most CPI commodities are collected monthly, prices for commodities having less frequent price changes (e.g. property taxes and electricity rates) are collected at intervals longer than one month. Special pricings are carried out where there is evidence that significant price changes have occurred between scheduled pricing periods.

Weights and Linking

The CPI maintains fixed quantitative proportions (weights) between commodities during the life of a given basket. The baskets are updated periodically to take into account changes in consumer expenditure patterns. In January 1995, the basket reflecting the 1992 expenditure patterns replaced the 1986 basket. The continuity of the CPI series is maintained by "linking" the corresponding indexes obtained from consecutive baskets.

The CPI is calculated as a weighted average of specified commodity price indexes. The weights are derived from Family Expenditure Survey data. Text Table 1 compares the expenditure shares of the two most recent CPI baskets, i.e. those of 1992 and 1986. Because both sets of weights are expressed in December 1994 or "link month" prices, the differences reflect the shifts in the relative quantities purchased between the two baskets. The differences are a result of changes in consumer expenditure patterns over time and of the expansion of the population coverage.

When reconstructing or re-aggregating published CPI series, the changes in weights and the linking procedures must be taken into account. For a description of the methodology required to reconstruct or re-aggregate CPI series, see the Consumer Price Index Reference Paper cat. 62-553 Occasional or contact Prices Division.

à représenter les produits et services ainsi que les établissements à fort volume de ventes. Le principal objectif du plan de sondage est d'obtenir une image précise, fiable et impartiale de l'inflation représentée par les prix à la consommation aux niveaux national et provincial.

La collecte des prix pour l'indice d'un mois donné se fait pendant les trois premières semaines du mois. Bien que les prix de la plupart des biens et services entrant dans l'IPC soient recueillis chaque mois, les prix des biens ou des services ayant des variations de prix moins fréquentes (impôts fonciers, tarifs de l'électricité, par exemple) sont recueillis à des intervalles dépassant un mois. Des relevés spéciaux de prix sont faits lorsqu'il est évident que des variations de prix appréciables se sont produites entre les périodes régulières de relevé de prix.

Pondération et enchaînement

L'IPC maintient des proportions quantitatives fixes (pondérations) entre les biens et les services pendant la durée de vie d'un panier. Le panier est habituellement mis à jour régulièrement afin de prendre en compte les changements dans la composition des dépenses des consommateurs. En janvier 1995, le panier qui retrace la composition des dépenses de 1992 a remplacé le panier de 1986. La continuité des séries de l'IPC est assurée par un «enchaînement» des indices correspondants provenant de paniers consécutifs.

On calcule l'IPC comme une moyenne pondérée d'indices de prix de biens ou de services précis. Les pondérations sont tirées des données de l'Enquête sur les dépenses des familles. Le tableau explicatif 1 compare les parts des dépenses des deux paniers les plus récents, ceux de 1992 et de 1986. Comme les deux ensembles de pondérations sont exprimés en prix de décembre 1994, qui est le «mois d'enchaînement», les différences reflètent les mouvements des quantités relatives achetées entre les deux paniers. Les différences s'expliquent par les variations de la composition des dépenses des consommateurs dans le temps et par l'extension du champ d'observation de la population.

Quand on reconstruit ou ré-agrège les séries publiées de l'IPC, il faut prendre en compte les changements de pondérations et les procédures d'enchaînement. Pour une description de la méthodologie à utiliser dans la reconstruction des séries de l'IPC ré-agrégées, consulter le document de référence sur l'indice des prix à la consommation portant le numéro de catalogue 62-553 (Hors série), ou s'adresser à la Division des prix.

¹ The 1986 data were adjusted to be comparable with the classification system used for the 1992 basket.

¹ Les données de 1986 ont été modifiées de façon à correspondre au système de classification utilisé pour le panier de 1992

Whitehorse and Yellowknife Indexes

The relatively small size of the housing market in these two cities makes it difficult to construct reliable price indexes for new houses. To compensate, the price movements of rental accommodation are used to approximate the price movements of new houses. The rent information itself is collected using different pricing frequencies and collection methods than in the rest of the country. Because of these problems, the indexes for Rented Accommodation, Owned Accommodation and Shelter are not published for these two cities. Further, the All-items indexes published for these two cities are not strictly comparable with the same indexes for the provinces or the other sixteen urban centres.

Calculation of City Indexes

With the introduction of the 1992 basket, emphasis was shifted from city data to provincial data. City All-items series were continued since many users had come to rely on this service, but the method of calculation was changed. Shelter indexes are calculated for each city. This recognizes the importance of Shelter in the basket, the significant and persistent differences in price movements between cities, and the availability of local data. For the other seven major components, the movement of the provincial counterpart (or, in the cases of Montréal, Toronto, and Vancouver, a sub-provincial counterpart) is used. The major components are aggregated using the city's expenditure pattern to arrive at each city's All-items index.

Seasonal Adjustment

Seasonal adjustment is performed within each basket at the level of the eight major components. The seasonally adjusted All-items series is a weighted average of the eight seasonally adjusted major components. It was linked in December 1994 with the seasonally adjusted series calculated before then to form a continuous series starting in September 1978. Each month's data is fixed until the end of the year when the series is revised. Because the revision can lead to changes in both the levels and movements of the indexes, users employing the CPI for indexation purposes are advised to use the unadjusted indexes.

The Purchasing Power of the Consumer Dollar

As prices rise, a dollar will buy fewer goods and services. Because the CPI measures changes in the general price level, it is often used to estimate changes in the purchasing power of the Canadian dollar. For example, between 1986 and 1994, the All-items Canada CPI rose from 100.0 to 130.7, indicating that consumers had to pay 30.7% more to buy the same quantity of goods and services. Looked at in terms of purchasing power, a dollar in 1994 would purchase the same amount as 76.5¢ $\{(100.0 / 130.7) * 100\}$ did in 1986. This process may be interpreted as the deflation of money or the adjustment of money values to eliminate price effects.

Indices de Whitehorse et de Yellowknife

La taille relativement faible du marché de l'habitation de ces deux villes rend difficile la construction d'indices de prix fiables pour les maisons neuves. Pour corriger cette situation, on se sert du mouvement des prix du logement en location pour obtenir une approximation de celui des maisons neuves. Les renseignements sur les loyers proprement dits sont obtenus à des fréquences de relevé des prix et selon des méthodes de collecte qui diffèrent de celles utilisées ailleurs dans le pays. En raison de ces problèmes, les indices du logement en location, du logement en propriété et du logement ne sont pas publiés pour ces deux villes. Enfin, les indices d'ensemble publiés pour ces deux villes ne sont pas strictement comparables aux mêmes indices pour les provinces ou les seize autres centres urbains.

Calcul des indices des villes

Avec la venue du panier de 1992, l'accent est passé des données des villes aux données des provinces. Les séries des indices d'ensemble pour les villes ont été conservées parce que de nombreux utilisateurs se sont habitués à ce service, mais la méthode de calcul a changé. Les indices du logement sont calculés pour chaque ville. Ainsi, on prend en compte l'importance du logement dans le panier, les différences appréciables et persistantes dans les mouvements des prix entre villes et la disponibilité de données locales. Pour les sept autres composantes principales, on utilise le mouvement de l'indice provincial (pour Montréal, Toronto et Vancouver, un indice infra-provincial). Les composantes principales sont agrégées à partir de la composition des dépenses de la ville pour donner, en fin de compte, l'indice d'ensemble de cette dernière.

Désaisonnalisation

On effectue la désaisonnalisation pour chaque panier au niveau des huit composantes principales. La série désaisonnalisée de l'indice d'ensemble est une moyenne pondérée des huit composantes principales désaisonnalisées. Elle a été enchaînée en décembre 1994 à la série désaisonnalisée calculée auparavant pour donner une série continue qui commence en septembre 1978. Les données de chaque mois sont inchangées jusqu'à la fin de l'année, lorsque la série fait l'objet d'une révision. Comme cette dernière peut entraîner des changements dans les niveaux et dans les mouvements des indices, il est recommandé aux utilisateurs qui se servent de l'IPC à des fins d'indexation de prendre les indices bruts.

Le pouvoir d'achat du dollar à la consommation

Lorsque les prix montent, le dollar achète moins de biens et de services. Parce qu'il mesure les variations du niveau général des prix, l'IPC sert souvent à estimer les variations du pouvoir d'achat du dollar canadien. Ainsi, entre 1986 et 1994, l'IPC d'ensemble pour le Canada est passé de 100,0 à 130,7 : les consommateurs ont donc dû déboursier 30,7% de plus pour acheter la même quantité de biens et de services. Pour ce qui est du pouvoir d'achat, le dollar de 1994 achèterait la même quantité de biens et de services que 76,5 cents $\{(100,0 / 130,7) * 100\}$ en 1986. Ce processus peut s'interpréter comme la déflation de l'argent ou l'ajustement des valeurs monétaires, pour la correction des effets de prix.

Appendix 2

Average retail prices

Average retail prices for food, household supplies, personal care items and cigarettes

Table 5 shows, for each month of the quarter, average prices for selected food, household supply and personal care items and for cigarettes.

Prices for these items are collected as part of the regular monthly CPI survey. Prices for the selected food, household supply and personal care items are observed in food supermarkets, while prices for cigarettes are collected in supermarkets, department stores, drug stores and tobacco shops. Average prices for each commodity are calculated as a weighted average of the average prices in the observed cities using the population of these cities as weights.

The commodities which are priced can vary in quality between outlets or between cities. This is the reason why average prices are not published for each of those cities. Brands and outlets can also vary from month to month. Therefore, average prices may not necessarily be fully comparable from one month to another and should not be used as an appropriate measure of pure price change through time. A matched commodity and outlet sample is used for the CPI to determine the pure price movement of commodities through time.

Appendice 2

Prix de détail moyens

Prix de détail moyens pour les aliments, les produits d'entretien ménager, les produits de soins personnels et les cigarettes

Le tableau 5 présente, pour chaque mois du trimestre, des prix moyens pour certains produits alimentaires, ménagers et de soins personnels ainsi que pour les cigarettes.

Les données sur les prix utilisées dans le calcul sont celles qui ont été recueillies dans le cadre de l'enquête mensuelle régulière de l'IPC. Les prix des aliments et des produits d'entretien ménager et de soins personnels ont été relevés dans des supermarchés alimentaires, alors que les prix des cigarettes ont été observés dans des supermarchés, dans des magasins à rayons, dans des pharmacies et dans des débits de tabac. Les prix moyens pour chaque produit sont obtenus en effectuant une moyenne pondérée des prix moyens de chaque ville observée en utilisant la population de ces villes comme pondération.

Les produits dont on relève les prix peuvent varier en qualité d'un point et de vente ou d'une ville à l'autre. C'est la raison pour laquelle les prix moyens ne sont pas publiés pour chacune des villes. Les marques sélectionnées ainsi que les points de vente peuvent aussi varier d'un mois à l'autre. Les prix moyens ne sont donc pas nécessairement entièrement comparables d'un mois à l'autre et ne devraient pas être considérés comme une mesure appropriée des mouvements de prix purs à travers le temps. L'IPC utilise un échantillon apparié de produits et de points de vente pour calculer le mouvement de prix pur des produits dans le temps.

Appendix 3

INTERNATIONAL RETAIL PRICE COMPARISONS

Those concerned with a need for some comparative measure of the retail prices that a Canadian-based employee may encounter while serving outside Canada, will be interested to know that the Government Allowance Indexes Section, Statistics Canada, produces indexes relating retail prices in foreign countries to those prevailing in Ottawa. The "post indexes" as they are called have been developed primarily to regulate the allowance levels of expatriate Canadian Government civilian and military personnel and because of this, they are very specialized in purpose, and specific to the use for which they were designed. Nonetheless, organizations faced with compensating employees for foreign retail price conditions might well find them to be a useful building-block on which to develop and administer a viable foreign service allowance system.

A post index is, at any given point in time, the expression of the current spatial (or place-to-place) retail price relationship of a range of goods and services at a foreign location, with those prices prevailing in Ottawa, rounded to the nearest five points. Ottawa price levels are always expressed as 100. Thus, a post index of 110 for example, means that prices at the foreign location are estimated to be 10% above those in Ottawa, and specifically, that they have been calculated to fall within the index range 107.5 to 112.4, i.e., 7.5% to 12.4% above Ottawa. For reasons discussed later, the highest degree of accuracy claimed for post indexes, is inherent in their being rounded as described.

The post index encompasses price comparisons for such family expenditure categories as food consumed in the home, meals taken in restaurants, household maintenance, household supplies, communications, domestic help, clothing, transportation, health and personal care, reading and recreation, the prices of some 230 items being considered, as indicated in the table hereunder. Several important elements of expenditure are excluded. Since Canadian public servants pay Canadian income taxes regardless of their place of duty, income tax differentials are not considered. Shelter and fuel and utilities expenditures are excluded from the comparison because the federal government compensates for excess costs of these items by means of benefits separate from those regulated by statistical means. Finally, government employees serving abroad may be entitled to purchase liquor, cigarettes, gasoline, etc., at tax-free prices or they may have access to special purchasing facilities not available to the public at large. To the extent that these conditions prevail, they are reflected in post index calculations.

Accordingly, post indexes should not be automatically applied to general uses without regard to their possible limitations. Potential users of these indexes are advised to discuss the specifics of their needs with the Government Allowance Indexes Section, and they may also wish to familiarize themselves with the total foreign service benefit package provided by the Federal Government, details of which may be obtained from the Personnel Policy Branch, Treasury Board, Government of Canada.

Appendice 3

COMPARAISONS INTERNATIONALES DES PRIX DE DÉTAIL

Les personnes qui sont conscientes du besoin d'une mesure comparative des prix de détail auxquels peut faire face un employé canadien en poste à l'étranger seront intéressées d'apprendre que la Section des indices des indemnités de l'état de Statistique Canada produit des indices qui établissent le rapport entre les prix de détail dans les pays étrangers et ceux d'Ottawa. Les "indices de poste" ont été créés à l'origine afin de fixer le niveau des indemnités aux fonctionnaires et aux militaires canadiens postés à l'étranger; en conséquence, ils ont un but très spécialisé et ne s'appliquent qu'à l'utilisation pour laquelle ils ont été créés. Toutefois, les organismes qui doivent verser des indemnités à des employés en vertu des prix de détail à l'étranger pourraient trouver les indices comme une base utile pour élaborer et administrer un système viable d'indemnités pour service à l'étranger.

Un indice de poste est, à une période donnée, l'expression de la relation spatiale actuelle (ou d'un endroit à un autre) entre le prix de détail d'une variété de biens et services à un endroit à l'étranger et les prix à Ottawa, arrondis au plus proche multiple de cinq. Le niveau des prix à Ottawa est toujours 100. Ainsi, un indice de poste de 110 signifie que l'on évalue les prix à un endroit situé à l'étranger à 10% au-dessus de ceux d'Ottawa et plus précisément que l'on a calculé qu'ils tombaient dans la classe d'indice 107.5 à 112.4; c'est donc dire qu'ils sont de 7.5% à 12.4% supérieurs à ceux d'Ottawa. Pour les raisons ci-après, le plus haut degré de précision dont on puisse se prévaloir pour les indices de poste est fonction de ce qu'ils ont été arrondis comme il est dit ci-dessus.

L'indice de poste renferme des comparaisons de prix pour les catégories de dépenses des familles comme les aliments consommés à la maison, les repas pris au restaurant, l'entretien du ménage, les fournitures ménagères, les communications, le personnel domestique, les vêtements, le transport, les soins personnels et de santé, la lecture et les loisirs; on compare les prix de 230 articles environ, tels que présentés ci-dessous. Plusieurs éléments importants de dépenses sont exclus. Les fonctionnaires canadiens paient leur impôt sur le revenu au Canada, quel que soit le lieu de leur travail; les différences concernant l'impôt sur le revenu ne sont donc pas prises en considération. Les dépenses de logement, de chauffage et de services ne font pas partie de la comparaison parce que l'administration publique fédérale compense les dépenses excessives à cet égard à l'aide de prestations déterminées par des moyens autres que statistiques. Enfin, les fonctionnaires en poste à l'étranger ont parfois le droit d'acheter en franchise des boissons alcooliques, des cigarettes, de l'essence, etc., ou ils ont accès à des magasins spéciaux fermés au grand public. Ces conditions réapparaissent plus ou moins fortement lors du calcul des indices de poste.

Les indices de poste ne doivent donc pas être généralisés automatiquement sans tenir compte de leurs limites éventuelles. Nous conseillons à tous ceux qui utiliseraient cet indice de discuter leurs besoins spécifiques avec la section des indices des indemnités de l'état; ceux-ci peuvent également désirer se familiariser avec l'ensemble complet des bénéfices accordés par le gouvernement fédéral pour le service à l'étranger; ils pourront obtenir cette information en s'adressant à la Direction de la politique du personnel, Conseil du Trésor, gouvernement du Canada.

The primary sources of data used in post index construction are periodic retail price and living cost surveys conducted at foreign locations by the foreign service personnel stationed there. The survey data is analyzed by Statistics Canada. In addition to a variety of price information gathered from retail outlets patronized by Canadian personnel at the post, data are also obtained regarding their spending patterns, along with information on the availability of any special local purchasing facilities, and the extent to which staffs make direct importation of consumer goods from other countries.

The general aim is for full-scale surveys to be carried out at about three-year intervals. However, specific studies may be undertaken more or less frequently than this, depending on the volatility of retail price conditions in each particular country, the instability of exchange rates and the extent to which close monitoring of changes in the local retail price situation being faced by Canadian personnel can be achieved through reference to other statistical indicators.

Once established, every post index is subjected to a monthly review, the object being to assess its continuing validity in the light of exchange rate movements, as well as on the basis of price and other economic intelligence obtained from various sources. Statistics Canada is in monthly receipt of an extensive range of price data from foreign governments, international agencies, and world-wide commercial enterprises. The purpose of the data collection is to assess and apply the most accurate possible measurement of price movements at each foreign post since the time of the last survey. In parallel, Ottawa price movements for the same period are also taken into account. Furthermore, since post indexes relate to personnel whose emoluments are expressed in Canadian dollars, shifts in the Canada foreign country currency exchange rate are an integral part, and in some cases the major element, in the review. If the comparative retail price relationship expressed by an existing post index should appear to have changed by five index points, a new post index level may be brought into effect without necessarily undertaking another complete survey.

In developing any place-to-place statistics of retail price differentials, very difficult problems arise from geographic variations in consumers' buying habits and differences in the quality and availability of goods and services. These problems are magnified in international comparisons. By and large, however, conventions and techniques have been developed which attempt to overcome these problems in the context of the specific uses that these indexes are meant to serve. As measures designed to meet a particular administrative need, post indexes achieve their goal if they fairly reflect, in a general way, the price differentials between locations being encountered by those to whom they are applicable.

Table 14 shows a selection of the approximately 250 post indexes currently being maintained, the effective date of their validity for government allowance purposes, and the exchange rates upon which they are predicated.

Readers should bear in mind that these indexes are shown as examples only, and that any one of them may have changed by the time it could be published.

Les principales sources de données qui servent à la création de l'indice de poste sont des enquêtes périodiques sur les prix de détail et le coût de la vie menées dans les divers postes par le personnel du service extérieur. Les résultats de ces enquêtes sont analysés et compilés par Statistics Canada. Non seulement on recueille divers renseignements sur les prix auprès des points de vente au détail où le personnel canadien en poste à l'étranger s'approvisionne, mais encore on se procure des données sur les habitudes de dépenses, des renseignements relatifs à l'existence de points d'achat spéciaux sur place et au volume des importations directes de biens à la consommation effectuées par le personnel dans d'autres pays.

On se propose généralement de mener une enquête exhaustive une fois tous les trois ans environ. Toutefois des études spécifiques peuvent être menées à intervalles plus ou moins rapprochés en fonction, du degré d'instabilité des conditions des prix de détail dans chaque pays et des taux de change compte tenu de ce qu'une surveillance étroite des changements de la situation locale des prix de détail peut être exercée au moyen d'autres indicateurs statistiques.

Une fois établi, chaque indice de poste est révisé tous les mois afin de s'assurer qu'il est encore valable compte tenu des variations des cours de change, des prix et d'autres renseignements d'ordre économique obtenus de diverses sources. Statistique Canada reçoit chaque mois une grande variété de données sur les prix provenant des gouvernements étrangers, des organismes internationaux et des entreprises commerciales du monde entier. La collecte de ces données doit permettre de calculer avec le plus de précision possible l'évolution des prix à chaque poste étranger depuis la dernière enquête. Parallèlement, on tient compte de l'évolution des prix à Ottawa pour la même période. De plus, comme les indices de poste concernent un personnel dont le traitement est exprimé en dollars canadiens, les variations du cours du change canadien dans le pays étranger en question font partie intégrante de la revision et en sont, dans certains cas, l'élément le plus important. Lorsqu'il apparaît que la relation comparative des prix de détail, exprimée par l'indice actuel du poste a changé de cinq points d'indice, un nouvel indice de poste peut être adopté sans que l'on décide nécessairement de mener une nouvelle enquête complète.

Lors de l'élaboration de statistiques comparatives des prix de détail en divers endroits, des problèmes très difficiles surgissent en raison des variations géographiques dans les habitudes d'achat à la consommation et dans les différences de qualité et de disponibilité des biens et services. Les problèmes se compliquent encore lorsqu'il s'agit de comparaisons internationales. Dans une très large mesure cependant, des conventions et des techniques ont été mises au point en vue de résoudre ces problèmes dans le contexte même de l'usage spécifique auquel ces indices sont destinés. En tant que mesures destinées à satisfaire un besoin administratif particulier, les indices de poste joueront leur rôle s'ils rendent généralement bien compte des différences de prix entre différents endroits auxquelles font face des personnes à qui ces indices s'appliquent.

Le tableau 14 présente une sélection des quelques 250 indices de poste, leur date d'entrée en vigueur dans le cadre du programme des indemnités de l'état, et les taux de change sur lesquels ils ont été établis.

Le lecteur devra noter que ces indices ne sont fournis qu'à titre d'exemple seulement, et que chacun d'entre eux a pu changer au temps où on a pu le publier.

Further information regarding post indexes is available on request from the Government Allowance Indexes Section, Prices Division, Statistics Canada, telephone: (613) 951-9598.

On peut obtenir d'autres renseignements au sujet des indices de poste en s'adressant à la section des indices des indemnités de l'état, division des prix, Statistique Canada, téléphone: (613) 951-9598.

Principal commodity group	Number of items priced (if available)
Food at home	119
Meals away from home	12

Pick a topic... any topic

The **1994 Statistics Canada Catalogue** is your guide to the most complete collection of facts and figures on Canada's changing business, social and economic environment. No matter what you need to know, the **Catalogue** will point you in the right direction.

From the most popular topics of the day – like employment, income, trade, and education – to specific research studies – like mineral products shipped from Canadian ports and criminal victimization in urban areas – you'll find it all here.

... the 1994 Statistics Canada Catalogue will help you get your bearings...

The **Catalogue** puts all this information at your fingertips. With the expanded index, you can search by subject, author or title – even periodical articles are indexed. There's also a separate index for all our electronic products.

The **Catalogue** has everything you need to access all Statistics Canada's products:

- descriptions of over 25 new titles, plus succinct abstracts of the over 650 titles and 7 map series already produced;
- a complete guide to finding and using statistics;
- electronic products in a variety of media, and

advice on getting expert assistance on electronic products and on-line searches;

tabs to each section -- so you can immediately flip to the information you need.

... time and time again

To make sure that the **Catalogue** stands up to frequent use, we used a specially coated cover to prevent broken spines, tattered edges and dog-eared corners.

Order today – you'll be lost without it.

1994 Statistics Canada Catalogue

Choisissez un sujet... n'importe lequel

Le **Catalogue de Statistique Canada 1994** est votre guide pour la collection la plus complète de faits et de chiffres dans les domaines, en constante évolution, du commerce, de la société et de l'économie du Canada. Peu importe ce que vous voulez savoir, le **Catalogue** vous mettra sur la bonne piste.

Des sujets actuels les plus populaires – comme l'emploi, le revenu, le commerce et l'éducation – à des études de recherche spécialisées – comme les produits minéraux expédiés des ports canadiens et la victimisation dans les régions urbaines – vous trouverez tout dans ce document.

Le Catalogue de Statistique Canada 1994 vous aidera à vous orienter...

Le **Catalogue** vous met tous ces renseignements sous la main. L'index augmenté vous permet de chercher par sujet, auteur ou titre – les articles de périodiques sont même indexés. On a aussi ajouté un index séparé pour tous nos produits électroniques.

Le **Catalogue** a tout ce qu'il vous faut pour vous procurer les produits de Statistique Canada :

- descriptions de plus de 25 nouveaux titres et courts résumés des 650 titres et plus et des 7 séries de cartes déjà disponibles;
- guide complet pour obtenir et utiliser les données statistiques;
- produits électroniques sur supports divers et conseils sur l'obtention d'aide d'experts pour

les produits électroniques et les recherches en direct;

système d'onglets pour chaque section – pour que vous puissiez immédiatement repérer les renseignements qui vous intéressent.

...maintes et maintes fois

Pour garantir que le **Catalogue** puisse résister à une utilisation fréquente, nous avons utilisé une couverture avec un revêtement spécial conçue pour éviter les dos cassés, les bords abîmés et les coins de page pliés.

Commandez aujourd'hui – vous ne pourrez plus vous en passer.

*Don't let the changing world
take you by surprise!*

*Ne soyez pas dépassé
par les événements!*

An aging population. Lone-parent families. A diverse labour force. Do you know how today's social changes will affect your future ... your organization ... and your family?

Keep pace with the dramatic shifts in Canada's evolving social fabric with Statistic Canada's best-selling quarterly, *Canadian Social Trends*. With vast and varied reports on major changes in key social issues and trends, this periodical incorporates findings from over 50 national surveys.

Written by some of Canada's leading-edge social analysts, *Canadian Social Trends* combines painstaking research with dynamic prose on topics like ethnic diversity, low-income families, time-crunch stress, violent crime and much more — all in a colourful, easy-to-read, magazine format.

A lasting record of changing times!

Join the thousands of business and policy analysts, social-science professionals, and academics who trust *Canadian Social Trends* to demystify the causes and consequences of change in Canadian society. Don't miss a single issue — subscribe today.

Canadian Social Trends (catalogue number 11-0080XP) is \$34 annually in Canada, US\$41 in the United States and US\$48 in other countries.

Le vieillissement de la population. Les familles monoparentales. La diversification de la population active. Savez-vous comment les changements sociaux d'aujourd'hui vont se répercuter sur votre avenir, votre organisation, votre famille?

Suivez l'évolution spectaculaire de la société canadienne grâce à *Tendances sociales canadiennes*, une publication trimestrielle de Statistique Canada. Avec des articles vastes et variés sur les principaux changements caractérisant les questions et les tendances sociales principales, cette publication intègre les résultats de plus de 50 enquêtes nationales.

Certains des analystes sociaux les plus reconnus du Canada rédigent des articles dans *Tendances sociales canadiennes*. Ils présentent les résultats de recherches minutieuses dans un style attrayant pour des sujets tels que la diversité ethnique, les familles à faible revenu, le stress dû au manque de temps, le crime et bien d'autres encore dans une revue haute en couleur et de lecture aisée.

Un dossier permanent d'une époque en évolution!

Des milliers d'analystes des entreprises et des politiques, de professionnels des sciences sociales et d'universitaires lisent *Tendances sociales canadiennes* pour identifier les causes et les conséquences de l'évolution de la société canadienne. Ne manquez pas un numéro, abonnez-vous dès aujourd'hui.

L'abonnement annuel à *Tendances sociales canadiennes* (n° 11-0080XPF au catalogue) coûte 34 \$ au Canada, 41 \$ US aux États-Unis et 48 \$ US dans les autres pays.

To safeguard your place in tomorrow's marketplace, you have to be able to anticipate trends today. To do that, you're going to need some insight into the purchasing trends in the Canadian marketplace.

With a complete profile of Canadian consumers, plus an indepth analysis of Canadian industries, the **Market Research Handbook** gives you the most thorough coverage of purchasing trends. This valued bestseller can lead you to new markets by giving you details on:

- ▶ how much money Canadians are earning and what they're spending on cars, rent, home entertainment and household appliances;
 - ▶ the level of sales in retail chain and department stores;
 - ▶ what goods are being traded between Canada, U.S., and other countries;
 - ▶ census data such as: age/sex, schooling, households, unemployment, interprovincial and international migration
- ...and much, much more!

With over 600 pages, the **Handbook** includes more than 200 statistical tables that give you instant access to provincial and national market data. Featured are important economic indicators such as the **Gross Domestic Product**, **Labour Force Productivity**, **Private and Public Investment** and the **Consumer Price Index**.

Order your copy of the **Market Research Handbook** (Catalogue #63-2240XPB) today for only \$110 in Canada plus \$7.70 GST, US\$132 in the United States, and US\$154 in other countries.

CALL TOLL-FREE 1-800-267-6677 OR FAX (613)951-1584 and use your VISA or MasterCard. **OR MAIL** your order to: Statistics Canada, Marketing Division, Sales and Service, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Regional Office listed in this publication.

Pour maintenir votre place sur le marché de demain, vous devez être en mesure de prévoir les tendances aujourd'hui. Pour ce faire, vous devrez comprendre les habitudes d'achat sur le marché canadien.

Renfermant un profil complet des consommateurs canadiens ainsi qu'une analyse approfondie des industries canadiennes, le **Recueil statistique des études de marché** brosse un tableau exhaustif des habitudes d'achat. Ce précieux best-seller peut vous faire découvrir de nouveaux marchés en vous fournissant les détails suivants :

- ▶ les revenus des Canadiens et leurs dépenses pour la voiture, le loyer, les appareils de divertissement et les appareils ménagers;
 - ▶ le niveau des ventes dans les magasins de détail à succursales et les grands magasins;
 - ▶ les biens échangés entre le Canada, les É.-U. et d'autres pays;
 - ▶ les données du recensement telles que l'âge, le sexe, le niveau de scolarité, les ménages, le chômage, la migration interprovinciale et internationale
- ...et bien plus encore!

Le **Recueil**, contenant plus de 600 pages et au delà de 200 tableaux statistiques, vous permettra d'accéder instantanément aux données provinciales et nationales sur le marché. Il traite d'indicateurs économiques importants tels que le **produit intérieur brut**, la **productivité de la population active**, les **investissements privés et publics** et l'**Indice des prix à la consommation**.

Procurez-vous votre exemplaire du **Recueil statistique des études de marché** (n° 63-2240XPB au catalogue) dès aujourd'hui pour seulement 110 \$ au Canada plus 7,70 \$ de TPS, 132 \$ US aux États-Unis et 154 \$ US dans les autres pays. Commandez votre exemplaire **PAR TÉLÉPHONE EN COMPOSANT SANS FRAIS** le 1-800-267-6677 **OU PAR TÉLÉCOPIEUR** au (613) 951-1584 et utilisez votre carte VISA ou MasterCard, **OU PAR LA POSTE** à l'adresse suivante : Statistique Canada, Division du marketing, Vente et service, 120, av. Note of Appreciation

Canada owes the success of its statistical system to a long-standing cooperation involving Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- .. figures not available
- ... figures not appropriate or not applicable
- nil or zero
- amount too small to be expressed
- p preliminary figures
- r revised figures
- x confidential to meet secrecy requirements of the Statistics Act

NOTE ON CANSIM

Most of the data published in *The Consumer Price Index* (Catalogue 62-001) and *Consumer Prices and Price Indexes* (Catalogue 62-010) is also available in machine readable form through CANSIM (Canadian Socio-Economic Information Management System). In general, CANSIM provides a longer historical series. For further information on CANSIM call (613) 951-8200 or write to Electronic Data Marketing Division, Statistics Canada, R.H. Coats Building, Ottawa, K1A 0T6.

Additional Information and Related Publications

Detailed information on the methodology and concepts of the CPI is contained in *The Consumer Price Index Reference Paper, Updating Based on 1992 Expenditures*, (Occasional), Catalogue 62-553. Information regarding the Family Expenditure Surveys is contained in two volumes: *Family Food Expenditure in Canada, 1992*, Catalogue 62-554, and *Family Expenditure in Canada, 1992*, Catalogue 62-555.

Consumer Price Index series for Canada, the provinces, Whitehorse, Yellowknife and sixteen cities, in addition to other related price information are also available in *The Consumer Prices Indexes*, (Monthly), Catalogue 62-001. In addition, selected educational and promotional material is available. For these and further information, contact the Consumer Prices Section, Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6 (613-951-9606).

This publication was prepared under the direction of:

Louis Marc Ducharme, Director, Prices Division

Margaret Parlor, Chief, Consumer Prices Section

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres non disponibles
- ... n'ayant pas lieu de figurer
- néant ou zéro
- nombres infimes
- p nombres provisoires
- r nombres rectifiés
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret

NOTE CONCERNANT CANSIM

La plupart des données publiées dans *L'indice des prix à la consommation* (n° 62-001 au catalogue) et *Prix à la consommation et indices des prix* (n° 62-010 au catalogue) peuvent être obtenues, sous forme lisible par machine, de CANSIM (Système canadien d'information socio-économique). Les séries historiques sont généralement plus longues dans CANSIM. Pour plus d'information sur CANSIM, signaler (613) 951-8200 ou écrire à Division du marketing, Statistique Canada, Immeuble R.H. Coats, Ottawa, K1A 0T6.

Renseignements supplémentaires et publications connexes

Les méthodes et les concepts de l'IPC sont décrits en détail dans le *Document de référence de l'indice des prix à la consommation, Mise à jour fondée sur les dépenses de 1992*, (hors série), n° 62-553 au catalogue. Des renseignements au sujet des enquêtes sur les dépenses des familles se retrouvent dans deux volumes distincts: *Dépenses alimentaires des familles au Canada, 1992*, n° 62-554 au catalogue; et *Dépenses des familles au Canada, 1992*, n° 62-555 au catalogue.

Des séries d'indices des prix à la consommation pour le Canada, les provinces, Whitehorse, Yellowknife et seize villes, ainsi que d'autres renseignements sur les prix sont publiés dans *L'indice des prix à la consommation*, (mensuel), n° 62-001 au catalogue. De plus, certains documents éducatifs et publicitaires sont disponibles. Pour plus de renseignements, communiquer avec la Section des prix à la consommation, Division des prix, Statistique Canada, Ottawa (Ontario) K1A 0T6 (613-951-9606).

Cette publication a été rédigée sous la direction de:

Highlights

Consumer Price Behaviour

Fourth Quarter 1995

Trends in Consumer Prices

The overall cost of the Consumer Price Index basket of goods and services was the same in December 1995 as it was in September. A rise in average prices in November was neutralized by price drops in October and December. In seasonally adjusted terms, the CPI rose by 0.2% during the fourth quarter.

Inflation affecting consumers slowed during the course of the 1995. The unadjusted CPI increased by 1.1%, 0.5% and 0.1% in the first three quarters, while the seasonally adjusted CPI increased by 0.7%, 0.5%, and 0.3%.

In October, prices were 2.4% higher than in the same month of 1994. The rate slowed to 2.1% in November and 1.7% in December. Over the quarter, the average increase was 2.1%. This was preceded by advances of 2.7% and 2.4% in the second and third quarters. The first quarter average was lower (1.5%), partly because the movement was dampened by the influence of the 1994 cigarette tax cuts.

Price increases in the fourth quarter were noted in the four western provinces, most particularly in Manitoba and Saskatchewan. Fourth quarter price declines were largest in the Maritime provinces and in Whitehorse and Yellowknife. Minor price drops were seen in Newfoundland and in central Canada.

Major components (not seasonally adjusted)

Increases in the indexes for Transportation, Food, and Shelter were offset by comparatively steep declines in the indexes for Recreation, Education and Reading and for Clothing and Footwear.

Most of the 1.2% advance in the transportation index was attributable to the increase in prices of new model vehicles. In Food, the 0.5% advance was due mainly in price rises for bakery products and fresh vegetables. The major reasons for a 0.1% advance in the Shelter index were rises in property taxes and piped gas rates. Other price increases were noted for airplane travel, rented accommodation, paper supplies and beer purchased from stores.

Considerable offsetting effects came from unusually large declines in traveller accommodation charges (contained in the Recreation group) and in prices of nearly all categories of clothing and footwear. Other constraining effects resulted from lower prices for gasoline, rental of auto vehicles, new houses, maintenance and repair charges and household furnishings.

Prices of the latest model auto vehicles are introduced into the CPI in November of each year. After taking into account quality changes, the prices of the 1996 model vehicles were, on average, 5.4% higher than the prices consumers paid for 1995 model vehicles at the time of their introduction and 3.9% higher than prices consumers were paying for 1995 model cars in the third quarter.

Prices of bakery products advanced as wheat prices rose on the international market following a smaller than expected harvest in 1995. Fresh vegetable prices rose by 13.2% with most of this associated with an increase of 76.2% in tomato

Faits saillants

Comportement des prix à la consommation

Quatrième trimestre de 1995

Tendances des prix à la consommation

Le panier global des biens et des services de l'indice des prix à la consommation coûtait la même chose en décembre 1995 qu'en septembre. Une progression des prix moyens en novembre a été effacée par des reculs en octobre et en décembre. En chiffres désaisonnalisés, l'IPC a avancé de 0,2% au quatrième trimestre.

L'inflation frappant les consommateurs a ralenti en 1995. L'IPC non désaisonné a augmenté de 1,1%, de 0,5% et de 0,1% aux trois premiers trimestres, alors que l'indice désaisonné a monté de 0,7%, de 0,5% et de 0,3%.

En octobre, les prix étaient de 2,4% supérieurs à ceux du même mois de 1994. Le taux a ralenti à 2,1% en novembre et à 1,7% en décembre. L'augmentation moyenne pour le trimestre a été de 2,1%. Elle faisait suite à des gains de 2,7% et de 2,4% au deuxième et au troisième trimestre. La moyenne du premier trimestre était plus faible (1,5%), en partie parce que le mouvement a été tempéré par l'influence des réductions de taxes sur les cigarettes en 1994.

Les augmentations de prix au quatrième trimestre ont été observées dans les quatre provinces de l'Ouest, et plus particulièrement au Manitoba et en Saskatchewan. Les baisses de prix du quatrième trimestre ont été les plus marquées dans les Maritimes ainsi qu'à Whitehorse et à Yellowknife. Les prix se sont légèrement repliés à Terre-Neuve et dans le Canada central.

Principales composantes (non désaisonnalisées)

L'augmentation des indices pour les transports, les aliments et le logement ont été compensées par des reculs comparativement prononcés des indices des loisirs, de la formation et de la lecture, ainsi que de l'habillement et des chaussures.

Le gros de l'avance de 1,2% de l'indice des transports est attribuable à l'augmentation du prix des nouveaux modèles de véhicules. Dans les aliments, la progression de 0,5% est essentiellement le fait de hausses du prix des produits de boulangerie et des légumes frais. Les principaux facteurs de l'augmentation de 0,1% de l'indice du logement sont les hausses des impôts fonciers et des tarifs du gaz. On a observé d'autres augmentations de prix pour les voyages par avion, le logement en location, les articles en papier et la bière achetée en magasin.

Les reculs exceptionnellement forts des frais d'hébergement pour voyageurs (contenus dans le groupe des loisirs) et du prix de presque toutes les catégories d'habillement et de chaussures ont représenté un contrepoids considérable. La diminution du prix de l'essence, de la location de véhicules automobiles, des maisons neuves, de l'entretien et des réparations et de l'équipement du ménage ont aussi eu un effet de limitation.

Le prix des véhicules automobiles du dernier modèle entre dans l'IPC en novembre de chaque année. Après correction des variations de qualité, le prix des véhicules 1996 était, en moyenne, 5,4% plus haut que ce que les consommateurs ont payé pour les véhicules de 1995 au moment de leur lancement et 3,9% de plus que ce qu'ils ont payé pour les voitures 1995 au troisième trimestre.

Le prix des produits de boulangerie a progressé, à la faveur d'une montée du prix du blé sur le marché international, suite à une récolte plus faible que prévu en 1995. Le prix des légumes frais a avancé de 13,2%, conséquence surtout d'une augmentation de 76,2% du prix des

prices. The tomato season in the United States came to an end and stocks from local supplies were exhausted by December.

Changes in property taxes for the year are introduced into the CPI in October of each year. Property taxes climbed by an average 1.7% in October 1995 compared to 1.3% in October 1994. Increases over the past three years represented a considerable moderation over the 8.4% rise posted in October 1992. The modest overall economic performance in recent years, accompanied by stagnation or declines in personal incomes, have engendered some powerful political demands for cutting public expenditures and keeping any tax increases to a minimum.

Piped gas rates fell 4.2% in October but rose 7.0% in November and 3.7% in December. The October drop was largely due to rebates to Ontario users. The increases were largely associated with the introduction of winter rates. Despite the advances noted in the latest two months, piped gas rates in December 1995 were 6.2% below their levels of December 1994.

Traveller accommodation charges dropped sharply in the fourth quarter. These charges rose drastically in May and July (5.8% and 17.9%), mainly in response to a record number of non-resident visitors encouraged, perhaps, by a depreciated Canadian dollar in the foreign currency market. Following larger than normal seasonal price cuts in October (-9.8%) and December (-12.8%), prices returned to essentially the same level as last December.

With the exception of the prices of children's clothing, all categories of clothing, footwear, clothing accessories and jewellery registered notable price declines. It appeared to result from retailers attempting to reduce inventories they had built up in anticipation of a pick-up in consumer spending which did not materialize over the autumn and holiday seasons.

Special aggregates

The Goods index rose by 0.3% in the latest quarter, recovering somewhat from a decline of 0.5% in the third quarter. The increase in the fourth quarter was associated with price advances for durables (1.6%) which include new model vehicles and for non-durables (0.3%). Some of this impact was eroded by a 2.2% drop in the prices of semi-durables, which includes clothing and footwear.

The Services index fell 0.4% in the fourth quarter following a rise of 0.9% in the third quarter. Much of the fall was associated with the drop in hotel and motel rates.

Energy prices fell 0.3%. The change in the latest quarter came from a drop of 1.9% in gasoline prices offset partially by a rise of 6.3% in piped gas rates.

The All-items excluding Food and Energy index fell by 0.1%. This was preceded by an increase of 0.7% in the third quarter.

International comparisons

Among the G7 countries (the seven most industrialized countries of the world), changes in their CPI's between December 1994 and December 1995 ranged from a low of -0.3% in Japan to a high of 5.8% in Italy. Canada's rise of 1.7% has placed it second only to Japan in suppressing inflation. Canada has also continued to sustain a lower rate of inflation than the United States.

tomates. La saison des tomates aux États-Unis a pris fin et les stocks provenant des approvisionnements locaux étaient épuisés en décembre.

Les variations des impôts fonciers pour l'année sont introduites dans l'IPC en octobre de chaque année. Les impôts fonciers ont subi une majoration moyenne de 1,7% en octobre 1995, contre 1,3% en octobre 1994. Les augmentations des trois dernières années représentaient un ralentissement important par rapport à la hausse de 8,4% d'octobre 1992. La modeste performance économique d'ensemble des dernières années, accompagnée par la stagnation ou les reculs des revenus personnels, a provoqué l'exercice de certaines puissantes pressions politiques en faveur d'une réduction des dépenses publiques et du maintien au minimum des augmentations d'impôts.

Les tarifs du gaz ont chuté de 4,2% en octobre, mais avancé de 7,0% en novembre et de 3,7% en décembre. La baisse d'octobre s'explique essentiellement par les remises faites aux utilisateurs ontariens. Les augmentations sont dans une large mesure liées à l'application des tarifs d'hiver. Malgré les avances observées dans les deux derniers mois, en décembre 1995, les tarifs du gaz étaient de 6,2% inférieurs à leurs niveaux de décembre 1994.

Les frais d'hébergement pour voyageurs ont fortement baissé au quatrième trimestre. Ils avaient connu une progression spectaculaire en mai et en juillet (5,8% et 17,9%), essentiellement sous l'effet d'un nombre record de visiteurs non résidents, encouragés, peut-être, par la dépréciation du dollar canadien sur le marché des changes. Après des réductions saisonnières supérieures à la normale en octobre (-9,8%) et en décembre (-12,8%), les prix sont retournés essentiellement au même niveau qu'en décembre de l'année précédente.

À l'exception des vêtements pour enfants, toutes les catégories de vêtements, de chaussures, d'accessoires vestimentaires et de bijoux ont affiché des baisses de prix appréciables. Cela semble venir de ce que les détaillants ont cherché à réduire les stocks qu'ils avaient constitués en prévision d'une reprise des dépenses de consommation qui ne s'est pas matérialisée au cours de l'automne et pendant les Fêtes.

Agrégats spéciaux

L'indice des biens a monté de 0,3% au dernier trimestre, en reprise partielle d'un repli de 0,5% au troisième trimestre. L'augmentation du quatrième trimestre est liée à des avances du prix des biens durables (1,6%), qui comprennent les nouveaux modèles de véhicules, et des biens non durables (0,3%). Une part de cet effet a été érodée par un repli de 2,2% du prix des biens semi-durables, qui comprennent l'habillement et les chaussures.

L'indice des services a fléchi de 0,4% au quatrième trimestre, après une progression de 0,9% au troisième trimestre. Une bonne part de ce repli est liée à la baisse des tarifs d'hébergement à l'hôtel et au motel.

Les prix de l'énergie ont reculé de 0,3%. La variation au dernier trimestre est venue d'un repli de 1,9% du prix de l'essence, partiellement compensé par une hausse de 6,3% des tarifs du gaz.

L'indice d'ensemble, sans les aliments et l'énergie, a fléchi de 0,1%. Ce recul a été précédé d'une progression de 0,7% au troisième trimestre.

Comparaisons internationales

Parmi les pays du Groupe des Sept (les sept pays les plus industrialisés du monde), les variations de l'IPC entre décembre 1994 et décembre 1995 se situaient dans une fourchette de -0,3% au Japon à 5,8% en Italie. Par sa progression de 1,7%, le Canada s'est classé au second rang dans la lutte contre l'inflation, après le Japon. Il a aussi maintenu un taux d'inflation plus faible que les États-Unis.

THE CONSUMER PRICE INDEX TECHNICAL NOTES

Definition

The Consumer Price Index (CPI) is an indicator of the changes in consumer prices experienced by the target population. The CPI measures price change by comparing, through time, the cost of a fixed basket of commodities. This basket is based on the expenditures of the target population in a certain reference period, currently 1992. Since the basket contains commodities of unchanging or equivalent quantity and quality, the index reflects only pure price movements.

Separate CPI's are published for Canada, the ten provinces, Whitehorse and Yellowknife. Some CPI information is also available for an additional sixteen cities. Since the CPI is a measure of price change from one time period to another, it cannot be used to indicate differences in price levels between provinces or cities.

Population Coverage

The population targeted by the Consumer Price Index consists of families and individuals living in urban and rural private households. For practical reasons, residents of the Territories outside Whitehorse and Yellowknife are not represented by the index. Previous to January 1995, the target population consisted of private households in Canadian urban centres with a population of 30,000 or more.

Time Reference

The CPI compares, in percentage terms, prices in any given time period to prices in the official base period which, at present, is 1986=100. The official time base was changed from 1981=100 to 1986=100 starting with the CPI for June 1990. The change is strictly an arithmetic conversion which alters the index levels but leaves the percentage changes between any two periods intact, except for differences in rounding.

Percent Versus Index Point Changes

The movements of the indexes from one month to another are expressed as percent changes rather than changes in index points. Index point changes are affected by the level of the index which, in turn, depends on the time base of the particular index. The percentage change between any two time periods can be readily calculated by dividing the index point difference between the two time periods by the index for the earlier period and multiplying the result by one hundred.

Price Coverage

The prices used in the CPI calculation are final prices, inclusive of excise and other indirect taxes paid by consumers. In particular, they include the Goods and Services Tax as well as provincial retail sales taxes wherever applicable. It follows that the CPI can change as a result of modifications to any of these taxes.

The selection of commodities and the outlets from which prices are collected is judgmental, other than for rents. The number of prices required for a given commodity depends on the importance and the nature of the commodity. The samples are

Appendice 1

L'INDICE DES PRIX À LA CONSOMMATION NOTES TECHNIQUES

Définition

L'indice des prix à la consommation (IPC) est un indicateur des variations des prix à la consommation payés par la population cible. L'IPC mesure la variation des prix en comparant, dans le temps, le coût d'un panier fixe de biens et de services. Ce panier est basé sur les dépenses de la population cible au cours d'une période de référence qui est actuellement 1992. Comme ce panier comprend des biens et des services dont la quantité et la qualité ne changent pas ou sont équivalentes, l'indice ne retrace que les mouvements de prix purs.

On publie des IPC distincts pour le Canada, les provinces, Whitehorse et Yellowknife. Certains renseignements sont aussi publiés pour seize autres villes. Comme l'IPC est une mesure de la variation de prix entre deux périodes, il ne peut servir à relever les différences de niveau des prix entre les provinces ou les villes.

Champ d'observation de la population

La population couverte par l'indice des prix à la consommation comprend les familles et les personnes vivant dans des ménages privés urbains et ruraux. Pour des raisons pratiques, les résidents des Territoires à l'extérieur de Whitehorse et de Yellowknife ne sont pas représentés. Avant janvier 1995, la population cible comprenait les ménages privés vivant dans les centres urbains du Canada dont la population était de 30 000 habitants ou plus.

Période de base

L'IPC compare, en pourcentage, les prix au cours d'une période donnée à ceux de la période de base officielle, qui est actuellement 1986 = 100. On a changé la période de base de 1981 = 100 à 1986 = 100 à compter de l'IPC du mois de juin 1990. Ce changement est uniquement une conversion arithmétique qui modifie le niveau des indices, mais laisse les variations en pourcentage entre deux périodes intactes, à l'exception des différences dues à l'arrondissement.

Changements en pourcentage versus changements en points d'indice

Les fluctuations des indices d'un mois à l'autre sont exprimées en pourcentage, plutôt qu'en point d'indice. Les variations en point d'indice sont en fonction du niveau de l'indice qui, à son tour, dépend de la période de base de l'indice en question. Par contre, il est facile de calculer la variation en pourcentage entre deux périodes en divisant la différence en point d'indice entre ces deux périodes par l'indice de la période antérieure, et en multipliant ensuite ce résultat par cent.

Champ d'observation des prix

Les prix qui entrent dans le calcul de l'IPC sont les prix finals, ce qui comprend les taxes d'accise et les autres impôts indirects que les consommateurs paient. En particulier, les prix comprennent la taxe sur les produits et les services, ainsi que les taxes de vente au détail provinciales, au besoin. L'IPC peut donc varier à cause des modifications apportées à ces taxes.

La sélection des biens et des services, ainsi que des points de vente où l'on recueille les prix, se fait au jugé, à l'exception des loyers. Le nombre de prix nécessaires pour un bien ou service donné dépend de l'importance et de la nature de celui-ci. L'échantillon est conçu de façon

designed to represent volume selling commodities and outlets. The principal objective of the sample design is to ensure an informative, reliable and impartial picture of consumer inflation at the national and provincial levels.

Price collection for a given month's index is carried out during the first three weeks of the month. Although prices for most CPI commodities are collected monthly, prices for commodities having less frequent price changes (e.g. property taxes and electricity rates) are collected at intervals longer than one month. Special pricings are carried out where there is evidence that significant price changes have occurred between scheduled pricing periods.

Weights and Linking

The CPI maintains fixed quantitative proportions (weights) between commodities during the life of a given basket. The baskets are updated periodically to take into account changes in consumer expenditure patterns. In January 1995, the basket reflecting the 1992 expenditure patterns replaced the 1986 basket. The continuity of the CPI series is maintained by "linking" the corresponding indexes obtained from consecutive baskets.

The CPI is calculated as a weighted average of specified commodity price indexes. The weights are derived from Family Expenditure Survey data. Text Table 1 compares the expenditure shares of the two most recent CPI baskets, i.e. those of 1992 and 1986. Because both sets of weights are expressed in December 1994 or "link month" prices, the differences reflect the shifts in the relative quantities purchased between the two baskets. The differences are a result of changes in consumer expenditure patterns over time and of the expansion of the population coverage.

When reconstructing or re-aggregating published CPI series, the changes in weights and the linking procedures must be taken into account. For a description of the methodology required to reconstruct or re-aggregate CPI series, see the Consumer Price Index Reference Paper cat. 62-553 Occasional or contact Prices Division.

à représenter les produits et services ainsi que les établissements à fort volume de ventes. Le principal objectif du plan de sondage est d'obtenir une image précise, fiable et impartiale de l'inflation représentée par les prix à la consommation aux niveaux national et provincial.

La collecte des prix pour l'indice d'un mois donné se fait pendant les trois premières semaines du mois. Bien que les prix de la plupart des biens et services entrant dans l'IPC soient recueillis chaque mois, les prix des biens ou des services ayant des variations de prix moins fréquentes (impôts fonciers, tarifs de l'électricité, par exemple) sont recueillis à des intervalles dépassant un mois. Des relevés spéciaux de prix sont faits lorsqu'il est évident que des variations de prix appréciables se sont produites entre les périodes régulières de relevé de prix.

Pondération et enchaînement

L'IPC maintient des proportions quantitatives fixes (pondérations) entre les biens et les services pendant la durée de vie d'un panier. Le panier est habituellement mis à jour régulièrement afin de prendre en compte les changements dans la composition des dépenses des consommateurs. En janvier 1995, le panier qui retrace la composition des dépenses de 1992 a remplacé le panier de 1986. La continuité des séries de l'IPC est assurée par un « enchaînement » des indices correspondants provenant de paniers consécutifs.

On calcule l'IPC comme une moyenne pondérée d'indices de prix de biens ou de services précis. Les pondérations sont tirées des données de l'Enquête sur les dépenses des familles. Le tableau explicatif 1 compare les parts des dépenses des deux paniers les plus récents, ceux de 1992 et de 1986. Comme les deux ensembles de pondérations sont exprimés en prix de décembre 1994, qui est le « mois d'enchaînement », les différences reflètent les mouvements des quantités relatives achetées entre les deux paniers. Les différences s'expliquent par les variations de la composition des dépenses des consommateurs dans le temps et par l'extension du champ d'observation de la population.

Quand on reconstruit ou ré-agrège les séries publiées de l'IPC, il faut prendre en compte les changements de pondérations et les procédures d'enchaînement. Pour une description de la méthodologie à utiliser dans la reconstruction des séries de l'IPC ré-agrégées, consulter le document de référence sur l'indice des prix à la consommation portant le numéro de catalogue 62-553 (Hors série), ou s'adresser à la Division des prix.

TEXT TABLE 1
Comparison of the 1992 and 1986
Distribution of Expenditures used in the
Consumer Price Index, by Major
Component, for Canada

Major Components	1992 Expenditures		1986 Expenditures ¹		Composantes principales
	Dépenses de 1992		Dépenses de 1986 ¹		
	Expressed in 1992 prices	Expressed in Dec. 1994 prices	Expressed in Dec. 1994 prices		
	Exprimées en prix de 1992	Exprimées en prix de Déc. 1994	Exprimées en prix de Déc. 1994		
All-items	100.0	100.0	100.0	Ensemble	
Food	18.0	18.0	17.0	Aliments	
Shelter	27.6	27.9	25.3	Logement	
Household operations and furnishings	10.4	10.0	9.7	Dépenses et équipement du ménage	
Clothing and footwear	6.8	6.6	8.6	Habillement et chaussures	
Transportation	17.2	18.3	18.8	Transports	
Health and personal care	4.3	4.3	4.3	Santé et soins personnels	
Recreation, education and reading	10.2	10.4	10.3	Loisirs, formation et lecture	
Alcoholic beverages and tobacco products	5.5	4.5	6.0	Boissons alcoolisées et produits du tabac	

¹ The 1986 data were adjusted to be comparable with the classification system used for the 1992 basket.

¹ Les données de 1986 ont été modifiées de façon à correspondre au système de classification utilisé pour le panier de 1992.

Whitehorse and Yellowknife Indexes

The relatively small size of the housing market in these two cities makes it difficult to construct reliable price indexes for new houses. To compensate, the price movements of rental accommodation are used to approximate the price movements of new houses. The rent information itself is collected using different pricing frequencies and collection methods than in the rest of the country. Because of these problems, the indexes for Rented Accommodation, Owned Accommodation and Shelter are not published for these two cities. Further, the All-items indexes published for these two cities are not strictly comparable with the same indexes for the provinces or the other sixteen urban centres.

Calculation of City Indexes

With the introduction of the 1992 basket, emphasis was shifted from city data to provincial data. City All-items series were continued since many users had come to rely on this service, but the method of calculation was changed. Shelter indexes are calculated for each city. This recognizes the importance of Shelter in the basket, the significant and persistent differences in price movements between cities, and the availability of local data. For the other seven major components, the movement of the provincial counterpart (or, in the cases of Montréal, Toronto, and Vancouver, a sub-provincial counterpart) is used. The major components are aggregated using the city's expenditure pattern to arrive at each city's All-items index.

Seasonal Adjustment

Seasonal adjustment is performed within each basket at the level of the eight major components. The seasonally adjusted All-items series is a weighted average of the eight seasonally adjusted major components. It was linked in December 1994 with the seasonally adjusted series calculated before then to form a continuous series starting in September 1978. Each month's data is fixed until the end of the year when the series is revised. Because the revision can lead to changes in both the levels and movements of the indexes, users employing the CPI for indexation purposes are advised to use the unadjusted indexes.

The Purchasing Power of the Consumer Dollar

As prices rise, a dollar will buy fewer goods and services. Because the CPI measures changes in the general price level, it is often used to estimate changes in the purchasing power of the Canadian dollar. For example, between 1986 and 1994, the All-items Canada CPI rose from 100.0 to 130.7, indicating that consumers had to pay 30.7% more to buy the same quantity of goods and services. Looked at in terms of purchasing power, a dollar in 1994 would purchase the same amount as 76.5¢ $\{(100.0 / 130.7) * 100\}$ did in 1986. This process may be interpreted as the deflation of money or the adjustment of money values to eliminate price effects.

Indices de Whitehorse et de Yellowknife

La taille relativement faible du marché de l'habitation de ces deux villes rend difficile la construction d'indices de prix fiables pour les maisons neuves. Pour corriger cette situation, on se sert du mouvement des prix du logement en location pour obtenir une approximation de celui des maisons neuves. Les renseignements sur les loyers proprement dits sont obtenus à des fréquences de relevé des prix et selon des méthodes de collecte qui diffèrent de celles utilisées ailleurs dans le pays. En raison de ces problèmes, les indices du logement en location, du logement en propriété et du logement ne sont pas publiés pour ces deux villes. Enfin, les indices d'ensemble publiés pour ces deux villes ne sont pas strictement comparables aux mêmes indices pour les provinces ou les seize autres centres urbains.

Calcul des indices des villes

Avec la venue du panier de 1992, l'accent est passé des données des villes aux données des provinces. Les séries des indices d'ensemble pour les villes ont été conservées parce que de nombreux utilisateurs se sont habitués à ce service, mais la méthode de calcul a changé. Les indices du logement sont calculés pour chaque ville. Ainsi, on prend en compte l'importance du logement dans le panier, les différences appréciables et persistantes dans les mouvements des prix entre villes et la disponibilité de données locales. Pour les sept autres composantes principales, on utilise le mouvement de l'indice provincial (pour Montréal, Toronto et Vancouver, un indice infra-provincial). Les composantes principales sont agrégées à partir de la composition des dépenses de la ville pour donner, en fin de compte, l'indice d'ensemble de cette dernière.

Désaisonnalisation

On effectue la désaisonnalisation pour chaque panier au niveau des huit composantes principales. La série désaisonnalisée de l'indice d'ensemble est une moyenne pondérée des huit composantes principales désaisonnalisées. Elle a été enchaînée en décembre 1994 à la série désaisonnalisée calculée auparavant pour donner une série continue qui commence en septembre 1978. Les données de chaque mois sont inchangées jusqu'à la fin de l'année, lorsque la série fait l'objet d'une révision. Comme cette dernière peut entraîner des changements dans les niveaux et dans les mouvements des indices, il est recommandé aux utilisateurs qui se servent de l'IPC à des fins d'indexation de prendre les indices bruts.

Le pouvoir d'achat du dollar à la consommation

Lorsque les prix montent, le dollar achète moins de biens et de services. Parce qu'il mesure les variations du niveau général des prix, l'IPC sert souvent à estimer les variations du pouvoir d'achat du dollar canadien. Ainsi, entre 1986 et 1994, l'IPC d'ensemble pour le Canada est passé de 100,0 à 130,7 : les consommateurs ont donc dû déboursier 30,7% de plus pour acheter la même quantité de biens et de services. Pour ce qui est du pouvoir d'achat, le dollar de 1994 achèterait la même quantité de biens et de services que 76,5 cents $\{(100,0 / 130,7) * 100\}$ en 1986. Ce processus peut s'interpréter comme la déflation de l'argent ou l'ajustement des valeurs monétaires, pour la correction des effets de prix.

Appendix 2

Average retail prices

Average retail prices for food, household supplies, personal care items and cigarettes

Table 5 shows, for each month of the quarter, average prices for selected food, household supply and personal care items and for cigarettes.

Prices for these items are collected as part of the regular monthly CPI survey. Prices for the selected food, household supply and personal care items are observed in food supermarkets, while prices for cigarettes are collected in supermarkets, department stores, drug stores and tobacco shops. Average prices for each commodity are calculated as a weighted average of the average prices in the observed cities using the population of these cities as weights.

The commodities which are priced can vary in quality between outlets or between cities. This is the reason why average prices are not published for each of those cities. Brands and outlets can also vary from month to month. Therefore, average prices may not necessarily be fully comparable from one month to another and should not be used as an appropriate measure of pure price change through time. A matched commodity and outlet sample is used for the CPI to determine the pure price movement of commodities through time.

Appendice 2

Prix de détail moyens

Prix de détail moyens pour les aliments, les produits d'entretien ménager, les produits de soins personnels et les cigarettes

Le tableau 5 présente, pour chaque mois du trimestre, des prix moyens pour certains produits alimentaires, ménagers et de soins personnels ainsi que pour les cigarettes.

Les données sur les prix utilisées dans le calcul sont celles qui ont été recueillies dans le cadre de l'enquête mensuelle régulière de l'IPC. Les prix des aliments et des produits d'entretien ménager et de soins personnels ont été relevés dans des supermarchés alimentaires, alors que les prix des cigarettes ont été observés dans des supermarchés, dans des magasins à rayons, dans des pharmacies et dans des débits de tabac. Les prix moyens pour chaque produit sont obtenus en effectuant une moyenne pondérée des prix moyens de chaque ville observée en utilisant la population de ces villes comme pondération.

Les produits dont on relève les prix peuvent varier en qualité d'un point et de vente ou d'une ville à l'autre. C'est la raison pour laquelle les prix moyens ne sont pas publiés pour chacune des villes. Les marques sélectionnées ainsi que les points de vente peuvent aussi varier d'un mois à l'autre. Les prix moyens ne sont donc pas nécessairement entièrement comparables d'un mois à l'autre et ne devraient pas être considérés comme une mesure appropriée des mouvements de prix purs à travers le temps. L'IPC utilise un échantillon apparié de produits et de points de vente pour calculer le mouvement de prix pur des produits dans le temps.

Appendix 3

INTERNATIONAL RETAIL PRICE COMPARISONS

Those concerned with a need for some comparative measure of the retail prices that a Canadian-based employee may encounter while serving outside Canada, will be interested to know that the Government Allowance Indexes Section, Statistics Canada, produces indexes relating retail prices in foreign countries to those prevailing in Ottawa. The "post indexes" as they are called have been developed primarily to regulate the allowance levels of expatriate Canadian Government civilian and military personnel and because of this, they are very specialized in purpose, and specific to the use for which they were designed. Nonetheless, organizations faced with compensating employees for foreign retail price conditions might well find them to be a useful building-block on which to develop and administer a viable foreign service allowance system.

A post index is, at any given point in time, the expression of the current spatial (or place-to-place) retail price relationship of a range of goods and services at a foreign location, with those prices prevailing in Ottawa, rounded to the nearest five points. Ottawa price levels are always expressed as 100. Thus, a post index of 110 for example, means that prices at the foreign location are estimated to be 10% above those in Ottawa, and specifically, that they have been calculated to fall within the index range 107.5 to 112.4, i.e., 7.5% to 12.4% above Ottawa. For reasons discussed later, the highest degree of accuracy claimed for post indexes, is inherent in their being rounded as described.

The post index encompasses price comparisons for such family expenditure categories as food consumed in the home, meals taken in restaurants, household maintenance, household supplies, communications, domestic help, clothing, transportation, health and personal care, reading and recreation, the prices of some 230 items being considered, as indicated in the table hereunder. Several important elements of expenditure are excluded. Since Canadian public servants pay Canadian income taxes regardless of their place of duty, income tax differentials are not considered. Shelter and fuel and utilities expenditures are excluded from the comparison because the federal government compensates for excess costs of these items by means of benefits separate from those regulated by statistical means. Finally, government employees serving abroad may be entitled to purchase liquor, cigarettes, gasoline, etc., at tax-free prices or they may have access to special purchasing facilities not available to the public at large. To the extent that these conditions prevail, they are reflected in post index calculations.

Accordingly, post indexes should not be automatically applied to general uses without regard to their possible limitations. Potential users of these indexes are advised to discuss the specifics of their needs with the Government Allowance Indexes Section, and they may also wish to familiarize themselves with the total foreign service benefit package provided by the Federal Government, details of which may be obtained from the Personnel Policy Branch, Treasury Board, Government of Canada.

Appendice 3

COMPARAISONS INTERNATIONALES DES PRIX DE DÉTAIL

Les personnes qui sont conscientes du besoin d'une mesure comparative des prix de détail auxquels peut faire face un employé canadien en poste à l'étranger seront intéressées d'apprendre que la Section des indices des indemnités de l'état de Statistique Canada produit des indices qui établissent le rapport entre les prix de détail dans les pays étrangers et ceux d'Ottawa. Les "indices de poste" ont été créés à l'origine afin de fixer le niveau des indemnités aux fonctionnaires et aux militaires canadiens postés à l'étranger; en conséquence, ils ont un but très spécialisé et ne s'appliquent qu'à l'utilisation pour laquelle ils ont été créés. Toutefois, les organismes qui doivent verser des indemnités à des employés en vertu des prix de détail à l'étranger pourraient trouver les indices comme une base utile pour élaborer et administrer un système viable d'indemnités pour service à l'étranger.

Un indice de poste est, à une période donnée, l'expression de la relation spatiale actuelle (ou d'un endroit à un autre) entre le prix de détail d'une variété de biens et services à un endroit à l'étranger et les prix à Ottawa, arrondis au plus proche multiple de cinq. Le niveau des prix à Ottawa est toujours 100. Ainsi, un indice de poste de 110 signifie que l'on évalue les prix à un endroit situé à l'étranger à 10% au-dessus de ceux d'Ottawa et plus précisément que l'on a calculé qu'ils tombaient dans la classe d'indice 107.5 à 112.4; c'est donc dire qu'ils sont de 7.5% à 12.4% supérieurs à ceux d'Ottawa. Pour les raisons ci-après, le plus haut degré de précision dont on puisse se prévaloir pour les indices de poste est fonction de ce qu'ils ont été arrondis comme il est dit ci-dessus.

L'indice de poste renferme des comparaisons de prix pour les catégories de dépenses des familles comme les aliments consommés à la maison, les repas pris au restaurant, l'entretien du ménage, les fournitures ménagères, les communications, le personnel domestique, les vêtements, le transport, les soins personnels et de santé, la lecture et les loisirs; on compare les prix de 230 articles environ, tels que présentés ci-dessous. Plusieurs éléments importants de dépenses sont exclus. Les fonctionnaires canadiens paient leur impôt sur le revenu au Canada, quel que soit le lieu de leur travail; les différences concernant l'impôt sur le revenu ne sont donc pas prises en considération. Les dépenses de logement, de chauffage et de services ne font pas partie de la comparaison parce que l'administration publique fédérale compense les dépenses excessives à cet égard à l'aide de prestations déterminées par des moyens autres que statistiques. Enfin, les fonctionnaires en poste à l'étranger ont parfois le droit d'acheter en franchise des boissons alcooliques, des cigarettes, de l'essence, etc., ou ils ont accès à des magasins spéciaux fermés au grand public. Ces conditions réapparaissent plus ou moins fortement lors du calcul des indices de poste.

Les indices de poste ne doivent donc pas être généralisés automatiquement sans tenir compte de leurs limites éventuelles. Nous conseillons à tous ceux qui utiliseraient cet indice de discuter leurs besoins spécifiques avec la section des indices des indemnités de l'état; ceux-ci peuvent également désirer se familiariser avec l'ensemble complet des bénéfices accordés par le gouvernement fédéral pour le service à l'étranger; ils pourront obtenir cette information en s'adressant à la Direction de la politique du personnel, Conseil du Trésor, gouvernement du Canada.

The primary sources of data used in post index construction are periodic retail price and living cost surveys conducted at foreign locations by the foreign service personnel stationed there. The survey data is analyzed by Statistics Canada. In addition to a variety of price information gathered from retail outlets patronized by Canadian personnel at the post, data are also obtained regarding their spending patterns, along with information on the availability of any special local purchasing facilities, and the extent to which staffs make direct importation of consumer goods from other countries.

The general aim is for full-scale surveys to be carried out at about three-year intervals. However, specific studies may be undertaken more or less frequently than this, depending on the volatility of retail price conditions in each particular country, the instability of exchange rates and the extent to which close monitoring of changes in the local retail price situation being faced by Canadian personnel can be achieved through reference to other statistical indicators.

Once established, every post index is subjected to a monthly review, the object being to assess its continuing validity in the light of exchange rate movements, as well as on the basis of price and other economic intelligence obtained from various sources. Statistics Canada is in monthly receipt of an extensive range of price data from foreign governments, international agencies, and world-wide commercial enterprises. The purpose of the data collection is to assess and apply the most accurate possible measurement of price movements at each foreign post since the time of the last survey. In parallel, Ottawa price movements for the same period are also taken into account. Furthermore, since post indexes relate to personnel whose emoluments are expressed in Canadian dollars, shifts in the Canada foreign country currency exchange rate are an integral part, and in some cases the major element, in the review. If the comparative retail price relationship expressed by an existing post index should appear to have changed by five index points, a new post index level may be brought into effect without necessarily undertaking another complete survey.

In developing any place-to-place statistics of retail price differentials, very difficult problems arise from geographic variations in consumers' buying habits and differences in the quality and availability of goods and services. These problems are magnified in international comparisons. By and large, however, conventions and techniques have been developed which attempt to overcome these problems in the context of the specific uses that these indexes are meant to serve. As measures designed to meet a particular administrative need, post indexes achieve their goal if they fairly reflect, in a general way, the price differentials between locations being encountered by those to whom they are applicable.

Table 14 shows a selection of the approximately 250 post indexes currently being maintained, the effective date of their validity for government allowance purposes, and the exchange rates upon which they are predicated.

Readers should bear in mind that these indexes are shown as examples only, and that any one of them may have changed by the time it could be published.

Les principales sources de données qui servent à la création de l'indice de poste sont des enquêtes périodiques sur les prix de détail et le coût de la vie menées dans les divers postes par le personnel du service extérieur. Les résultats de ces enquêtes sont analysés et compilés par Statistics Canada. Non seulement on recueille divers renseignements sur les prix auprès des points de vente au détail où le personnel canadien en poste à l'étranger s'approvisionne, mais encore on se procure des données sur les habitudes de dépenses, des renseignements relatifs à l'existence de points d'achat spéciaux sur place et au volume des importations directes de biens à la consommation effectuées par le personnel dans d'autres pays.

On se propose généralement de mener une enquête exhaustive une fois tous les trois ans environ. Toutefois des études spécifiques peuvent être menées à intervalles plus ou moins rapprochés en fonction, du degré d'instabilité des conditions des prix de détail dans chaque pays et des taux de change compte tenu de ce qu'une surveillance étroite des changements de la situation locale des prix de détail peut être exercée au moyen d'autres indicateurs statistiques.

Une fois établi, chaque indice de poste est révisé tous les mois afin de s'assurer qu'il est encore valable compte tenu des variations des cours de change, des prix et d'autres renseignements d'ordre économique obtenus de diverses sources. Statistique Canada reçoit chaque mois une grande variété de données sur les prix provenant des gouvernements étrangers, des organismes internationaux et des entreprises commerciales du monde entier. La collecte de ces données doit permettre de calculer avec le plus de précision possible l'évolution des prix à chaque poste étranger depuis la dernière enquête. Parallèlement, on tient compte de l'évolution des prix à Ottawa pour la même période. De plus, comme les indices de poste concernent un personnel dont le traitement est exprimé en dollars canadiens, les variations du cours du change canadien dans le pays étranger en question font partie intégrante de la révision et en sont, dans certains cas, l'élément le plus important. Lorsqu'il apparaît que la relation comparative des prix de détail, exprimée par l'indice actuel du poste a changé de cinq points d'indice, un nouvel indice de poste peut être adopté sans que l'on décide nécessairement de mener une nouvelle enquête complète.

Lors de l'élaboration de statistiques comparatives des prix de détail en divers endroits, des problèmes très difficiles surgissent en raison des variations géographiques dans les habitudes d'achat à la consommation et dans les différences de qualité et de disponibilité des biens et services. Les problèmes se compliquent encore lorsqu'il s'agit de comparaisons internationales. Dans une très large mesure cependant, des conventions et des techniques ont été mises au point en vue de résoudre ces problèmes dans le contexte même de l'usage spécifique auquel ces indices sont destinés. En tant que mesures destinées à satisfaire un besoin administratif particulier, les indices de poste joueront leur rôle s'ils rendent généralement bien compte des différences de prix entre différents endroits auxquelles font face des personnes à qui ces indices s'appliquent.

Le tableau 14 présente une sélection des quelques 250 indices de poste, leur date d'entrée en vigueur dans le cadre du programme des indemnités de l'état, et les taux de change sur lesquels ils ont été établis.

Le lecteur devra noter que ces indices ne sont fournis qu'à titre d'exemple seulement, et que chacun d'entre eux a pu changer au temps où on a pu le publier.

Further information regarding post indexes is available on request from the Government Allowance Indexes Section, Prices Division, Statistics Canada, telephone: (613) 951-9598.

On peut obtenir d'autres renseignements au sujet des indices de poste en s'adressant à la section des indices des indemnités de l'état, division des prix, Statistique Canada, téléphone: (613) 951-9598.

Principal commodity group	Number of items priced (if available)
Food at home	170
Meals away from home	12
Household maintenance and services	7
Household supplies	28
Communications	3
Domestic help (depending on location)	2-8
Clothing and home furnishings	29
Transportation and automobile operation	22
Health and personal care	41
Reading and recreation	51
Tobacco and alcohol	20

Groupe principal de produits	Nombre d'articles dont le prix est relevé (lorsque disponibles)
Aliments consommés à la maison	170
Repas pris à l'extérieur	12
Entretien et services ménagers	7
Fournitures ménagères	28
Communication	3
Aide-domestique (dépendant de l'endroit)	2-8
Habillement et ameublement	29
Transports et utilisation de l'automobile	22
Santé et soins personnels	41
Lecture et loisirs	51
Tabacs et boissons alcoolisées	20

Don't let the changing world
take you by surprise!

Ne soyez pas dépassé
par les événements!

An aging population. Lone-parent families. A diverse labour force. Do you know how today's social changes will affect your future ... your organization ... and your family?

Keep pace with the dramatic shifts in Canada's evolving social fabric with Statistic Canada's best-selling quarterly, *Canadian Social Trends*. With vast and varied reports on major changes in key social issues and trends, this periodical incorporates findings from over 50 national surveys.

Written by some of Canada's leading-edge social analysts, *Canadian Social Trends* combines painstaking research with dynamic prose on topics like ethnic diversity, low-income families, time-crunch stress, violent crime and much more — all in a colourful, easy-to-read, magazine format.

A lasting record of changing times!

Join the thousands of business and policy analysts, social-science professionals, and academics who trust *Canadian Social Trends* to demystify the causes and consequences of change in Canadian society. Don't miss a single issue — subscribe today.

Canadian Social Trends (catalogue number 11-0080XPE) is \$34 (plus GST and applicable PST) annually in Canada, US\$41 in the United States and US\$48 in other countries.

Le vieillissement de la population.

Les familles monoparentales. La diversification de la population active. Savez-vous comment les changements sociaux d'aujourd'hui vont se répercuter sur votre avenir, votre organisation, votre famille?

Suivez l'évolution spectaculaire de la société canadienne grâce à *Tendances sociales canadiennes*, une publication trimestrielle de Statistique Canada. Avec des articles vastes et variés sur les principaux changements caractérisant les questions et les tendances sociales principales, cette publication intègre les résultats de plus de 50 enquêtes nationales.

Certains des analystes sociaux les plus reconnus du Canada rédigent des articles dans *Tendances sociales canadiennes*. Ils présentent les résultats de recherches minutieuses dans un style attrayant pour des sujets tels que la diversité ethnique, les familles à faible revenu, le stress dû au manque de temps, le crime et bien d'autres encore dans une revue haute en couleur et de lecture aisée.

Un dossier permanent d'une époque en évolution!

Des milliers d'analystes des entreprises et des politiques, de professionnels des sciences sociales et d'universitaires lisent *Tendances sociales canadiennes* pour identifier les causes et les conséquences de l'évolution de la société canadienne. Ne manquez pas un numéro, abonnez-vous dès aujourd'hui.

L'abonnement annuel à *Tendances sociales canadiennes* (n° 11-0080XPF au catalogue) coûte 34 \$ (plus la TPS et la TVP en vigueur) au Canada, 41 \$ US aux États-Unis et 48 \$ US dans les autres pays.

To order, write to Statistics Canada, Operations and Integration Division, Circulation Management, 120 Parkdale Ave., Ottawa, Ontario, K1A 0T6 or contact the nearest Statistics Canada Reference Centre listed in this publication.

If more convenient, fax your order to 1-613-951-1584 or call toll-free 1-800-267-6677 and use your VISA or MasterCard. Via Internet: order@statcan.ca

Parkdale, Ottawa (Ontario) K1A 0T6, ou adressez-vous au centre de services-conseils de Statistique Canada le plus proche de chez vous et dont la liste figure dans cette publication.

Vous pouvez aussi envoyer votre commande par télécopieur, au 1-613-951-1584, ou téléphoner sans frais au 1-800-267-6677 et donner votre numéro de carte VISA ou MasterCard. Via l'Internet: order@statcan.ca

Don't let this happen to you!

Ne vous laissez pas dépasser par les événements!

Imagine you're called upon to make a really important business decision. You spend some anxious days weighing your options. You examine the available data. Finally, you make your decision...

...only to discover too late that your information was incomplete or outdated!

If you've ever experienced this type of frustration... or if your reputation ever depends on the quality of the data you refer to... **Infomat** is for you.

Infomat is your fastest and easiest way to keep on top of important Canadian economic and social trends. Since it comes to you weekly – not daily – issues won't pile up unread. And, in just one publication, you'll have the answers to almost anything:

- price indexes
- manufacturing shipments and orders
- imports and exports
- labour market conditions, and
- dozens of key social and economic indicators!

And because **Infomat** is based on over 100 ongoing Statistics Canada surveys, no other source is more timely or more reliable.

Infomat is specially designed and written for you – a busy manager with no time to waste!

Join the confident, successful decision-makers in the country and subscribe to Infomat today!

Infomat (catalogue no. 11-0020XPE) is only \$140* per year in Canada, US\$168 in the U.S. and US\$196 in other countries. Also available by **Fax Service**: 50 issues for \$600* in Canada, US\$600 in the U.S. and US\$600 in other countries.
CALL TOLL-FREE 1-800-267-6677 OR FAX (613) 951-1584 and use your VISA or MasterCard.

OR MAIL your order to: Statistics Canada, Operations and Integration Division, Circulation Management, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.
Via Internet: order@statcan.ca *plus GST and applicable PST

Imaginez que vous devez prendre une décision de gestion très importante. Vous vous faites du mauvais sang pendant quelques jours à évaluer vos options. Vous examinez les données disponibles. Vous vous décidez enfin...

... pour vous rendre compte trop tard que vous vous êtes fondé sur de l'information incomplète ou périmée!

Si vous avez déjà vécu ce genre de situation... ou si vous devez un jour miser votre réputation sur la qualité des données que vous avancez...

Infomat est pour vous.

Infomat est la façon la plus rapide et la plus facile de se tenir au courant des tendances économiques et sociales importantes au Canada. Comme il s'agit d'un hebdomadaire – non d'un quotidien – vous aurez le temps de le lire. Et dans une seule et même publication, vous trouverez réponse à presque tout :

- indices de prix
- livraisons et commandes des fabricants
- importations et exportations
- situation du marché du travail, et des
- dizaines d'indicateurs socio-économiques clés!

Et comme **Infomat** est fondé sur plus de 100 enquêtes permanentes de Statistique Canada, aucune autre source n'est plus à jour ou plus fiable.

Infomat est conçu et rédigé pour des gens comme vous – des gestionnaires qui n'ont pas de temps à perdre!

Faites comme bien d'autres décideurs au pays qui ont réussi et abonnez-vous à Infomat aujourd'hui même!

Infomat (n° 11-0020XPF au catalogue) ne coûte que 140 \$* par année au Canada, 168 \$ US aux États-Unis et 196 \$ US dans les autres pays. Nous vous offrons également le **service de télécopie** : 50 numéros pour 600 \$* au Canada, 600 \$ US aux États-Unis et 600 \$ US dans les autres pays.

Vous pouvez nous joindre **PAR TÉLÉPHONE AU 1-800-267-6677** ou **PAR TÉLÉCOPIEUR AU (613) 951-1584** et utiliser votre carte VISA ou MasterCard. Ou envoyez votre commande **PAR LA POSTE** à : Statistique Canada, Division des opérations et de l'intégration, Direction de la circulation, 120, avenue Parkdale, Ottawa (Ontario), K1A 0T6. Vous pouvez aussi communiquer avec le Centre de consultation de Statistique Canada le plus près. La liste de ces centres se retrouve dans la présente publication.
